Books IV-VI Ludger Hovestadt,2022-12-31 Abhandlung zur digitalen Architektur Hovestadts Traktat folgt strikt den Linien der bekannten Abhandlungen von Vitruv und Alberti, in der Annahme, dass wir uns heute wieder in einer ähnlichen Konstellation befinden. Vitruv und Alberti brachten zum Ausdruck, was Architektur in ihrer Epoche bedeutete: die römische Antike und die Renaissance. Hovestadt formuliert sie nun in den heutigen Begriffen der Physik, Mathematik, Technologie, Literatur und Philosophie neu. Die Bücher I bis III befassen sich mit der Rolle des Architekten und der Objektivität der Architektur. Die Bücher IV bis VI thematisieren die Modalitäten des Sprechens und der Kodierung von Architektur: das Geheime, das Öffentliche und das Private. Die Bücher VII bis X widmen sich den eigentlichen digitalen Mechanismen: künstlicher Intelligenz, natürlicher Kommunikation, Gnomonik und kulturellem Erbe. Ein Architekturtraktat unserer Zeit in 10 Büchern Nach dem Vorbild von Vitruv und Alberti Erscheint in drei Bänden der Reihe Applied Virtuality Book Series, Bd. 19, 20 und 21

Atheism Julian Baggini,2009 Is a life without religion one without values or purpose? Julian Baggini emphatically says no. He sets out to dispel the myths surrounding atheism and to show how it can be both a meaningful and moral choice. He directly confronts the failure of officially atheist states in the twentieth century, and presents an intellectual case for atheism that rests as much on reasoned and positive arguments for its truth as on negative arguments against religion.

Business Practice in Socialist Hungary, Volume 1 Philip Scranton,2022-01-29 This study aims to reconstruct the activities of enterprises and individuals over two decades in one developing country (Hungary), within and across four politico-economic domains (agriculture, infrastructure/construction, commerce, and manufacturing), from the initial Stalinist obsession with heavy industry (Volume 1: Creating the Theft Economy, 1945-1957) through later reforms paying greater attention to profitable farming and the provision of abundant consumer goods (Volume 2: From Chaos to Contradiction, 1957-1972, forthcoming 2023). It provides hundreds of grounded, granular stories for reflection, as reported by actors and direct observers, ranging from innovation and improvisation to obstruction, failure, and fraud. Further, it offers an otherwise-unobtainable close encounter with another world, familiar in some respects while amazingly peculiar in others. The social history of enterprise and work in postwar Central European nations “building socialism” has long been underdeveloped. Through extensive macro-level research on planning and policy in Hungary, Poland, Czechoslovakia, and other Bloc countries, a grand narrative has been framed: reconstruction and breakneck industrialization under Soviet tutelage; then eventual mismanagement, stagnation and crisis, leading to collapse. This book seeks to explore what socialism actually looked like to those sustaining (or enduring} it as they faced forward into an unknowable future, to assess how and where it did (or didn't) work, and to recount how ordinary people responded to its opportunities and constraints. This study will appeal to readers interested in understanding how businesses worked day-to-day in a planned economy, how enterprise practices and technological strategies shifted during the first postwar generation, how novice managers and technicians emerged during rapid industrialization, how peasants learned to farm cooperatively, how organizations improvised and adapted, how political purity and practical expertise contended for control, and how the controversies and convulsions of the postwar decades shaped a deeply flawed project to “build socialism.”

Caucasian Albania Jost Gippert,Jasmine Dum-Tragut,2023-06-19 By consequence of the Karabakh War in 2020 and due to Azerbaijani revisionism concerning the history, culture and cultural monuments of the region, the discussion on Caucasian Albania, which is little known in the West in both academic and public circles, has been reignited. The handbook provides an overview of the current state of research on the Caucasian Albanians in an objective, scientifically sound manner. The contributions are not necessarily intended to reveal new scientific findings but rather to summarise approved knowledge. The volume brings together internationally renowned scholars, researchers and practitioners from various fields of studies reporting on and reviewing the state of research concerning the Caucasian Albanians, their history and archaeology, their language and written monuments, their religion, church history and their art, including their relation to the Udi people of today. The companion is intended to neutrally introduce the readership to the subject of Caucasian Albania from various perspectives.

