Ron Suskind

*Gravitation and Spacetime* Hans C. Ohanian,Remo Ruffini,2013-04-08 This text provides a quantitative introduction to general relativity for advanced undergraduate and graduate students.

**The Way of the World** Ron Suskind,2013-03-28 From Pulitzer Prize-winning journalist and bestselling author Ron Suskind comes a startling look at how America and the West lost their way, and at the struggles of their respective governments to reclaim the moral authority on which their survival depends. From the White House to Downing Street, and from the fault-line countries of South Asia to the sands of Guantanamo, Suskind offers an astonishing story that connects world leaders to the forces waging today's shadow wars and to the next generation of global citizens. Tracking down truth and hope, Suskind delivers historic disclosures with this emotionally stirring and strikingly original portrait of the post 9-11 world.

**How to Make Bread** Emmanuel Hadjiandreou,2014-02-21 Today, people are rediscovering the joys of baking their own bread, not only as a cost-saving measure, but with the desire to go back to basics and enjoy making something rewarding. Emmanuel Hadjiandreou is passionate about bread and in this, his first book, he shows you how to make it, step by step. The book starts by explaining the key to good bread: why flour, yeast and temperature are important, and which kitchen equipment makes life easier. In Basic Breads, you'll learn how to make a Basic White Loaf with clear, step-by-step photos. With this method, you'll have the base for a number of variations. The rest of the book covers Wheat- or Gluten-free Breads, Sourdoughs, Flavoured Yeasted Breads, and Pastries and Morning Bakes - in more than 60 easy-to-follow recipes. Emmanuel Hadjiandreou has worked for Gordon Ramsay, Flour Power City Bakery, Daylesford Organic and Judges Bakery in Hastings. He currently teaches at The School Of Artisan Food in Nottinghamshire. His sourdough bread, stollen and other bread creations have won him several awards.

**Experimental and Quantitative Methods in Contemporary Economics** Kesra Nermend,Małgorzata Łatuszyńska,2019-10-12 Contemporary economists, when analyzing economic behavior of people, need to use the diversity of research methods and modern ways of discovering knowledge. The increasing popularity of using economic experiments requires the use of IT tools and quantitative methods that facilitate the analysis of the research material obtained as a result of the experiments and the formulation of correct conclusions. This proceedings volume presents problems in contemporary economics and provides innovative solutions using a range of quantitative and experimental tools. Featuring selected contributions presented at the 2018 Computational Methods in Experimental Economics Conference (CMEE 2018), this book provides a modern economic perspective on such important issues as: sustainable development, consumption, production, national wealth, the silver economy, behavioral finance, economic and non-economic factors determining the behavior of household members, consumer preferences, social campaigns, and neuromarketing. International case studies are also offered.

**Hypotensive Syndromes in Geriatric Patients** Kannayiram Alagiakrishnan,Maciej Banach,2019-12-30 As the Baby Boomers age, concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging. The increased life expectancy of the population since the early 1900s had been built on the improvement of living conditions, diet, public health and advancement in medical care. With this we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke and even dementia. In addition, societies worldwide struggle to develop a large enough workforce to treat aging patients, which forces geriatric patients to rely on physicians in a wide array of specialties that are often not trained for their demographic. These trends have created a tremendous need for trustworthy resources, yet with regard to hypotensive syndromes, nothing of this nature exists. Hypotensive syndromes represent a heterogenous group of disease states. Hypotensive syndromes are characterized by low blood pressure following postural changes, meals and neck turning. These are common conditions seen in the elderly and could be due to blood pressure dysregulation. These syndromes frequently cause dizziness, syncope and falls in the elderly as well as a resultant decrease in function, and they are frequently mistaken for other conditions. This is especially true among physicians who are not trained to consider the unique needs of an aging patient. The proposed book is designed to present a comprehensive approach to the management of hypotensive syndromes in the elderly. Currently there are no guidelines or good resource to guide about these conditions. This book will also discuss the challenges of diagnosis and management of these conditions. The text introduces the concepts to set a clear foundation before covering the syndromes as they present in other comorbidities, including diabetes, heart failure, and a wide array of serious conditions that are common in older patients. As the Baby Boomers continue to age, this text will prove a vital resource for a wide array of specialties that will be increasingly critical to meeting their needs.
