Whose Reality Counts? Robert Chambers, 1997 This book is a sequel to Rural development : putting the last first (AL. 1719, BRN 32006). It explores methods and approaches of participatory rural appraisal (PRA), which, because of its wide application, should, according to the author, be changed to participatory learning and action (PLA).

League of Denial Mark Fainaru-Wada, Steve Fainaru, 2014-08-26 NEW YORK TIMES BESTSELLER • The story of how the NFL, over a period of nearly two decades, denied and sought to cover up mounting evidence of the connection between football and brain damage “League of Denial may turn out to be the most influential sports-related book of our time.”—The Boston Globe “Professional football players do not sustain frequent repetitive blows to the brain on a regular basis.” So concluded the National Football League in a December 2005 scientific paper on concussions in America’s most popular sport. That judgment, implausible even to a casual fan, also contradicted the opinion of a growing cadre of neuroscientists who worked in vain to convince the NFL that it was facing a deadly new scourge: a chronic brain disease that was driving an alarming number of players—including some of the all-time greats—to madness. In *League of Denial*, award-winning ESPN investigative reporters Mark Fainaru-Wada and Steve Fainaru tell the story of a public health crisis that emerged from the playing fields of our twenty-first-century pastime. Everyone knows that football is violent and dangerous. But what the

players who built the NFL into a \$10 billion industry didn't know—and what the league sought to shield from them—is that no amount of padding could protect the human brain from the force generated by modern football, that the very essence of the game could be exposing these players to brain damage. In a fast-paced narrative that moves between the NFL trenches, America's research labs, and the boardrooms where the NFL went to war against science, League of Denial examines how the league used its power and resources to attack independent scientists and elevate its own flawed research—a campaign with echoes of Big Tobacco's fight to deny the connection between smoking and lung cancer. It chronicles the tragic fates of players like Hall of Fame Pittsburgh Steelers center Mike Webster, who was so disturbed at the time of his death he fantasized about shooting NFL executives, and former San Diego Chargers great Junior Seau, whose diseased brain became the target of an unseemly scientific battle between researchers and the NFL. Based on exclusive interviews, previously undisclosed documents, and private emails, this is the story of what the NFL knew and when it knew it—questions at the heart of a crisis that threatens football, from the highest levels all the way down to Pop Warner.

What Would Beyoncé Do?! Luisa Omielan, 2016-07-14

You know when you find yourself approaching thirty and your dreams are broken? You've got a temping career going nowhere, a student debt that's

mounting and you've just had to move back into your mum's house. Then to top it all off, you get absolutely annihilated with heartbreak because of an ex, who is just 'not ready' but then manages to be ready, a week later, with someone else. And it is here, at your lowest point, that one of your best friends decides to remind you that you are the same age as Beyoncé. FML. Luisa Omielan is a stand-up comedian who turned her life around after she answered the mantra every person needs in their life: What Would Beyoncé Do?! Hilariously funny, wonderfully uplifting and brutally honest, Luisa's memoir shows us all that there is no situation in which Bey can't save the day.

100 Acts of Minor Dissent Mark Thomas, 2015-06-25

100 Acts of Minor Dissent is a hilarious account of an entire year spent living provocatively. From successful campaigns against Royal Parks and multinationals, to arts and crafts with porn mags, from annoying estate agents, to raising cinema workers' wages, comedian and campaigner Mark Thomas stopped at nothing. The Acts were sometimes bold, sometimes surreal. Many brought about change and others were done for the sheer hell of it. Whether at the gates of the Saudi Arabian embassy or the checkout at Tesco - people reacted with laughter, shock, outrage and occasionally anger. Sometimes all of the above. 100 Acts of Minor Dissent makes for dangerously inspiring reading. Please note this is a fixed-format ebook with colour images and may not be well-suited for older e-readers.

The Essence of Research Methodology Jan Jonker, Bartjan Pennink, 2010-03-10 Methodology is the field which is indisputably complex. In the academic world, it is often said to be important, yet in everyday academic practice, it is not always treated accordingly. In teaching, methodology is often a mandatory course. Usually, it consists of learning how to adopt several common approaches when doing research, and how to conceive a research design (often leading to a survey). This usually leads to collecting data on a modest scale and – when the opportunity arises – analysing the data with the help of some statistics. Ask the students of their opinion at the end of such a course and they tend to heave a deep sigh of relief and say, “I have got through it.” Then their real courses start again, in which methodology often does not play a role at all. We are of the opinion that writing-off

methodology in this way is a real pity. It ignores the valuable role that methodology should play in academic teaching as a whole. Here, methodology is presented as a form of thinking and acting that, while obviously entailing research work, can also include the design and change of organisations. This broad approach has been purposefully chosen, as it is almost obvious from research and graduation projects that the students do not really have a clue what methodology involves and, therefore, wasting their time by producing work that has a little quality.

Histological Classification of Hematopoietic Tumors of Domestic Animals Victor E. Valli, 2002

Innovations in Narrative and Metaphor Sandy Farquhar, Esther Fitzpatrick, 2019-02-26 This book pursues an interdisciplinary approach to open a discourse on innovative methodologies and practices associated with narrative and metaphor. Scholars from diverse fields in the humanities and social sciences report on how they use narrative and/or metaphor in their scholarship/research to arrive at new ways of seeing, thinking about and acting in the world. The book provides a range of methodological chapters for academics and practitioners alike. Each chapter discusses various aspects of the author's transformative methodologies and practices and how they contribute to the lives of others in their field. In this regard, the authors address traditional disciplines such as history and geography, as well as professional practices such as counselling, teaching and community work.
