The Art of the Genoese Colonies of the Black Sea Basin (1261-1475) Rafał Quirini-Popławski, 2023-09-20 Rafał Quirini-Popławski offers here the first panorama of the artistic phenomena of the Genoese outposts scattered around the Black Sea, an area whose cultural history is little known. The artistic creativity of the region emerges as extraordinarily rich and colorful, with a variety of heterogeneous, hybrid and intermingled characteristics. The book questions the extent to which the descriptor Genoese can be applied to the settlements' artistic production; Quirini-Popławski demonstrates that, despite entrenched views of these colonies as centres of Italian and Latin culture, it was in fact Greek and Armenian art that was of greater importance.

Crusading and Archaeology Vardit R. Shotten-Hallel, Rosie Weetch, 2020-11-03 Between the eleventh and fifteenth centuries, the social and cultural worlds of medieval Europe and the Eastern Mediterranean were transformed by the religious impetus of the crusades. Today we bear witness to these transformations in the material and environmental record revealed by new archaeological excavations and reappraisals of museum collections. This volume highlights new archaeological knowledge being developed by scholars

working in the fields of history, archaeology, numismatics, and architecture to demonstrate its potential to change and augment our understanding of the crusades. The 16 chapters in this volume deploy a contemporary scientific approach to archaeology of the crusades to give an up-to-date account into the diverse range of research in this area. They explore five key themes: the implications of scientific methods, new excavations and surveys, architectural analyses, sigillography, and the application of social interpretations. Together these chapters provide a new way of approaching the study of the crusades, and demonstrate the value of taking a holistic view that utilises the full diverse range of evidence available to us.

Philip II of Spain and the Architecture of Empire Laura Fernández-González, 2021-05-10 Philip II of Spain was a major patron of the arts, best known for his magnificent palace and royal mausoleum at the Monastery of San Lorenzo of El Escorial. However, neither the king's monastery nor his collections fully convey the rich artistic landscape of early modern Iberia. In this book, Laura Fernández-González examines Philip's architectural and artistic projects, placing them within the wider context of Europe and the transoceanic Iberian dominions. Philip II of Spain and the Architecture of Empire investigates ideas of empire and globalization in the art and architecture of the Iberian world during the sixteenth century, a time when the Spanish Empire was one of the largest in the world. Fernández-González illuminates Philip's use of building regulations to construct an imperial

city in Madrid and highlights the importance of his transformation of the Simancas fortress into an archive. She analyzes the refashioning of his imperial image upon his ascension to the Portuguese throne and uses the Hall of Battles in El Escorial as a lens through which to understand visual culture, history writing, and Philip's kingly image as it was reflected in the funeral commemorations mourning his death across the Iberian world. Positioning Philip's art and architectural programs within the wider cultural context of politics, legislation, religion, and theoretical trends, Fernández-González shows how design and images traveled across the Iberian world and provides a nuanced assessment of Philip's role in influencing them. Original and important, this panoramic work will have a lasting impact on Philip II's artistic legacy. Art historians and scholars of Iberia and sixteenth-century history will especially value Fernández-González's research.

Caen Castle Joseph Decaëns, Adrien Dubois, Micaël Allainguillaume, 2010
Founded by William the Conqueror, the castle of Caen was 'rediscovered' after WWII, offering up more and more historical information thanks to archaeologists and historians working on the project, starting with Michel de Bouard. Although the evidence of the first duke's palace is today rather scant, the hall of the 'Exchequer' has retained some of the magnificence that it must have exuded in the XIIth century, despite the transformations it has undergone through time. As for the castle keep, which was torn down during

the French Revolution, its foundations continue to fascinate many a visitor, drawing upon the Anglo-Norman origins of the edifice, whereas the porte des Champs built in the XIIIth century harks back to the days of the return of Normandy to French possession and finally the Saint-Pierre barbican recalls the Hundred Years' War. One should nevertheless not forget what the castle enceinte with its towers and drawbridge used to be in the Middle Ages - a town within the town, with its parish church dedicated to Saint-George. Today, the castle lies in the heart of the town, having been restored to its pride of place, and has become an essential cultural venue, housing none other than the Museum of Normandy, the Rampart Rooms and the Musee des Beaux-Arts which draw art and history lovers from across the world.

