The Photo Ark Joel Sartore,2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

Waiting for a Warbler Sneed B. Collard III,2021-02-02 Short listed for the Green Earth book award In early April, as Owen and his sister search the hickories, oaks, and dogwoods for returning birds, a huge group of birds leaves the misty mountain slopes of the Yucatan peninsula for the 600-mile flight across the Gulf of Mexico to their summer nesting grounds. One of them is a Cerulean warbler. He will lose more than half his body weight even if the journey goes well. Aloft over the vast ocean, the birds encourage each other with squeaky chirps that say, "We are still alive. We can do this." Owen's family watches televised reports of a great storm over the Gulf of Mexico, fearing what it may mean for migrating songbirds. In alternating spreads, we wait and hope with Owen, then struggle through the storm with the warbler. This moving story with its hopeful ending appeals to us to preserve the things we love. The backmatter includes a North American bird migration map, birding information for kids, and guidance for how native plantings can transform yards into bird and wildlife habitat.

Booming Digital Stars Harsh Pamnani,Manish Pandey,2021-12-15 There are many books about becoming the CEO of a large corporation or a fast-

growing start-up. But not much has been written about creating and managing a single-person brand in an emerging Creator Economy. The size of this economy is humongous, and the available opportunities immense. However, in the crowded market of creators, the chances of getting lost are higher than those of getting noticed. If you want to be part of the Creator Economy, the lessons derived from the 11 journeys of India's leading Creators, covered in this book, will help you carve your niche and build a strong brand.

Citizen Bird Mabel Osgood Wright, Elliott Coues, 1897 This classic and widely influential work brings together the talents of the greatest American ornithologist of his generation (Coues), a pioneering nature writer/editor/ornithologist (Wright), and a young artist whose contribution to the American tradition of bird illustration proved to be second only to Audubon's own (Fuertes); this book features the first substantial body of his work. Directed at the general public, especially children, and written in an entertaining and fanciful fiction style, the work imparts solid scientific knowledge while inculcating conservation values. It exemplifies the extensive literature of popular yet scientifically-grounded ornithology which nurtured the national passion for birds in this era, thereby fostering some of conservationism's most vital and widespread grass roots. Women were particularly well-represented in this literature, often--like Wright--combining literary gifts with serious scientific knowledge (Wright was elected to membership in the American Ornithologists' Union) to bridge the widening gap between professional science and amateur nature-study, and often--as in this work--confirming contemporary expectations of gender roles by directing their writings particularly toward children.
