Things to Make and Do in the Fourth Dimension Matt Parker, 2014-12-02 A book from the stand-up mathematician that makes math fun again! Math is boring, says the mathematician and comedian Matt Parker. Part of the problem may be the way the subject is taught, but it's also true that we all, to a greater or lesser extent, find math difficult and counterintuitive. This counterintuitiveness is actually part of the point, argues Parker: the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do—through its logical tools we are able to reach beyond our innate abilities and grasp more and more abstract concepts. In the absorbing and exhilarating *Things to Make and Do in the Fourth Dimension*, Parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen-year-olds. Starting with the foundations of math familiar from school (numbers, geometry, and algebra), he reveals how it is possible to climb all the way up to the topology and to four-dimensional shapes, and from there to infinity—and slightly beyond. Both playful and sophisticated, *Things to Make and Do in the Fourth Dimension* is filled with captivating games and puzzles, a buffet of optional hands-on activities that entices us to take pleasure in math that is normally only available to those studying at a university level. *Things to Make and Do in the Fourth Dimension* invites us to re-learn much of what we missed in school and, this time, to be utterly enthralled by it.

Humble Pi Matt Parker, 2021-01-19 #1 INTERNATIONAL BESTSELLER AN ADAM SAVAGE BOOK CLUB PICK The book-length answer to anyone who ever put their hand up in math class and asked, “When am I ever going to use this in the real world?” “Fun, informative, and relentlessly entertaining, *Humble Pi* is a charming and very readable guide to some of humanity's all-time greatest miscalculations—that also gives you permission to feel a little better about some of your own mistakes.” —Ryan North, author of *How to Invent Everything* Our whole world is built on math, from the code running a website to the equations enabling the design of skyscrapers and bridges. Most of the time this math works quietly behind the scenes . . . until it doesn't. All sorts of seemingly innocuous mathematical mistakes can have significant consequences. Math is easy to ignore until a misplaced decimal point upends the stock market, a unit conversion error causes a plane to crash, or someone divides by zero and stalls a battleship in the middle of the ocean. Exploring and explaining a litany of glitches, near misses, and mathematical mishaps involving the internet, big data, elections, street signs, lotteries, the Roman Empire, and an Olympic team, Matt Parker uncovers the bizarre ways math trips us up, and what this reveals about its essential place in our world. Getting it wrong has never been more fun.

The Book of Mac Donna-Claire Chesman,2021-10-26 An album-by-album celebration of the life and music of Mac Miller through oral histories, intimate reflections, and critical examinations of his enduring work. "One of my most vivid memories of him is the way he would look at you while he was playing you a song. He tried to look you right in the eyes to see how you were feeling about it." —Will Kalson, friend and first manager Following Mac Miller's tragic passing in 2018, Donna-Claire Chesman dedicated a year to chronicling his work through the unique lens of her relationship to the music and Mac's singular relationship to his fans. Like many who'd been following him since he'd started releasing mixtapes at eighteen years old, she felt as if she'd come of age alongside the rapidly evolving artist, with his music being crucial to her personal development. "I want people to remember his humanity as they're listening to the music, to realize how much bravery and courage it takes to be that honest, be that self-aware, and be that real about things going on internally. He let us witness that entire journey. He never hid that." —Kehlani, friend and musician. The project evolved to include intimate interviews with many of Mac's closest friends and collaborators, from his Most Dope Family in Pittsburgh to the producers and musicians who assisted him in making his everlasting music, including Big Jerm, Rex Arrow, Wiz Khalifa, Benjy Grinberg, Just Blaze, Josh Berg, Syd, Thundercat, and more. These voices, along with the author's commentary, provide a vivid and poignant portrait of this astonishing artist—one who had just released a series of increasingly complex albums, demonstrating what a musical force he was and how heartbreaking it was to lose him. "As I'm reading the lyrics, it's crazy. It's him telling us that he hopes we can always respect him. I feel like this is a message from him, spiritually. A lot of the time, his music was like little letters and messages to his friends, family, and people he loved, to remind them of who he really was." —Quentin Cuff, best friend and tour manager

The Memory Index Julian Ray Vaca,2022-08-09 In this electric speculative YA sci-fi novel, the world treats memories like currency, so dreams can be a complicated business. Perfect for fans of Neal Stephenson and Philip K. Dick. In an alternative 1987, a disease ravages human memories. There is no cure, only artificial recall. The lucky ones—the recollectors—need the treatment only once a day. Freya Izquierdo isn't lucky. The high school senior is a "degen" who needs artificial recall several times a day. Plagued by blinding half-memories that take her to her knees, she's desperate to remember everything that will help her investigate her father's violent death. When her sleuthing almost lands her in jail, a shadowy school dean selects her to attend his Foxtail Academy, where five hundred students will trial a new tech said to make artificial recall obsolete. She's the only degen on campus. Why was she chosen? Freya is nothing like the other students, not even her new friends Ollie, Chase, and the alluring Fletcher Cohen. Definitely not at all like the students who start to vanish, one by one. And nothing like the mysterious Dean Mendelsohn, who has a bunker deep in the woods behind the school. Nothing can prepare Freya and her friends for the truth of what that bunker holds. And what kind of memories she'll have to access to survive it. "Vaca's debut is a thrilling and often unsettling examination of the elusive nature of memory and truth. The Memory Index will leave you breathlessly turning pages until its satisfying conclusion." —Jonathan Evison, New York Times bestselling author of Small World Get hooked on The Memory Index Duology: Book 1: The Memory Index Book 2: The Recall Paradox (coming Spring 2023)

For comics themselves and for those who support them, this is the first book to give the director's perspective on creating and performing stand-up comedy. Drawing on his own experience of directing stand-up alongside speaking to comedians and their directors, Chris Head produces a revealing perspective on the creative process, comic persona, writing stand-up, structuring material and delivering a performance. Directors interviewed include Logan Murray, John Gordillo and Simon McBurney, who between them have directed Eddie Izzard, Michael McIntyre, Milton Jones, Lenny Henry and French & Saunders. With a foreword by BBC arts editor Will Gompertz and contributions from many other interviewees including Oliver Double (author of Getting the Joke), this is the only book that goes all the way from one-liners to theatre via comedy club sets and full-length shows. Perfect for stand-ups from newbies to pros, students of comedy, academics studying and teaching stand-up and for directors themselves, A Director's Guide to the Art of Stand-up offers hundreds of inspiring practical insights and shows how creating the comedian's highly personal, individual act can be a deeply collaborative process.

Drift Rachel Maddow,2012-03-27 The #1 New York Times bestseller that charts America's dangerous drift into a state of perpetual war. Written with bracing wit and intelligence, Rachel Maddow's Drift argues that we've drifted away from America's original ideals and become a nation weirdly at peace with perpetual war. To understand how we've arrived at such a dangerous place, Maddow takes us from the Vietnam War to today's war in Afghanistan, along the way exploring Reagan's radical presidency, the disturbing rise of executive authority, the gradual outsourcing of our war-making capabilities to private companies, the plummeting percentage of American families whose children fight our constant wars for us, and even the changing fortunes of G.I. Joe. Ultimately, she shows us just how much we stand to lose by allowing the scope of American military power to overpower our political discourse. Sensible yet provocative, dead serious yet seriously funny, Drift reinvigorates a loud and jangly political debate about our vast and confounding national security state.
