Dark Nebulae, Dark Lanes, and Dust Belts Antony Cooke,2012-01-28 There are 'voids' obscuring all kinds of objects in the cosmos. Voids may be within an object, or between an object and us. Dark Nebulae, Dark Lanes, and Dust Lanes looks out into the deep sky at those apparent dark regions in space, which are among the most compelling telescopic destinations for amateur observers. One famous example is Barnard's dark nebulae - those striking dark clouds set against the background of stars in the Milky Way. But there are countless other less well known examples. These dark regions are often ignored altogether or commented upon only briefly in astronomy books, and it is all too easy to overlook the treasure trove they offer the observer. Dark Nebulae, Dark Lanes, and Dust Lanes is a great source of practical information for observers. Such voids may be successfully observed using conventional observing methods, but they are often far better seen with technologies such as light-pollution filters, CCD video cameras, and image intensifiers. This book explains the optimal ways to observe each object in detail.

Chronicling the Golden Age of Astronomy Neil English,2018-10-31 The invention of the telescope at the dawning of the 17th century has revolutionized humanity's understanding of the Universe and our place within it. This book traces the development of the telescope over four centuries, as well as the many personalities who used it to uncover brand-new revelations about the Sun, Moon, planets, stars and distant galaxies. Starting with early observers such as Thomas Harriot, Galileo, Johannes Hevelius, Giovanni Domenico Cassini, Robert Hooke and Christian Huygens, the book explores how these early observers arrived at essentially correct ideas concerning the objects they studied. Moving into the 18th and 19th centuries, the author describes the increasing sophistication of telescopes both large and small, and the celebrated figures who used them so productively, including the Herschels, Charles Messier, William Lassell and the Earls of Rosse. Many great discoveries were also made with smaller instruments when placed in the capable hands of the Struve dynasty, F.W. Bessel, Angelo

general heading of nebulae, and then instructs the reader in the best ways to successfully observe and record them. *Nebulae and How to Observe Them* is a comprehensive mine of information for all levels of amateur observers, from the beginner to the experienced.

Adrift Steven Callahan, 2002-10-17 Before The Perfect Storm, before In the Heart of the Sea, Steven Callahan's dramatic tale of survival at sea was on the New York Times bestseller list for more than thirty-six weeks. In some ways the model for the new wave of adventure books, *Adrift* is an undeniable seafaring classic, a riveting firsthand account by the only man known to have survived more than a month alone at sea, fighting for his life in an inflatable raft after his small sloop capsized only six days out. "Utterly absorbing" (Newsweek), *Adrift* is a must-have for any adventure library.

Go-To Telescopes Under Suburban Skies Neale Monks, 2010-09-14 *Go-To Telescopes Under Suburban Skies* is the first book specifically written for amateur astronomers who own, or who are about to purchase, a computer-controlled 'go-to' telescope. The advantage of the 'go-to' capability is enormous – the telescope can be aimed at any object in the sky with great speed and accuracy – which is why these instruments are so popular. Making the realistic assumption that the observer is using a relatively small telescope and is observing from a backyard in a suburban area, this book provides literally hundreds more targets beyond those offered by the built-in 'nightly tours' that feature on the telescope's computer tours. And instead of wasting many pages on maps and coordinates, it leads the computer to locate the targets, and so has room to suggest many more fascinating deep-sky objects and provide detailed observing lists and information about what's being viewed.

The Origin of Buddhist Meditation Alexander Wynne, 2007-04-16 Having identified early material that goes back to the Buddha himself, the author argues that the two teachers of the Buddha were historical figures. Based on the early Brahminic literature, namely the early Upanishads and

Moksadharma, the author asserts the origin of the method of meditation learned by the Buddha from these teachers, and attempts to use them to identify some authentic teachings of the Buddha on meditation. Stimulating debate within the field of Buddhist Studies, the following claims are put forward: the Buddha was taught by Alara Kalama and Uddaka Ramaputta, as stated in the literature of numerous early Buddhist sects, is historically authentic Alara Kalama and Uddaka Ramaputta taught a form of early Brahminic meditation the Buddha must consequently have been trained in a meditative school whose ideology was provided by the philosophical portions of early Upanishads Shedding new light on a fascinating aspect of the origins of Buddhism, this book will be of interest to academics in the field of Buddhist studies, Asian religion and South Asian studies.

Once Upon a Town Bob Greene,2009-03-17 In search of the best America there ever was, bestselling author and award-winning journalist Bob Greene finds it in a small Nebraska town few people pass through today—a town where Greene discovers the echoes of the most touching love story imaginable: a love story between a country and its sons. During World War II, American soldiers from every city and walk of life rolled through North Platte, Nebraska, on troop trains en route to their ultimate destinations in Europe and the Pacific. The tiny town, wanting to offer the servicemen warmth and support, transformed its modest railroad depot into the North Platte Canteen. Every day of the year, every day of the war, the Canteen—staffed and funded entirely by local volunteers—was open from five a.m. until the last troop train of the day pulled away after midnight. Astonishingly, this remote plains community of only 12,000 people provided welcoming words, friendship, and baskets of food and treats to more than six million GIs by the time the war ended. In this poignant and heartwarming eyewitness history, based on interviews with North Platte residents and the soldiers who once passed through, Bob Greene tells a classic, lost-in-the-mists-of-time American story of a grateful country honoring its brave and dedicated sons.
