Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Perfect Fool Stewart Lee, 2013-09-19 "The Perfect Fool" charts the progress of a collection of misfits, spread across the wide open spaces of Arizona and the narrow streets of South London, all unwittingly caught up in a quest for the Holy Grail.

Mack The Life Lee Mack, 2012-09-27 'His book is a joy to read, full of homespun wisdom and hilarious asides' Independent
Where do comedians come from? Why is it that one person is a funny bloke down the pub while another actually makes a living by standing up in front of an audience

telling jokes? And where does all that material come from? Well, young Lee McKillop used to wonder that too. _____

Growing up in his parents' pub, small and wiry in a world of bigger and chunkier specimens, Lee quickly learned that cracking jokes was a way to get attention. After a somewhat random series of jobs, which included being Red Rum's stableboy and a bingo hall barman, it was as a Great Yarmouth holiday camp entertainer that he had his first crack at telling jokes on stage. It got him some laughs, the sack and a punch in the face.* Now, as Lee Mack, he's one of our best loved and most successful comedians, both as a live stand-up and on television. In *Mack the Life*, Lee tells the story of how he got there and gives extraordinary insight into what really makes comics tick. Hilarious and brilliant, it's the kind of book which reminds you why you learned to read in the first place. *Nearly.

Good and Cheap Leanne Brown, 2015-07-14 A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for *Good and Cheap* is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give

one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Shark Girl Kelly Bingham, 2011-04-26 A teenager struggles through physical loss to the start of acceptance in an absorbing, artful novel at once honest and insightful, wrenching and redemptive. (Age 12 and up) On a sunny day in June, at the beach with her mom and brother, fifteen-year-old Jane Arrowood went for a swim. And then everything -- absolutely everything -- changed. Now she's counting down the days until she returns to school with her fake arm, where she knows kids will whisper, That's her -- that's Shark Girl, as she passes. In the meantime there are only questions: Why did this happen? Why her? What about her art? What about her life? In this striking first novel, Kelly Bingham uses poems, letters, telephone conversations, and newspaper clippings to look unflinchingly at what it's like to lose part of yourself - and to summon the courage it takes to find yourself again.

Why It's OK to Love Bad Movies Matthew Strohl,2022-01-06 Most people are too busy to keep up with all the good movies they'd like to see, so why should anyone spend their precious time watching the bad ones? In *Why It's OK to Love Bad Movies*, philosopher and cinematic bottom feeder Matthew Strohl enthusiastically defends a fondness for disreputable films. Combining philosophy of art with film criticism, Strohl flips conventional notions of good and bad on their heads and makes

the case that the ultimate value of a work of art lies in what it can add to our lives. By this measure, some of the worst movies ever made are also among the best. Through detailed discussions of films such as *Troll 2*, *The Room*, *Batman & Robin*, *Twilight*, *Ninja III: The Domination*, and a significant portion of Nicolas Cage's filmography, Strohl argues that so-called bad movies are the ones that break the rules of the art form without the aura of artistic seriousness that surrounds the avant-garde. These movies may not win any awards, but they offer rich opportunities for creative engagement and enable the formation of lively fan communities, and they can be a key ingredient in a fulfilling aesthetic life. Key Features: Written in a humorous, approachable style, appealing to readers with no background in philosophy. Elaborates the rewards of loving bad movies, such as forming unlikely social bonds and developing refinement without narrowness. Discusses a wide range of beloved bad movies, including *Plan 9 from Outer Space*, *The Core*, *Battlefield Earth*, and *Freddy Got Fingered*. Contains the most extensive discussion of Nicolas Cage ever included in a philosophy book.