Wallingford K. S. B. Keats-Rohan, Neil Christie, David Roffe, 2015 Medieval castles are, as Professor Liddiard states in his Foreword to this volume, 'evocative monuments and perhaps more than any other building capture the ideals of the Middle Ages.' This idealization and romanticism of castles, however, can often obscure their histories as functioning dwellings,

fortresses, and political and social centres. Wallingford Castle in Oxfordshire is a prime example of a structure with a rich history. Its importance lies in its strategic position on the Thames, allowing it to serve as a vital stronghold during conflicts and a royal residence in more peaceful times. This volume is a product of the Wallingford Burh to Borough Research Project (2008-2010), a collaborative project between the Universities of Leicester, Exeter and Oxford. It contains reports of excavations undertaken at the castle and its town, excavated between the 1960s and today. The results of the archaeological investigations are contextualized using contemporary documents and accounts of the castle, such as surveys and rent agreements. Combining the text and material evidence, the contributions to this volume provide a detailed narrative of the history of the site from its construction to its destruction, as well as helpful contextual sections on English history and medieval castles. Also included are sections on excavations at the castle at the nearby town of Oxford and the priory at Wallingford. The text is accompanied by colour photographs, drawings, plans, maps, and transcripts of the Medieval and Tudor documents. This volume accompanies 'The Origins of the Borough of Wallingford: Archaeological and historical perspectives', edited by K. S. B. Keats-Rohan and D. R. Roffe in 2009, (BAR 494), and 'Transforming Townscapes: From burh to borough: the archaeology of Wallingford, AD 800-1400' edited by N. Christie and O. H. Creighton in 2013 published by the Society for Medieval Archaeology.

But when a mysterious stranger walks through their door, their lives change forever. Jennee and Jacob soon learn they are from Pontint, an otherworldly dimension. Otterburn 1388 Peter Armstrong, 2013-01-20 In his *Chronicles*, Froissart describes Otterburn as 'the best fought and the most severe' battle of his time. Fought at Redesdale in Northumberland in August 1388, the battle originated from the ongoing war between the Scots and the English following Robert Bruce's victory over the English at Bannockburn in 1314. Using all the contemporary sources, this book details the events that led up to the clash on the borders, examines the opposing armies, their weaponry and their commanders – including the Douglasses on the Scots side and the Percys on the English – and gives a full account of the battle and its aftermath.

Holiness on the Move: Mobility and Space in Byzantine Hagiography Mihail Mitrea, 2022-12-30 Holiness on the Move: Mobility and Space in Byzantine Hagiography explores the literary, religious, and social functions of monastic mobility in Byzantine hagiography, touching on aspects of space, narrative, and identity. The ten chapters included in this volume highlight the multifaceted and rich nature of travel narratives, exploring topics such

as authorship and audience, narrative structure and function, identity-making and practicalities of and discourse on travel. In terms of geographical span, the case studies cover Constantinople and its hinterland, Asia Minor, mainland Greece, Trebizond, the Balkans, and southern Italy and range chronologically from the end of the sixth to the fourteenth century. The contributions offer novel insights and perspectives on the importance of mobility in the literary construction of holiness in the Byzantine world and the wider medieval Mediterranean, the spatial dimension of sacred mobility, and the ways in which mobility is employed in the narrative construction of hagiographical texts. As such, the volume joins the burgeoning research on sacred mobilities and will interest students and scholars of Byzantine and medieval literature, religion, and history, as well as a wider readership with an interest in the study of space and mobility.

King Edgar Alan Reed, 2015-12-01 In 1124, the little church near Edinburgh, Scotland, would celebrate its first Christmas. Edgar, the former king of England, would be there! Outside the church, the trees were barren of leaves; a misty, cold rain formed ice among the branches. Inside the church, it was cozy and warm. A lively conversation would ensue. King Edgar had a lifetime of experience to share. What would he show us?
