The Japanese Submarine Force and World War II Akihiko Yoshida, 2013-01-15 When first published in 1995, this book was hailed as an absolutely indispensable contribution to the history of the Pacific War. Drawing heavily from Japanese sources and American wartime intercepts of secret Japanese radio messages, a noted American naval historian and a Japanese mariner painstakingly recorded and evaluated a diverse array of material about Japan's submarines in World War II. The study begins with the development of the first Japanese 103-ton Holland-type submersible craft in 1905 and continues through the 1945 surrender of the largest submarine in the world at the time, the 5300-ton I-400 class that carried three airplanes. Submarine weapons, equipment, personnel, and shore support systems are discussed first in the context of Japanese naval preparations for war and later during the war. Both successes and missed opportunities are analyzed in operations ranging from the California coast through the Pacific and Indian Oceans to the coast of German-occupied France. Appendixes include lists of Japanese submarine losses and the biographies of key Japanese submarine officers. Rare illustrations and specifically commissioned operational maps enhance the text.

Sunk: The Story Of The Japanese Submarine Fleet 1941-1945 Lt.-Com. Mochitsura Hashimoto, 2015-11-06 What happened to Japan's submarines and what sort of fight did they put up? As far as Japan was concerned, the recent war was waged according to a rigid strategy. There was no detailed operational planning. It was a fight in which science had been ignored. In such circumstances the submarine, always highly vulnerable unless used intelligently, was inevitably sacrificed. Throughout the war the whole submarine fleet was in reality a special attack force in which, in the absence of scientific weapons, the crews were just so much human ammunition. Today we hear much about rearmament. If money is to be spent on armaments, it should be used for scientific development. Never again must we go to war with only a bamboo lance. The Japanese Submarine Fleet was entirely wiped out, but the martial spirits of its sailors are still with us on the far-flung oceans. In the Pacific, the Indian Ocean, and the Atlantic we remember the multitude of resentful sleeping warriors; in our ears we hear the whisper of the "voice from the bottom of the sea." Thus, as one of the few submarine captains to survive, I have taken up my pen to try to record something of the unknown hardships and successes of our submarines. "Despite the gloomy conditions under which they worked, our submarines fought well, and the grim story of Japanese submarine units has been well recorded by former Lieutenant Commander Hashimoto. "It is certainly valuable material, and I wish to recommend it as an excellent history."—S. Toyoda, Former C.-in-C., Combined Fleet, IJN

Operation Rising Sun David W. Jourdan, James P. Delgado, 2020-06-01 In 1944 Allied codebreakers learned the Imperial Japanese Navy had dispatched the cargo submarine I-52 to occupied France with tons of military supplies and payment—in gold—for German assistance. I-52 undertook the mission as part of the Yanagi missions, a military program meant to alleviate Japan's desperate need for military material and technical knowledge. After tracking I-52 from Asia to the Atlantic, the Allies destroyed the vessel in a battle that ended the Yanagi missions and left I-52 an unlikely treasure ship on the seafloor. David W. Jourdan adds to the history of I-52 with a spellbinding account of his efforts to find the sunken submarine. One of the first joint American-Russian research expeditions, the search for the wreck combined a team effort, exhaustive detective work, and a dramatic battle with the sea. The effort paid off when the group found I-52's nearly intact hull three miles down. The expedition also earned an unexpected historical dividend when it uncovered one-of-a-kind recordings of American Avenger torpedo bomber attacks on an enemy submarine. Part war tale and part seagoing adventure, Operation Rising Sun tells the story of the two very different missions to find submarine I-52.

Imperial Japanese Navy Submarines 1941–45 Mark Stille, 2012-06-20 During World War II the Imperial Japanese Navy was at the forefront of submarine technology. It fielded the largest pre-nuclear submarines in the world, some capable of carrying floatplane bombers, which operated alongside fast combat vessels and midget submarines, all equipped with the best torpedoes available. The Japanese submarine fleet should have been an awe-inspiring force but, despite playing a crucial scouting role and enjoying several notable successes, it was surprisingly ineffective. Using unique color plates, Mark Stille describes the astounding technical advances of this range of vessels, and the wartime tactics responsible for their failure.

