Introduction to Multicopter Design and Control Quan Quan,2017-06-23 This book is the first textbook specially on multicopter systems in the world. It provides a comprehensive overview of multicopter systems, rather than focusing on a single method or technique. The fifteen chapters are divided into five parts, covering the topics of multicopter design, modeling, state estimation, control, and decision-making. It differs from other books in the field in three major respects: it is basic and practical, offering self-contained content and presenting hands-on methods; it is comprehensive and systematic; and it is timely. It is also closely related to the autopilot that users often employ today and provides insights into the code employed. As such, it offers a valuable resource for anyone interested in multicopters, including students, teachers, researchers, and engineers. This introductory text is a welcome addition to the literature on multicopter design and control, on which the author is an acknowledged authority. The book is directed to advanced undergraduate and beginning graduate students in aeronautical and control (or electrical) engineering, as well as to multicopter designers and hobbyists. ----- Professor W. Murray Wonham, University of Toronto This is the single best introduction to multicopter control. Clear, comprehensive and progressing from basic principles to advanced techniques, it's a must read for anyone hoping to learn how to design flying robots. - ----- Chris Anderson, 3D Robotics CEO.

Art of the Cut Steve Hullfish,2017-02-24 Art of the Cut provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating virtual roundtable discussion with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a

hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (Mad Max: Fury Road), Tom Cross (Whiplash, La La Land), Pietro Scalia (The Martian, JFK), Stephen Mirrione (The Revenant), Ann Coates (Lawrence of Arabia, Murder on the Orient Express), Joe Walker (12 Years a Slave, Sicario), Kelley Dixon (Breaking Bad, The Walking Dead), and many more. Art of the Cut also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking for all fans of cinema. Predator Empire Ian G. R. Shaw, 2016-08-15 What does it mean for human beings to exist in an era of dronified state violence? How can we understand the rise of robotic systems of power and domination? Focusing on U.S. drone warfare and its broader implications as no other book has to date, Predator Empire argues that we are witnessing a transition from a labor-intensive "American empire" to a machine-intensive "Predator Empire." Moving from the Vietnam War to the War on Terror and beyond, Ian G. R. Shaw reveals how changes in military strategy, domestic policing, and state surveillance have come together to enclose our planet in a robotic system of control. The rise of drones presents a series of "existential crises," he suggests, that are reengineering not only spaces of violence but also the character of the modern state. Positioning drone warfare as part of a much longer project to watch and enclose the human species, he shows that for decades—centuries even—human existence has slowly but surely been brought within the artificial worlds of "technological civilization." Instead of incarcerating us in prisons or colonizing territory directly, the Predator Empire locks us inside a worldwide system of electromagnetic enclosure—in which democratic ideals give way to a system of totalitarian control, a machinic "rule by Nobody." As accessibly written as it is theoretically ambitious, Predator Empire provides up-to-date information about U.S. drone warfare, as well as an in-depth history of the rise of drones.

The Rosy Crucifixion: Sexus Henry Miller, 1987 The first book of a trilogy of novels known collectively as The Rosy Crucifixion. It is autobiographical and tells the story of Miller's first tempestuous marriage and his relentless sexual exploits in New York. The other books are Plexus and Nexus.

The Rings of Saturn W. G. Sebald, 2016-11-08 The book is like a dream you want to last forever (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund A masterwork of W. G. Sebald, now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's Anatomy Lesson, the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's The Emigrants (New Directions, 1996) was hailed by Susan Sontag as an astonishing masterpiece perfect while being unlike any book one has ever read. It was one of the great books of the last few years, noted Michael Ondaatje, who now acclaims The Rings of Saturn an even more inventive work than its predecessor, The Emigrants.

Unmanned Aircraft Systems in the Cyber Domain Randall Nichols, Hans Mumm, Wayne Lonstein, Julie Ryan, Candice Carter, John Paul Hood, 2019-07-26 Unmanned Aircraft Systems are an integral part of the US national critical infrastructure. The authors have endeavored to bring a

breadth and quality of information to the reader that is unparalleled in the unclassified sphere. This textbook will fully immerse and engage the reader / student in the cyber-security considerations of this rapidly emerging technology that we know as unmanned aircraft systems (UAS). The first edition topics covered National Airspace (NAS) policy issues, information security (INFOSEC), UAS vulnerabilities in key systems (Sense and Avoid / SCADA), navigation and collision avoidance systems, stealth design, intelligence, surveillance and reconnaissance (ISR) platforms; weapons systems security; electronic warfare considerations; data-links, jamming, operational vulnerabilities and still-emerging political scenarios that affect US military / commercial decisions. This second edition discusses state-of-the-art technology issues facing US UAS designers. It focuses on counter unmanned aircraft systems (C-UAS) - especially research designed to mitigate and terminate threats by SWARMS. Topics include high-altitude platforms (HAPS) for wireless communications; C-UAS and large scale threats; acoustic countermeasures against SWARMS and building an Identify Friend or Foe (IFF) acoustic library; updates to the legal / regulatory landscape; UAS proliferation along the Chinese New Silk Road Sea / Land routes; and ethics in this new age of autonomous systems and artificial intelligence (AI).