Tales Written by the Dying in Awe Vysheslav Filevsky,2018-06-15 This book is by a Russian-speaking Brazilian author and contains short stories and fairy tales for adults. They are about the grace of love and awe of the Great Inconceivable and its creation. They are also about the way that consciously fostering these two ideas could create a universal world religion of consensual reconciliation. But who on earth earnestly wants that?

Visual proficiency - A perspective on art education Kunibert Bering,Rolf Niehoff,2015-12-18 Every day, over a million images are uploaded to flickr. This is a striking example of the so-called »flood« of images that emerged with the beginning of the digital age. A generation of adolescents has already been socialised with this flood of images and deals with it on a daily basis, both in their networks and elsewhere. Art education thus faces significant challenges: art is the only school subject that deals with the problems inherent in images as images, making them the focus of pedagogic activity. This volume presents both the foundations for engaging with the phenomenon of the »image« in a competent and historically informed manner as well as the perspectives for art education that arise from these foundations. It is based upon the conviction that providing orientation in a world defined by images does not mean following solely a technocratic, functionalist or even neoliberal »concept of education«. Quite the contrary: »providing an orientation« for how to deal with images in a world that is dominated by them is a crucial part of the holistic development of young people's personalities. The volume's main focus lies upon the new functions taken on both by the image and by art more generally. It takes into account aspects of globalisation and participation and also includes more unusual views (often from a cross-media perspective) of art and its historical repertory, which even current image creation is unable to dispense with. The volume also deals extensively with architecture and the images it conveys.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man’s first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Estonia Emily Anderson, Michael Spilling, 2018-12-15 Estonia is known as the singing nation because its people sang their way to freedom. In 1991, masses of singing protesters secured this small Baltic nation's independence from the Soviet Union. For nearly a thousand years, Estonia was occupied by foreign powers, traded back and forth by its more powerful neighbors of Germany, Sweden, and Russia. In the nearly thirty years since its independence from the Soviet Union, Estonia has become an international leader in digital technology while continuing to grow its powerful musical traditions. Readers explore Estonia's history of courage, defiance, and imagination in this book, which features vibrant images, intriguing quotes, and surprising sidebars.

From the bicycle to the hybrid car, this book traces the most important transportation inventors and the inventions that made society what it is today.