Los Angeles to New York James Sampson Meyer, Paige Rozanski, Virginia Dwan, 2016 This is the catalogue for an exhibition organized by the National Gallery of Art in Washington, DC, which explores the considerable contributions of Virginia Dwan and her legendary gallery to post-WWII American art. It is being carefully curated by Press author James Meyer. Founded by Virginia Dwan in 1959, the Dwan Gallery was a leading avant-garde space with locations in Los Angeles and New York, presenting the art of Franz Kline, Robert Rauschenberg, Claes Oldenburg, Sol LeWitt, and Robert Smithson, among others. Where the Los Angeles gallery featured abstract expressionism, neo-dada, and Pop, the New York branch reflected the emerging movements of minimalism, conceptualism, and land art. The activities of the Dwan Gallery transpired not just in and between Los Angeles, New York, and Paris, but also in the wilderness of

the American West, where Dwan fostered a new genre of art known as earthworks (land art). A keen follower of the Parisian art scene, Dwan also gave many nouveaux realistes such as Yves Klein their debut shows in the United States.

TECHNOCRATS OF THE IMAGINATION; ART, TECHNOLOGY, AND THE MILITARY-INDUSTRIAL AVANT-GARDE JOHN BECK; RYAN BISHOP., John Beck, 2020
TECHNOCRATS OF THE IMAGINATION traces the rise of collaborative art and technology labs in the U.S. from WWII to the present. Ryan Bishop and John Beck reveal the intertwined histories of the avant-garde art movement and the military-industrial complex, showing how radical pedagogical practices traveled from Germany's Bauhaus movement to the U.S. art world and interacted with government-funded military research and development in university laboratories. During the 1960s both media labs and studio labs leaned heavily on methods of interdisciplinary collaboration and the power of American modernity to model new modes of social organization. The book's chapters take up MIT's Center for Art, Science, and Technology, Bell Labs's E.A.T. (Experiments in Art and Technology) Salon, and Los Angeles Museum of Art's Art + Technology Program. Their interconnected history illuminates how much of contemporary media culture and aesthetics depends on the historical relationship between military, corporate, and university actors. In light of revived interest in Black Mountain College and other 1960s art and technology labs, this book draws important

connections between the contemporary art world and the militarized lab model of research that has dominated the sciences since the 1950s. The authors situate the rise of collaborative art and technology projects in the 1960s within John Dewey's ideology of scientific democracy, showing how leading thinkers from the Bauhaus movement in Germany immigrated to the U.S. and brought with them a Deweyan model for collaborative and interdisciplinary art and technology research. Over the course of the decade, the U.S. government increased funding to scientific research at university and private laboratories. Beck and Bishop investigate how various art and technology projects incorporated the collaborative and innovative interdisciplinarity of the avant-garde art movement with the corporate funding structure driven by the U.S. government's military and technoscientific interests. Finally, the authors consider the legacy of 1960s art and technology projects. During the 1970s and 80s, defense R&D funding was less motivated by a Cold War corporate state, and was instead restructured according to an entrepreneurial and neoliberal model. At the same time, funding in the art world also became increasingly financialized and globalized. Today's art and technology work happens collaboratively not because of an intellectual commitment to interdisciplinarity, but because of the precarity of the contemporary labor market. This book will interest students and scholars in art history and theory, media studies, history of technology, American studies, cultural studies, and critical university studies--

How I Escaped My Certain Fate Stewart Lee, 2010-08-19 Experience how it feels to be the subject of a blasphemy prosecution! Find out why 'wool' is a funny word! See how jokes work, their inner mechanisms revealed, before your astonished face! In 2001, after over a decade in the business, Stewart Lee quit stand-up, disillusioned and drained, and went off to direct a loss-making musical, *Jerry Springer: The Opera*. Nine years later, *How I Escaped My Certain Fate* details his return to live performance, and the journey that took him from an early retirement to his position as the most critically acclaimed stand-up in Britain, the winner of BAFTAs and British Comedy Awards, and the affirmation of being rated the 41st best stand up ever. Here is Stewart Lee's own account of his remarkable comeback, told through transcripts of the three legendary full-length shows

that sealed his reputation. Astonishingly frank and detailed in-depth notes reveal the inspiration and inner workings of his act. With unprecedented access to a leading comedian's creative process, this book tells us just what it was like to write these shows, develop the performance and take them on tour. How I Escaped My Certain Fate is everything we have come to expect from Stewart Lee: fiercely intelligent, unsparingly honest and very, very funny.

