Bastard Countryside Robin Friend, 2018-12-10 Bastard Countryside collects together 15 years worth of exploration within the British landscape, dwelling on what Victor Hugo called the 'bastard countryside': "somewhat ugly but bizarre, made up of two different natures". Friend's large-format colour images scrutinise these inbetween, unkempt, and often surreal marginal areas of the country, highlighting frictions between the pastoral sublime and the discarded, often polluted reality of the present. Starting from a classical landscape tradition, Friend's meticulous 5x4 photographs are given heightened effect through exaggerations of colour and composition, embodying a friction between British pastoral ideals and present reality. In particular, Friend follows moments in which the

expected narrative of the landscape is rudely interrupted: often through leakage, pollution, or the wreckage and containment of nature. In his accompanying essay, writer Robert Macfarlane describes *Bastard Countryside* as “a vision par excellence of our synthetic ‘modern nature’—produced by assemblage and entanglement rather than purity and distinction”. Contained within Friend’s photographs are “hard questions [...] about what kinds of landscape one might wish either to pass through or to live in; about what versions of ‘modern nature’ might be worth fighting for, and why.” - Publisher's website.

Creative Professional Photography Robin Perry, 1979

Trillions Robin Wigglesworth, 2021-10-12 From the Financial Times's global finance correspondent, the incredible true story of the iconoclastic geeks who defied conventional wisdom and endured Wall Street's scorn to launch the index fund revolution, democratizing investing and saving hundreds of billions of dollars in fees that would have otherwise lined fat cats' pockets. Fifty years ago, the Manhattan Project of money management was quietly assembled in the financial industry's backwaters, unified by the heretical idea that even many of the world's finest investors couldn't beat the market in the long run. The motley crew of nerds—including economist wunderkind Gene Fama, humiliated industry executive Jack Bogle, bull-headed and computer-obsessive John McQuown, and avuncular former WWII submariner Nate Most—succeeded beyond their wildest dreams. Passive investing now accounts for more than \$20 trillion, equal to the entire gross domestic product of the US, and is today a force reshaping markets, finance and even capitalism itself in myriad subtle but pivotal ways. Yet even some fans of index funds and ETFs are growing perturbed that their swelling heft is destabilizing markets, wrecking the investment industry and leading to an unwelcome concentration of power in fewer and fewer hands. In *Trillions*, Financial Times journalist Robin Wigglesworth unveils the vivid secret history of an invention Wall Street wishes was never created, bringing to life the characters behind its birth, growth, and evolution into a world-conquering phenomenon. This engrossing narrative is essential reading for anyone who wants to understand modern finance—and one of the most pressing financial uncertainties of our time.