Database and Image Processing Using Java GUI and Microsoft Access Vivian Siahaan, 2019-11-01 The book details how programmers and database professionals can develop Access-based Java GUI applications that involves database and image processing. This book will help you quickly write efficient, high-quality access-database-driven code with Java. It's an ideal way to begin, whether you're new to programming or a professional developer versed in other languages. The lessons in this book are a highly organized and well-indexed set of tutorials meant for students and programmers. Netbeans, a specific IDE (Integrated Development Environment) is used to create GUI (Graphical User Interface applications). The finished product is the reward, but the readers are fully engaged and enriched by the process. This kind of learning is often the focus of training. In this book, you will learn how to build from scratch two access database management systems using Java. In designing a GUI and as an IDE, you will make use of the NetBeans tool. In chapter one, you will create School database and six tables. In chapter two, you will study: Creating the initial three table projects in the school database: Teacher table, TClass table, and Subject table; Creating database configuration files; Creating a Java GUI for viewing and navigating the contents of each table; Creating a Java GUI for inserting and editing tables; and Creating a Java GUI to join and query the three tables. In chapter three, you will learn: Creating the main form to connect all forms; Creating a project will add three more tables to the school database: the Student table, the Parent table, and Tuition table; Creating a Java GUI to view and navigate the contents of each table; Creating a Java GUI for editing, inserting, and deleting records in each table; Creating a Java GUI to join and query the three tables and all six. In chapter four, you will study how to query the six tables. In chapter five, you will be taught how to create Crime database and its tables. In chapter six, you will be taught how to extract image features, utilizing BufferedImage class, in Java GUI. In chapter seven, you will be taught to create Java GUI to view, edit, insert, and delete Suspect table data. This table has eleven columns: suspect_id (primary key), suspect_name, birth_date, case_date, report_date, suspect_status, arrest_date, mother_name, address, telephone, and photo. In chapter eight, you will be taught to create Java GUI to view, edit, insert, and delete Feature_Extraction table data. This table has eight columns: feature_id (primary key), suspect_id (foreign key), feature1, feature2, feature3, feature4, feature5, and feature6. In chapter nine, you will add two tables: Police and Investigator. These two tables will later be joined to Suspect table through another table, Case_File, which will be built in the seventh chapter. The Police has six columns: police_id (primary key), location, city, province, telephone, and photo. The Investigator has eight columns: investigator_id (primary key), investigator_name, rank, birth_date, gender, address, telephone, and photo. Here, you will design a Java GUI to display, edit, fill, and delete data in both tables. In chapter ten, you will add two tables: Victim and Case_File. The Case_File table will connect four other tables: Suspect, Police, Investigator and Victim. The Victim table has nine columns: victim_id (primary key), victim_name, crime_type, birth_date, crime_date, gender, address, telephone, and photo. The Case_File has seven columns: case_file_id (primary key), suspect_id (foreign key), police_id (foreign key), investigator_id (foreign key), victim_id (foreign key), status, and description. Here, you will also design a Java GUI to display, edit, fill, and delete data in both tables.

Talking God in Society Ute E. Eisen, Heidrun Elisabeth Mader, 2021-01-18 Peter Lampe's work has covered a wide range of fields, the common denominator being his interest in contextualizing belief systems. Mirroring his multifaced work, the authors pursue his interest from different interdisciplinary angles, addressing the interdependence between religious expressions and their situations or contexts. The application of theoretical models to texts examples flanks the inspiring theoretical – epistemological and methodological – reflections. Studies in socio-economic and political history adjoin archaeological, epigraphic, papyrological and iconographic investigations. (Social-)psychological interpretations of texts complement rhetorical analyses. The hermeneutical reception of biblical materials in, for example, the Koran and Christian Chinese or Orthodox contexts, as well as in religious education and homiletics, rounds off the volumes.

Biomimetic Architecture and Its Role in Developing Sustainable, Regenerative, and Livable Cities Mohsen Aboulnaga, Samaa E. Helmy, 2022-09-01 This book focuses on understanding biomimetic architecture and its role as a sustainable design tool. It presents the role of biomimicry in mitigation and adaptation to climate change and examines how biomimetic architecture can provide healthy solutions to limit the spread of COVID-19 in buildings and cities. Coverage includes global examples of biomimetic approaches and buildings, an evaluation of the performance of biomimicry applications in architecture to illustrate best practices, and an exploration of how nature can offer inspiration in building design to conserve resources and save energy use as well as curb carbon emissions – a reaffirmed goal of COP 26 and an outcome of Glasgow Climate Pact. Finally, the book presents guidelines to enhance urban areas and healthier spaces in buildings to meet COVID-19 social distance regulations and beyond. Examines global applications of biomimicry in architecture; Highlights the importance of biomimicry in driving livability in cities and buildings; Explores the role of biomimetic architecture in mitigating climate change. “The line of argument developed is highly relevant to the present, in addition to being original and pertinent to research on urban

regeneration, especially in regard to the exploration of the use of biomimicry architecture in response to changing urban demands.” —Alessandra Battisti, Ph.D., Professor of Architecture, University of Rome La Sapienza-

