Good Thinking David Robert Grimes,2021-03-30 Good Thinking is our best defense against anti-vaccine paranoia, climate denial, and other dire threats of today In our ever-more-polarized society, there's at least one thing we still agree on: The world is overrun with misinformation, faulty logic, and the gullible followers who buy into it all. Of course, we're not among them—are we? Scientist David Robert Grimes is on a mission to expose the logical fallacies and cognitive biases that drive our discourse on a dizzying array of topics—from vaccination to abortion, 9/11 conspiracy theories to dictatorial doublespeak, astrology to alternative medicine, and wrongful convictions to racism. But his purpose in Good Thinking isn't to shame or place blame. Rather, it's to interrogate our own assumptions—to develop our eye for the glimmer of truth in a vast sea of dubious sources—in short, to think critically. Grimes's expert takedown of irrationality is required reading for anyone wondering why bad thinking persists and how we can defeat it. Ultimately, no one changes anyone else's mind; we can only change our own—and give others the tools to do the same.

The Trouble with Science Robin Ian MacDonald Dunbar,1995 Robin Dunbar asks whether science really is unique to Western culture, even to humankind. He suggests that our trouble with science may lie in the fact that evolution has left our minds better able to cope with day-to-day social interaction than with the complexities of the external world.

A Room of One's Own Virginia Woolf,2023-03-07 A Room of One's Own is an essay written by Virginia Woolf. It was published in 1929 and is based on two lectures given by the author in 1928 at two colleges for women at Cambridge. In this famous essay, Woolf addressed the status of women, and women artists in particular. In this essay, the author also asserts that a woman must have money and a room of her own if she is to write. According to Woolf, women's creativity has been curtailed due to centuries of prejudice and financial and educational disadvantages. To emphasize her view, she offers the example of an imaginary gifted but uneducated sister of William Shakespeare, who, discouraged from all eventually kills herself. Woolf celebrates the work of women who have overcome that tradition and become writers, including Jane Austen, George Eliot, and the Brontë sisters, Anne, Charlotte, and Emily. In the final section Woolf suggests that great minds are neutral and argues that intellectual freedom requires financial freedom. The author entreats her audience to write not only fiction but poetry, criticism, and scholarly works as well.

Supernormal Meg Jay,2017-11-14 Clinical psychologist and author of The Defining Decade, Meg Jay takes us into the world of the supernormal: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only How do they do it? but also How does it feel? These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

Bibliomaniac Robin Ince,2022-10-06 ***A Waterstones Best Books of 2022 pick*** 'A unique, funny picture of Britain... A love letter to bookshops and the vagaries of public transport.' Richard Osman ' Ince's love of books is infectious.' 'Books of the Year', Independent Why play to 12,000 people when you can play to 12? In Autumn 2021, Robin Ince's stadium tour with Professor Brian Cox was postponed due to the pandemic. Rather than do nothing, he decided instead to go on a tour of over a hundred bookshops in the UK, from Wigtown to Penzance; from Swansea to Margate. Packed with witty anecdotes and tall tales, Bibliomaniac takes the reader on a journey across Britain as Robin explores his lifelong love of bookshops and books - and also tries to find out just why he can never have enough of them. It is the story of an addiction and a romance, and also of an occasional points failure just outside Oxenholme.

A Map of the Invisible Jon Butterworth,2017-10-05 A SUNDAY TIMES BOOK OF THE YEAR 'A magnificent, compelling and insightful voyage to the frontier of knowledge from a great writer with a deep understanding.' Brian Cox What is the universe really made of? How do we know? Follow the map of the invisible to find out... Over the last sixty years, scientists around the world have worked together to explore the fundamental constituents of matter, and the forces that govern their behaviour. The result, so far, is the 'Standard Model' of elementary particles: a theoretical map of the basic building blocks of the universe. With the discovery of the Higgs boson in 2012, the map as we know it was completed, but also extended into strange new territory. A Map of the Invisible is an explorer's guide to the Standard Model and the extraordinary realms of particle physics. After shrinking us down to the size of a sub-atomic particle, pioneering physicist Jon Butterworth takes us on board his research vessel for a journey in search of atoms and quarks, electrons and neutrinos, and the forces that shape the universe. Step by step, discovery by discovery, we journey into the world of the unseen, from the atom to black holes and dark matter, and beyond, to the outer reaches of the cosmos and the frontiers of human knowledge. Beautifully illustrated, with gradually evolving maps offering an inventive visual glossary as the journey progresses, A Map of the Invisible provides an essential introduction to our world, and to particle physics. It is a landmark work of non-fiction by one of the great scientists and science writers of today.

The Irrational Ape David Robert Grimes,2020-10-29 How critical thinking and scientific method can help us to make the right decisions and spot fake news.

Rutherford and Fry's Complete Guide to Absolutely Everything (Abridged) Adam Rutherford,Hannah Fry,2022-10-13 In Rutherford and Fry's comprehensive guidebook, they tell the complete story of the universe and absolutely everything in it - skipping over some of the boring parts. This is a celebration of the weirdness of the cosmos, the strangeness of humans and the fact that amid all the mess, we can somehow make sense of life. Our brains have evolved to tell us all sorts of things that feel intuitively right but just aren't true- the world looks flat, the stars seem fixed in the heavenly firmament, a day is 24 hours... This book is crammed full of tales of how stuff really works. With the power of science, Rutherford and Fry show us how to bypass our monkey-brains, taking us on a journey from the origin of time and space, via planets, galaxies, evolution, the dinosaurs, all the way into our minds, and wrestling with some truly head-scratching questions that only science can answer- What is time, and where does it come from? Why are animals the size and shape they are? What is a thought? How horoscopes work (Spoiler- they don't, but you think they do) Does my dog love me? Why nothing is truly round Do you need your eyes to see?
