A House That Once Was Julie Fogliano,2018-05-01 A New York Times Best Illustrated book! A Boston Globe Best Children's Book of 2018 "Accompanied by Lane's evocative art that suggests layers of history, Fogliano's story turns this childhood scenario into a radiant poem about the mysteries of other people and the wonderfulness of home." —New York Times Deep in the woods is a house just a house that once was but now isn't a home. Who lived in that house? Who walked down its hallways? Why did they leave it, and where did they go? Two children set off to find the answers by piecing together clues found, books left behind, forgotten photos, and discarded toys, creating their own vision of those who came before, in this deeply moving tale of imagination by Ezra Jack Keats Award–winning author Julie Fogliano and Caldecott Award–winning illustrator Lane Smith.

Flash 8: Projects for Learning Animation and Interactivity Rich Shupe,Robert Hoekman, Jr.,2006-03-28 Macromedia Flash is fast becoming the Web's most widely used platform for creating rich media with animation and motion graphics, but mastering Flash isn't easy. Most entry-level books teach through simple examples that concentrate on either animation or scripting, but rarely both together. To get the most from Flash 8, you

not only need to be proficient in programming/interface design, you need the creativity for story telling and the artistic insights to design fluid animation. Flash 8: Projects for Learning Animation and Interactivity teaches Flash design rather than simply Flash itself. With a standalone series of walkthroughs and tutorials for Flash beginners coming from a graphics field, this book teaches Flash in the context of real-world projects. Rather than learn a Flash tool for the sake of it, you learn which areas of Flash are important, and which are less used, simply by seeing how typical content is actually created. And rather than a text-heavy approach, this graphically rich book leads you through hands-on examples by illustration. Each project in the book starts with goals and broad sketches before moving to design and scripting. This helps you understand design intent-the why of the process-rather than just learning the interfaces and the how of it all. Along the way, you'll create Flash content that includes traditional animation techniques (as seen in full-length animated features), and ActionScript-based interactive animation, such as custom web site interface designs. You also learn how to combine both traditional animation techniques and ActionScript to create feature-rich Flash assets from the ground up. Co-authored by educational developers with years of experience creating compelling content, interfaces, and applications, Flash 8: Projects for Learning Animation and Interactivity offers a content-driven approach that is also inspiration-driven. You learn because you're accomplishing something tangible, not because you think you need to know how a tool works. If you want to understand how various features of Flash come together to create a final end design, this book provides you with both the insight and the know-how.

Affordable Honeycomb Housing Mazlin Ghazali,2019-05-09 As cities grow, land becomes scarcer and dearer. In Malaysia, terrace houses in the cities and suburbs are already out of the financial reach of most people. They must make do with high-rise housing, but even these are increasingly expensive. With increasing prosperity, car-ownership spirals, congesting main arteries, dominating neighbourhood streets and discouraging other activities - walking, cycling, children's outdoor play, and casual social interaction – making low-rise neighbourhoods less vibrant. As for high-rise housing, it has always been associated with social ills. Is this trend of homes becoming less affordable and neighbourhoods becoming more sterile inevitable? Are there any design alternatives to terrace houses and high-rise blocks that can make housing socially better and affordable? This book offers the optimistic prospect that courtyard homes - with private and shared gardens in front of them – can create an environment is that more community-friendly. That these courtyard neighbourhoods can be created in both low-rise as well as high-rise situations. That these houses and neighbourhoods can be designed in a cost-efficient way so that these courtyard homes can be affordable to as many as possible. Pie in the sky? Not quite… Several affordable low-rise projects have already been completed or are in the pipeline. We are also working to commercialize our R&D that extend the ideas first developed for low-rise to various types of high-rise housing projects.
