A Visit from St. Nicholas Clement Clarke Moore,1921 A poem about the visit that Santa Claus pays to the children of the world during the night before every Christmas.

Merry Christmas, Santa Claus! J. L. Coppage,2018-10-16 It's Christmas Eve, and Santa's team has been busy--but even the folks at the North Pole need to celebrate! While Santa is away, everyone around the workshop pitches in to bring together a holiday celebration just in time for Santa's return. This cute, fun board book features tabs so readers can flip right to their favorite character. With bright, fun illustrations and bouncy, rhyming text, *Merry Christmas, Santa Claus!* is the perfect way to introduce the younger readers to the holiday spirit of the season!

The Santa Claus Book Alden Perkes,2000-06 A history of Santa and his elves.

Santa Claus Rod Green,2014-10-07 Come visit the magical world of Santa Claus This enchanting book whisks children to the North Pole. Kids can enjoy a glimpse of Santa's house; his workshop, where all the toys are built; Elf Village; and, of course, the mailroom, where all the letters from good girls and boys get sorted. Every secret is revealed, from how Santa chooses and trains his reindeer to how his sleigh spans the globe fast enough to bring gifts to everyone in time for Christmas morn.

Latkes for Santa Claus Janie Emaus,2020-10-13 To: Santa From: Anna My new dad and stepbrother celebrate Christmas, so you're coming to my house for the very first time. And I think you must be REALLY tired of cookies. I'm going to leave you the best Santa treat ever. Anna is excited that Santa will be visiting her house for the first time, and she wants to leave Santa a treat that blends the holidays her new family celebrates: Christmas and Hanukkah. She expresses this idea to her stepbrother, Michael, who insists that Santa doesn't need anything but his sugar cookies. Anna imagines Santa has to be bored with cookies by now and is determined to find a Jewish recipe that he'll enjoy. The catch? It has to be something easy for Santa to grab and go. It can't be matzo ball soup--soup in a sleigh with galloping reindeer will never do. It can't be noodle kugel--imagine that by the handful. What a mess! And as certain as Anna is that Santa would devour tzimmes, she knows he just doesn't have the time to sit and enjoy a hearty stew on Christmas Eve. Anna retreats to her thinking corner to figure out the perfect finger food for Santa, not wanting to disappoint him on his very first visit to her house. In this humorous and endearing picture book, blending both Christmas and Hannukah, a little girl and her stepbrother compete to leave Santa the best treats ever. *Latkes for Santa Claus* concludes with Anna and Michael's winning recipes, ready for children to replicate for Santa in their own kitchens.

The Santa Claus Man Alex Palmer,2015-10-01 The true story of John Duval Gluck, Jr., who in 1913 founded the Santa Claus Association, which had the sole authority to answer Santa's mail in

New York City. He ran the organization for 15 years, gaining fame for making the myth of Santa a reality to poor children by arranging for donors to deliver the toys they requested, until a crusading charity commissioner exposed Gluck as a fraud. The story is wide in scope, interweaving a phony Boy Scout group, kidnapping, stolen artwork, and appearances by the era's biggest stars and New York City's most famous landmarks. The book is both a personal story and a far-reaching historical one, tracing the history of Christmas celebration in America and the invention of Santa Claus.

We Are Data John Cheney-Lippold,2018-11-06 Algorithms are everywhere, organizing the near-limitless data that exists in our world. Drawing on our every search, like, click, and purchase, algorithms determine the news we get, the ads we see, the information accessible to us, and even who our friends are. These complex configurations not only form knowledge and social relationships in the digital and physical world but also determine who we are and who we can be. Algorithms use our

data to assign our gender, race, sexuality, and citizenship status. In this era of ubiquitous surveillance, contemporary data collection entails more than gathering information about us. Entities like Google, Facebook, and the NSA also decide what that information means, constructing our worlds and the identities we inhabit in the process. We have little control over who we algorithmically are. Through a series of entertaining and engaging examples, John Cheney-Lippold draws on the social constructions of identity to advance a new understanding of our algorithmic identities. We Are Data will educate and inspire readers who want to wrest back some freedom in our increasingly surveilled and algorithmically constructed world.--Page 4 of cover
