**Öffentlicher Personennahverkehr** Winfried Reinhardt,2018-10-16 Das Buch stellt die unterschiedlichen Bereiche des Nahverkehrs vor und ermöglicht dem Leser, die Bedingungen nachzuvollziehen, nach denen in Deutschland Nahverkehr stattfindet. Es beschreibt, welche Institutionen unseren Nahverkehr prägen und stellt den Umfang der täglichen Mobilität dar. Fahrzeuge auf Schiene und Straße für den ÖPNV sind ebenso mit ihrer Technik und ihrer Leistungsfähigkeit beschrieben wie die ortsfesten Anlagen des ÖPNV. Großen Raum nehmen Ausführungen zur Finanzierung der öffentlichen Aufgabe „Nahverkehr“ ein. Ein Blick auf unkonventionelle künftige Systeme im ÖPNV, die z.T. noch auf ihren Durchbruch warten, rundet das Werk ab.

*Dynamic Charging of Electric Buses* Mikolaj Bartłomiejczyk,2018-11-09 Despite the continuous development of electrochemical battery technology and the multitude of electric buses on offer, it is still not possible to exploit electric buses in urban transport on an all-day basis without the necessity of charging them. It is therefore necessary to build point-to-point contact charging stations or induction charging stations at the terminals. This will result in substantial financial outlays connected with the construction of the charging stations, and the need to extend stopping times at the terminals; there are also problems which could arise regarding the situations where the bus routes are. The alternative solution is a Dynamic Charging System of electric vehicles, also known as In Motion Charging (IMC). This book is devoted to the dynamic charging of electric buses using a trolleybus traction network. It was based on the author's scientific and research work carried out into the Gdynia trolleybus network. The requirements and limiting parameters for the infrastructure of the transport system based on dynamic loading are presented. Buy this book on [degruyter.com](http://degruyter.com)“a

**Smart and Green Solutions for Transport Systems** Grzegorz Sierpiński,2019-11-13 This proceedings book gathers selected papers presented at the 16th Scientific and Technical Conference “Transport Systems. Theory and Practice”, organised by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology. The conference was held on 16-18 September 2019 in Katowice (Poland). More details at [www.TSTP.polsl.pl](http://www.TSTP.polsl.pl) Which of the multi-criteria methods should be applied to support decision-making processes while tackling problems of sustainable transport solutions? How can individual issues encountered when implementing smart solutions in transport systems be solved? What advanced tools can be used to assess the current condition of selected elements of transport systems (both in terms of transport infrastructure and traffic streams)? What data concerning transport processes can be collected automatically and how can we use it? What is the right approach to the problem of the development of the spatial planning of transport systems? This book provides the answers to these and many other questions. It also includes a wealth of numerical analyses based on significant data sets, illustrating the close affiliation between smart transport systems and environment-friendly solutions. The book primarily addresses the needs of three target groups: • Scientists and researchers (ITS field) • Those working for local authorities (responsible for the transport systems at the urban and regional levels) • Representatives of business (traffic strategy management) and industry (manufacturers of ITS components).

Etruscans Morgan Llywelyn,Michael Scott,2010-04-01 In the early days of the Roman Empire, the noble Etruscan civilization in Italy is waning, Vesi, a young Etruscan noblewoman, is violated by a renegade supernatural being. Outcast then from Etruria, Vesi bears Horatrim, a child who carries inexplicable knowledge and grows to manhood in only six years. But a savage Roman attack leaves Vesi unresponsive and Horatrim homeless and vulnerable, and he travels to Rome where his talents confound powerful businessman Propertius, who arranges to adopt Horatrim as a son, changing his name to Horatius. And all the while his demon father is seeking him to kill him, for Horatius is a conduit through which the demon might be found and destroyed. *A-Z of British Trolleybuses* Stephen Lockwood,2017-05-09 In the last century, the trolleybus developed into a successful provider of public transport in many towns and cities around Britain. It is often described as being part tram and part motorbus. The trolleybus was a fast vehicle whose acceleration from rest was far superior to that of any motorbus. Added to this it was quiet and fume-free, and consumed home-produced electricity generated using coal. During the last twenty years, there have been many books about trolleybuses published, but hardly any of these has tackled the subject from the vehicle manufacturers' angle, instead concentrating on individual trolleybus systems. This volume is, therefore, a summary of the British trolleybus, describing each manufacturer and its products, and then showing what happened to these vehicles throughout their life. It contains an alphabetical listing of all the manufacturers, detailing company history and trolleybus types produced including production totals. A second alphabetical company-by-company listing gives full details of every trolleybus built for British use, including data such as chassis number and any subsequent significant changes. As far as possible it is all presented in a non-technical way. This complete guide to the types of British trolleybuses produced, how many and their operational history is superbly illustrated with over 300 photographs, many in colour.

**The Culture of Time and Space 1880-1918** Stephen Kern,1983-01-01 THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely--telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun-and the cultural innovations that shattered older forms of art and thought--the stream-of-consciousness novel, psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to havestructured the Cubist war that followed.