Spotify Teardown Maria Eriksson, Rasmus Fleischer, Anna Johansson, Pelle Snickars, Patrick Vonderau, 2019-02-19 An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience. Spotify provides a streaming service that has been welcomed as disrupting the world of music. Yet such disruption always comes at a price. Spotify Teardown contests the tired claim that digital culture thrives on disruption. Borrowing the notion of “teardown” from reverse-engineering processes, in this book a team of five researchers have playfully disassembled Spotify's product and the way it is commonly understood. Spotify has been hailed as the solution to illicit downloading, but it began as a partly illicit enterprise that grew out of the Swedish file-sharing community. Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation, raising questions about the ways in which such cultural content as songs, books, and films are now typically made available online. Spotify Teardown combines interviews, participant observations, and other analyses of Spotify's “front end” with experimental, covert investigations of its “back end.” The authors engaged in a series of interventions, which include establishing a record label for research purposes, intercepting network traffic with packet sniffers, and web-scraping corporate materials. The authors' innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use; the company later threatened their research funding. Thus,

the book itself became an intervention into the ethics and legal frameworks of corporate behavior.

Black Walden Elise Lemire, 2011-08-24 Concord, Massachusetts, has long been heralded as the birthplace of American liberty and American letters. It was here that the first military engagement of the Revolutionary War was fought and here that Thoreau came to live deliberately on the shores of Walden Pond. Between the Revolution and the settlement of the little cabin with the bean rows, however, Walden Woods was home to several generations of freed slaves and their children. Living on the fringes of society, they attempted to pursue lives of freedom, promised by the rhetoric of the Revolution, and yet withheld by the practice of racism. Thoreau was all but alone in his attempt to conjure up the former occupants of these woods. Other than the chapter he devoted to them in *Walden*, the history of slavery in Concord has been all but forgotten. In *Black Walden: Slavery and Its Aftermath in Concord, Massachusetts*, Elise Lemire brings to life the former slaves of Walden Woods and the men and women who held them in bondage during the eighteenth century. After charting the rise of Concord slaveholder John Cuming, *Black Walden* follows the struggles of Cuming's slave, Brister, as he attempts to build a life for himself after thirty-five years of enslavement. Brister Freeman, as he came to call himself, and other of the town's slaves were able to leverage the political tensions that fueled the American Revolution and force their owners into relinquishing them. Once emancipated, however, the former slaves were permitted to squat on only the most remote and infertile places. Walden Woods was one of them. Here, Freeman and his neighbors farmed, spun linen, made baskets, told fortunes, and otherwise tried to survive in spite of poverty and harassment. With a new preface that reflects on community developments since the hardcover's publication, *Black Walden* reminds us that this was a black space before it was an internationally known green space and preserves the legacy of

the people who strove against all odds to overcome slavery and segregation.

50 Years of Solar System Exploration Linda Billings, 2020 To commemorate the 50th anniversary of the first successful planetary mission, Mariner 2 sent to Venus in 1962, the NASA History Program Office, the Division of Space History at the National Air and Space Museum, NASA's Science Mission Directorate, and the Jet Propulsion Laboratory organized a symposium. Solar System Exploration @ 50 was held in Washington, D.C., on 25-26 October 2012. The purpose of this symposium was to consider, over the more than 50-year history of the Space Age, what we have learned about the other bodies of the solar system and the processes by which we have learned it. Symposium organizers asked authors to address broad topics relating to the history of solar system exploration such as various flight projects, the development of space science disciplines, the relationship between robotic exploration and human spaceflight, the development of instruments and methodologies for scientific exploration, as well as the development of theories about planetary science, solar system origins and implications for other worlds. The papers in this volume provide a richly textured picture of important developments - and some colorful characters - in a half century of solar system exploration. A comprehensive

history of the first 50 years of solar system exploration would fill many volumes. What readers will find in this volume is a collection of interesting stories about money, politics, human resources, commitment, competition and cooperation, and the faster, better, cheaper era of solar system exploration--