Operation Storm John Geoghegan, 2014-03-18 The riveting true story of Japan's top secret plan to change the course of World War II using a squadron of mammoth submarines a generation ahead of their time In 1941, the architects of Japan's sneak attack on Pearl Harbor planned a bold follow-up: a potentially devastating air raid—this time against New York City and Washington, DC. The classified Japanese program required developing a squadron of top secret submarines—the Sen-toku or I-400 class—designed as underwater aircraft carriers, each equipped with three Aichi M6A1 attack bombers painted to look like U.S. aircraft. The bombers, called Seiran (which translates as "storm from a clear sky"), were tucked in a huge, water-tight hanger on the sub's deck. The subs' mission was to travel more than halfway around the world, surface on the U.S. coast, and launch their deadly air attack. This entire operation was unknown to U.S. intelligence. And the amazing thing is how close the Japanese came to pulling it off. John Geoghegan's meticulous research, including first-person accounts from the I-401 crew and the U.S. capturing party, creates a fascinating portrait of the Sen-toku's desperate push into Allied waters and the U.S. Navy's dramatic pursuit, masterfully illuminating a previously forgotten story of the Pacific war.

Japanese Submarine Losses to Allied Submarines in World War II Vernon J. Miller, 1999-07

Operating Below Crush Depth: LCDR David W. Grogan USN, 2015-11-06 Prior to entering World War II, the Japanese Navy did a considerable planning and force development in preparation for a single "decisive battle" with the American fleet. The Japanese submarine force entered the war with highly trained crews operating some of the most capable submarines in the world. Even so, they accomplished little. This study will analyze the genesis and evolution of the technological basis of the Japanese submarine fleet before and during the war. Along with the technological evolution, it will also review the strategic and tactical evolution of the force. It will further analyze the employment of submarines as they apply to two major forms of naval warfare: guerre de course and

guerre de main. While the entire study will use comparison with the American and German, the majority of the focus will be on the unique aspects of the Japanese employment of their submarines. These analyses will answer whether the Japanese submarine force would have been capable of influencing the results of major battles and the overall campaign in the Pacific Ocean. Could the Japanese submarine force have influenced the result of the war allowing it to end with a more favorable outcome for the Japanese?

Midway Submerged Mark W Allen, 2023-04-20 Most books gloss over submarines at Midway and, if they are mentioned at all, conclude they failed miserably and had little impact on the outcome of the battle. It is undeniable that carrier aviation and intelligence saved the day, but the role of the submarine was an important one in defense of an anticipated amphibious assault. *Midway Submerged* is a comprehensive examination of a little-known aspect of this pivotal naval battle, explaining how Nimitz used his submarines at Midway, and the Japanese misused theirs based on a flawed tactical plan. Based on in-depth archival research not only into the battle itself, but also submarine design and construction, and tactical and operational doctrine for both the United States and Japan, it brings a whole new dimension to the discussion of the battle of Midway. It examines the intended role of the submarine in the plans and doctrine of both navies, and what the submarines were expected to accomplish for both fleets during the battle, before assessing the actual accomplishments, successes, and failures of the submarine forces on both sides. Of particular importance, the book offers an analysis of how well these vessels fulfilled the expectations placed on them by their respective naval planners, concluding that submarines played a more important role in the outcome than has been previously understood.

Submarines of the Imperial Japanese Navy Dorr Carpenter, Norman Polmar, 1986

Battleground Atlantic Richard N. Billings, 2006-04-04 The true story of a German-Japanese scheme to turn much of America into a radioactive wasteland. In the early hours of June 24, 1944, U.S. Navy warplanes patrolling the Atlantic attacked a Japanese submarine known as the I-52. But this was more than the sinking of one more enemy warship. It was an event of enormous strategic importance. For the I-52's mission was to return to Japan with the lethal ingredients of a doomsday weapon—the radiological bomb—which remained a government secret for years. The I-52's resting place—18,000 feet below the surface of the mid-Atlantic—became public in 1995, when discovered by ship salvager Paul Tidwell. Author Richard N. Billings has worked with Tidwell—whose attempts to salvage the I-52's precious gold cargo continue—in bringing her secret mission to light. This is also the story of how the I-52 mission may have influenced President Truman's decision to drop atomic bombs on Hiroshima and Nagasaki, thereby saving the United States from a similar fate.

Clear the Bridge! Dive! Dive! Antonino d'Este, 2010-08-09 Come back in time and step aboard a fleet submarine as she prepares to go on a war patrol. You will learn how a submarine works and fights.