Expressões Regulares - 5a edição Aurelio Marinho Jargas,2016-02-12 Você procura uma sigla em um texto longo, mas não lembra direito quais eram as letras. Só lembra que era uma sigla de quatro letras. Simples, procure por [A-Z]{4}. Revisando aquela tese de mestrado, você percebe que digitou errado o nome daquele pesquisador alemão famoso. E foram várias vezes. Escreveu Miller, Mueller e Müller, quando na verdade era Müller. Que tal corrigir todos de uma vez? Fácil, use a expressão M(i|ue|ü)ll?er. Que tal encontrar todas as palavras repetidas repetidas em seu texto? Ou garantir que há um espaço em branco após todas as vírgulas e os pontos finais? Se você é programador, seria bom validar dados em um único passo, não? Endereço de e-mail, número IP, telefone, data, CEP, CPF... Chega de percorrer vetores e fazer checagens na mão. Estes são exemplos de uso das Expressões Regulares, que servem para encontrar rapidamente trechos de texto informando apenas o seu formato. Ou ainda pesquisar textos com variações, erros ortográficos e muito mais! Visite o site do livro: www.piazinho.com.br

RegEx 2 Mario Canton,2018-01-06 Con l'esperienza fatta con la prima edizione si è deciso di integrare il testo con una guida più esemplificativa, in modo da poter accostare le espressioni regolari con un taglio più didattico. Si spera di aver ottenuto una maggiore semplicità di esposizione che renda meno ostico l'avvicinamento alle regex. In questa seconda edizione si sono anche prese in esame le varianti (flavours) più diffuse di motori per espressioni regolari, come quelle di editor (EditPad Pro e Lite, Emacs, MS Word, Notepad++, Libre/Apache/Open Office Writer, Vim), fogli di calcolo (Google Documenti – Fogli), database (MySQL, Oracle, PostgreSQL, SQLite), app e shell (Apache HTTPd, Awk, Find, Grep, Nginx, PowerGrep, PowerShell, Sed, ShellScript o Bash), linguaggi di programmazione [C, C++, Delphi, HTML5, Java (con Groovy), JavaScript/ActionScript (con XRegExp), .NET, Perl, PHP, Python, R, Ruby, Tcl, VBScript (Visual Basic), XML, XQuery e XPath, Xojo o Real Basic], librerie (vxRegex, POSIX Base, GNU, Reggex, PCRE) e tester (text2regex, VisualRegExp, Regex Coach, RegexPal, Regex101). Si presume che, anche se l'applicazione che si utilizza non è esplicitamente menzionata, probabilmente usi una variante che viene trattata sotto un'altra denominazione. In genere la maggior parte delle applicazioni sviluppate usano una delle varianti che sono state prese in esame, in quanto la maggior parte delle applicazioni vengono sviluppate utilizzando un ambiente di programmazione o delle librerie di espressioni regolari tra quelle considerate in questo ebook. Si è infine integrato la parte riepilogativa con ulteriori tabulati e quadri sinottici dei comandi e degli operatori (anche relativi alle diverse varianti) e aggiunto una breve appendice tecnica sugli automi finiti, l'algebra e i linguaggi regolari, che stanno alla base della «logica» delle regex. È stata riorganizzata la bibliografia per argomenti (trattazioni generali, Perl e regex, applicazioni specifiche, guide online e testi sulle correlazioni con gli automi a stati finiti).

RegEx3 Mario Canton,2018-06-20 Con l'esperienza fatta con la prima e la seconda edizione si è deciso di integrare il testo con una serie di esercitazioni pratiche assistite, ricche di esempi applicativi. Si è pensato – come si espone dettagliatamente nella parte che chiarisce le motivazioni dell'eBook – che quando tutto ciò che si vuole fare è ottenere la convalida dei propri file in HTML o semplicemente eseguire velocemente operazioni di sostituzione su un testo analizzato, se si ha bisogno di raggiungere velocemente uno scopo usando le espressioni regolari, ci si troverà divisi tra avere troppo poche informazioni per essere produttivi e avere troppe informazioni per sapere da dove cominciare. Perciò si è deciso di integrare l'esposizione con una nutrita serie di esercitazioni guidate, che espongono con criterio incrementale le modalità di utilizzo dei vari operatori, chiarendo con esempi pratici e visivamente immediati le modalità di funzionamento delle regex. Si spera che lo sforzo possa aver raggiunto lo scopo.