Deus Ex James Swallow, 2011-02-22 IT'S NOT THE END OF THE WORLD. BUT YOU CAN SEE IT FROM HERE. In the near future, with physical augmentation gaining ground and nano-cybernetics only years away, the dawn of limitless human evolution is just beyond the horizon, and a secret corporate cabal of ruthless men intends to make sure that humankind stays under its control. But two people on opposite sides of the world are starting to ask questions that could get them killed. Secret Service agent Anna Kelso has been suspended for investigating the shooting that claimed her partner's life. Anna suspects that the head of a bio-augmentation firm was the real target, and against orders she's turned up a few leads concerning a covert paramilitary force and a cadre of underground hackers. But the cover-up runs deep, and now there's a target on her back. Meanwhile, Ben Saxon, former SAS officer turned mercenary, joins a shadowy special ops outfit. They say they're a force for good, but Saxon quickly learns that the truth is not so clear-cut. So begins a dangerous quest to uncover a deadly secret that will take him from Moscow to London, D.C. to Geneva, and to the dark truth—if he lives that long. The year is 2027; in a world consumed by chaos and conspiracy, two people are set on a collision course with the most powerful and dangerous organization in history—and the fate of humanity hangs in the balance.

The DelFly G.C.H.E. de Croon, M. Perçin, B.D.W. Remes, R. Ruijsink, C. De Wagter, 2015-11-26 This book introduces the topics most relevant to autonomously flying flapping wing robots: flapping-wing design, aerodynamics, and artificial intelligence. Readers can explore these topics in the context of the DelFly, a flapping wing robot designed at Delft University in The Netherlands. How are tiny fruit flies able to lift their weight, avoid obstacles and predators, and find food or shelter? The first step in emulating this is the creation of a micro flapping wing robot that flies by itself. The challenges are considerable: the design and aerodynamics of flapping wings are still active areas of scientific research, whilst artificial intelligence is subject to extreme limitations deriving from the few sensors and minimal processing onboard. This book conveys the essential insights that lie behind success such as the DelFly Micro and the DelFly Explorer. The DelFly Micro, with its 3.07 grams and 10 cm wing span, is still the smallest flapping wing MAV in the world carrying a camera, whilst the DelFly Explorer is the world's first flapping wing MAV that is able to fly completely autonomously in unknown environments. The DelFly project started in 2005 and ever since has served as inspiration, not only to many scientific flapping wing studies, but also the design of flapping wing toys. The combination of introductions to relevant fields, practical insights and scientific experiments from the DelFly project make this book a must-read for all flapping wing enthusiasts, be they students, researchers, or engineers.

The Poem-book of the Gael Eleanor Hull, 1913

Indistinguishable from Magic David A. McIntee, 2011-03-29 The most talented Starfleet engineers of two generations unite to solve a two-hundred-year-old technological mystery that turns out to be only the beginning of a wider quest. With the support of Guinan and Nog, as well as the

crew of the U.S.S. Challenger, Geordi La Forge and Montgomery Scott soon find themselves drawn into a larger, deadlier, and far more personal adventure. Helped by old friends and hindered by old enemies, their investigation will come to threaten everything they hold dear. Seeking out the new, and going where no one has gone before, Geordi, Scotty, and Guinan find that their pasts are very much of the present, and must determine whether any sufficiently advanced technology is really indistinguishable from magic.

Grime Kids DJ Target, 2019-07-23 For fans of Wiley, Dizzee Rascal and Stormzy, Grime Kids is the definitive inside story of Grime. 'An essential read for anyone with the slightest interest in the birth of Grime' The Wire 'Sharp and nostalgic' The Observer A group of kids in the 90s had a dream to make their voice heard - and this book documents their seminal impact on today's pop culture. DJ Target grew up in Bow under the shadow of Canary Wharf, with money looming close on the skyline. The 'Godfather of Grime' Wiley and Dizzee Rascal first met each other in his bedroom. They were all just grime kids on the block back then, and didn't realise they were to become pioneers of an international music revolution. A movement that permeates deep into British culture and beyond. Household names were borne out of those housing estates, and the music industry now jumps to the beat of their gritty reality rather than the tune of glossy aspiration. Grime has shaken the world and Target is revealing its explosive and expansive journey in full, using his own unique insight and drawing on the input of grime's greatest names. What readers are saying about Grime Kids: 'Fantastic depiction of the inception of a genre that has spanned the millennium' 'Brilliant insight into grime music from one of the pioneers of the scene' 'This book really sums up the feeling of being a DJ perfectly'

Monolithic Undertow Harry Sword, 2022-04-19 An inspired and intuitive navigation of the drone continuum . . . with a compass firmly set to new and enlightening psychedelic truths-- BECK In 1977 Sniffin' Glue verbalised the musical zeitgeist with their infamous 'this is a chord; this is another; now form a band' illustration. The drone requires neither chord nor band, representing - via its infinite pliability and accessibility - the ultimate folk music: a potent audio tool of personal liberation. Immersion in hypnotic and repetitive sounds allows us to step outside of ourselves, be it chant, a 120dB beasting from Sunn O))), standing front of the system as Jah Shaka drops a fresh dub or going full headphone immersion with Hawkwind. These experiences are akin to an audio portal - a sound Tardis to silence the hum and fizz of the unceasing inner voice. The drone exists outside of us, but also - paradoxically - within us all; an aural expression of a universal hum we can only hope to fleetingly channel. Monolithic Undertow is the definitive text to explore the music of drone and its related genres. Exhaustively researched this tome will not leave music fans interested in drone, doom, metal, and folk music unsatisfied.
