Architectonics of Game Spaces Andri Gerber, Ulrich Götz, 2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

Owning the Olympics Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities--including the Chinese Communist Party itself--seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. The Future of the Bamiyan Buddha Statues Masanori Nagaoka, 2020-12-07 This Open Access book explores heritage conservation ethics of post conflict and provides an important historical record of the possible reconstruction of the Bamiyan Buddha statues, which was inscribed in the UNESCO World Heritage List in Danger in 2003 as “Cultural Landscape and Archaeological Remains of the Bamiyan Valley”. With the condition that most surface of the original fragments of the Buddha statues were lost due to acts of deliberate destruction, this publication explores a reference point for conservation practitioners and policy makers around the world as they consider how to respond to on-going acts of destruction of cultural heritage. Whilst there has been an emerging debate to the ethics and nature of heritage reconstruction, this volume provides a plethora of ideas and approaches concerning the future treatment of the Bamiyan Buddha statues. It also addresses a number of fundamental questions on potential heritage reconstruction: how it will be done; who will decide; and what it should be done for. Moreover when it comes to the inscribed World Heritage properties, how can reconstructed heritage using non-original materials be considered to retain authenticity? With a view to serving as a precedent for potential decisions taken elsewhere in the world for cultural properties impacted by acts of violence and destruction, this volume introduces academic researches, experiences and observations of heritage conservation theory and practice of heritage reconstruction. It also addresses the issue not merely from the point of a material conservation philosophy but within the context of holistic strategies for the protection of human rights and promotion of peace building.

The Second Home Christina Clancy,2020-06-02 A novel of family and place and belonging. —Rebecca Makkai, Pulitzer Prize finalist Tender and suspenseful. —Chloe Benjamin, New York Times bestselling author Some places never leave you... After a disastrous summer spent at her family's home on Cape Cod when she is seventeen, Ann Gordon is very happy to never visit Wellfleet again. If only she'd stayed in Wisconsin, she might never have met Anthony Shaw, and she would have held onto the future she'd so carefully planned for herself. Instead, Ann ends up harboring a devastating secret that strains her relationship with her parents, sends her sister Poppy to every corner of the world chasing waves (and her next fling), and leaves her adopted brother Michael estranged from the family. Now, fifteen years later, her parents have died, and Ann and Poppy are left to decide the fate of the beach house that's been in the Gordon family for generations. For Ann, the once-beloved house is forever tainted with bad memories. And while Poppy loves the old saltbox on Drummer Cove, owning a house means settling, and she's not sure she's ready to stay in one place. Just when the sisters decide to sell, Michael re-enters their lives with a legitimate claim to a third of the estate. He wants the house. But more than that, he wants to set the record straight about what happened that long-ago summer that changed all of their lives forever. As the siblings reunite after years apart, their old secrets and lies, longings and losses, are pulled to the surface. Is the house the one thing that can still bring them together—or will it tear them apart, once and for all? Told through the shifting perspectives of Ann, Poppy, and Michael, this assured and affecting debut captures the ache of nostalgia for summers past and the powerful draw of the places we return to again and again. It is about second homes, second families, and second chances. Tender and compassionate, incisive and heartbreaking, *The Second Home* is the story of a family you'll quickly fall in love with, and won't soon forget.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Counterpoints Anti-Eviction Mapping Project,2021-08-03 Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

The Power of Stars Bryan E. Penprase,2017-05-05 Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular “Archaeoastronomy of Skyscrapers” section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.