Kaiten Michael Mair, Joy Waldron, 2014-05-06 In November 1944, the U.S. Navy fleet lay at anchor deep in the Pacific Ocean, when the oiler USS *Mississinewa* exploded. Japan's secret weapon, the Kaiten—a manned suicide submarine—had succeeded in its first mission. The Kaiten was so secret that even Japanese naval commanders didn't know of its existence. And the Americans kept it secret as well. Embarrassed by the attack, the U.S. Navy refused to salvage the sunken *Mighty Miss*. Not until 2001, when a diving team located the wreck, would survivors learn what really happened. In *Kaiten*, Michael Mair and Joy Waldron tell the full story, from newly revealed secrets of the Kaiten development and training schools to gripping firsthand accounts of U.S. Navy survivors in the wake of the attack, as well as the harrowing recovery efforts that came later. Leader of the Pack Mark W. Allen, 2011-05 *Leader of the Pack* recounts the incredible history of USS *Batfish*, a record-setting American World War II fleet submarine. *Batfish* entered the pantheon of military lore during its famous sixth patrol in February 1945, where it sank a record three Japanese submarines in seventy-six hours. In addition to offering a rousing and meticulously researched account of the famous sixth patrol, author and military historian Mark W. Allen unravels a nautical mystery that had gone unresolved for over sixty years: the identity of the first Japanese submarine sunk by *Batfish* skipper John K. Fyfe. Controversy has surrounded the identity of the first submarine almost since the day of the sinking, but *Leader of the Pack*, through a diligent recreation of the events that unfolded in the days leading up to the sixth patrol, solves the mystery once and for all. Lastly, Allen shares a personal story, never told before in such detail, of *Batfish*'s rescue of three downed aviators who were forced to ditch their B-25 Mitchell bomber after it was hit by enemy anti-aircraft fire during a bombing mission on the Japanese homeland.

Torpedoes Away! Maxwell Hawkins, 2018-11-16 *Torpedoes Away!* details US Navy submarine operations during the first 18 months of World War Two. Author Maxwell Hawkins breathlessly covers the tense, dangerous missions of submarines USS *Trout*, *Sea Raven*, *Pollack*, *Skipjack*, *Cuttlefish*, and others. Between these first-hand reports stitched-together from interviews with crewmen, Hawkins describes the mechanical workings of submarines, as well as the history of submersibles beginning in the 17th Century. He spent over a year sifting through the archives of the Navy Department and conducted extensive interviews with many veteran submariners about their experiences in the Pacific during World War Two. The result is a classic study of underwater warfare, a must read for military historians and World War 2 buffs.

The Depths of Courage Flint Whitlock, Ron Smith, 2008-11-04 Chosen by WWII History magazine as one of the Best Books of the Year. In the dark days after Pearl Harbor, the small, illequipped arm of the Navy known as Submarine Force would stand between the shattered U.S. Pacific Fleet and the might of the Japanese Navy. Unfortunately, the spirit and courage of the Submarine Force is being forgotten as the veterans of that force pass into history. To preserve their heroic tales of war beneath the sea, critically acclaimed author and military historian Flint Whitlock, in collaboration with decorated World War II submarine veteran Ron Smith, set out on a journey of more than two years to interview submariners and to record their accounts before the memories of their endeavors are lost forever. These are their stories.

Japanese Submarines in World War Two Terry C. Treadwell, TREADWELL C (TERRY.), 2022-04 The Imperial Japanese Navy developed the submarine faster than any other country in the world. But because of rivalries between the two military hierarchies, the Army and the Navy, they never utilized the submarine to its full extent. Nevertheless, during World War II, Japan deployed a number of unique submarines. These included the Type B1 which carried a Yokosuka E14Y1 reconnaissance seaplane in a watertight capsule attached to the deck of the submarine. One of these aircraft carried out two bomb attacks on a forest in Oregon by dropping six incendiary bombs, taking the war to the American mainland. The use of aircraft from submarines as scout planes proved not to be as successful as hoped, mainly because of the difficulty after launching the aircraft of it finding the submarine again in the vast Pacific and Indian Oceans. The Japanese also developed the giant I-400 class of aircraft carrier submarines, that

could launch three Seiran attack floatplanes. There were other notable actions involving IJN submarines. This included I-17 that attempted to shell, unsuccessfully, an oil refinery off the coast of Santa Barbara, causing a major panic along the West Coast of America. Also memorable are the midget submarines that attempted to attack Pearl Harbor, and the one-man human torpedo submarines (Kaiten). The submarine losses suffered by the Japanese Navy as the war progressed, when Allied, and in particular U.S. destroyers and aircraft hunted them down are all recorded in this comprehensive account of a fascinating element of the war at sea. notable actions involving IJN submarines. I-400 Henry Sakaida,Gary Nila,Koji Takaki,2006 The Japanese I-400 'super submarine' was one of the most monstrous creations of World War Two, designed with the intention of attacking American cities and destroying the Panama Canal. This book looks at the development of the I-400, as well as featuring the officers and crew who sailed on the massive craft.

The War Below James Scott,2013-05-14 The riveting story of the submarine force that helped win World War II by ravaging Japan's merchant fleet and destroying its economy. A dramatic account of extraordinary heroism, ingenuity, and perseverance--and the vital role American submarines played in winning the Pacific war.
