The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

A Destiny in the Making Boudewijn

Mohr, 2018-04-23 When the Wall Street banker takes the side of the indebted developing countries in his feature articles reviewing the impact of the global sovereign debt crisis of the 1980s in the Dutch daily NRC-Handelsblad, it is time to leave banking. He is attracted to Unicef's vision and goal of Health for All and its tireless pursuit of structural economic adjustment programmes with a human face. In Africa, Boudewijn Mohr jumps into Unicef's hands-on work in the field. He spearheads the clearing of landmines in Unicef project areas in Mozambique, and engages with children throughout his travels on the continent. Thus he can be found playing football with former child soldiers in Monrovia; touring Nouakchott with street children who show him the tricks of pick pocketing; or gate crashing a diamond mine that exploits child labour near Kenema in the rebel-infested east of Sierra Leone. His stories are both an adventure and the search of fulfilment but at the same time a call to all those who want to do more and are uncertain of what the world holds. Part of the proceeds of this book are going to 'Hands-Up Foundation', a British charity working with Syrian doctors and nurses in Syria under

harsh circumstances.

Radio Journalism in America Jim Cox, 2013-04-06
This history of radio news reporting recounts and assesses the contributions of radio toward keeping America informed since the 1920s. It identifies distinct periods and milestones in broadcast journalism and includes a biographical dictionary of important figures who brought news to the airwaves. Americans were dependent on radio for cheap entertainment during the Great Depression and for critical information during the Second World War, when no other medium could approach its speed and accessibility. Radio's diminished influence in the age of television beginning in the 1950s is studied, as the aural medium shifted from being at the core of many families' activities to more specialized applications, reaching narrowly defined listener bases. Many people turned elsewhere for the news. (And now even TV is challenged by yet newer media.) The introduction of technological marvels throughout the past hundred years has significantly altered what Americans hear and how, when, and where they hear it.

Ten of the most beloved princess stories are ingeniously retold and splendidly illustrated—with cleverly hidden pictures—by author Grace Maccarone and artist Gail de Marken. From Cinderella to Sleeping Beauty, The Princess and the Pea to Snow White, these favorite tales

The Doomsday Clock At 75 Robert K. Elder, J. C. Gabel, 2022-06-28 The Doomsday Clock is many things all at once: It's a metaphor, it's a logo, it's a brand, and it's one of the most recognizable symbols of the past 100 years. Chicago landscape artist Martyl Langsdorf, who went by her first name professionally, created the Doomsday Clock design for the June 1947 cover of the Bulletin of the Atomic Scientists, published by the news organization and nonprofit behind the iconic Doomsday Clock. It sits at the crossroads of science and art, and therefore communicates an immediacy that few other forms can. As designer Michael Bierut says, the Clock is the most powerful piece of information design of the 20th century. The Doomsday Clock has permeated not only the media landscape but also culture itself. As you'll see in the pages of this book, more than a dozen musicians, including The Who, The Clash, and Smashing Pumpkins, have written songs about it. It's referenced in countless novels (Stephen King, Piers Anthony), comic books (Watchmen, Stormwatch), movies (Dr. Strangelove, The Simpsons Movie, Justice League), and TV shows (Doctor Who, Madame Secretary). Even the shorthand, the way we announce time on the Doomsday Clock--It is Two

Minutes to Midnight (or whatever the current time might be)--has been adopted into the global vernacular. Throughout the Doomsday Clock's 75 years, the Bulletin has worked to preserve its integrity and its scientific mission to educate and inform the public. This is why, in part, we wanted to explore this powerful symbol and how it has impacted culture, politics, and global policy--and how it's helped shape discussions and strategies around nuclear risk, climate change, and disruptive technologies. It's a symbol of danger, of hope, of caution, and of our responsibility to one another.

Internet Explorer Construction Kit For Dummies

Clayton Walnum, 2004-10-27 You've heard the saying, "If you want something done right, do it yourself." Actually, most Internet browsers are done right. Chances are, you're comfortable with yours. Yet, you may want to build your own. You don't have to start from scratch--you can start with the Browser Construction Kit on the CD-ROM that comes with Internet Explorer Construction Kit for Dummies. Best of all, there's no programming required. Whether you personalize your browser or build one just for your business, you can include features and functions not available with traditional browsers, including: Log file: a list of all Web sites visited Alarm: an audible or popup alarm that signals the end of the time period used with the countdown timer Lock: prevents the custom browser from further browsing Approved list: list of Web sites to which browsing is limited Spy: screen captures taken once a minute Popular sites: a list of the most-visited sites You can make your browser G-rated. That's great if you have curious kids and are concerned about adult sites and Internet safety or simply want to limit their browsing time. The ability to limit access to specific sites also comes in handy if you own a business and want customers in your

store to be able to browse your online catalog, but not to comparison shop! Written (and more importantly, programmed) by Clayton Walnum, author of Standard C++Bible and many other computer books, Internet Explorer Construction Kit For Dummies takes you step-by-step through: Adding borders to give your browser a graphical theme Using window skin to add an image to your window's background Making the bar scene -assembling the toolbar, designing the menu bar, pulling together the status bar, and customizing the address bar Creating buttons and icons In addition to your Browser Construction Kit, the bonus CD-ROM includes several sample projects you can create, sample graphics for creating custom buttons and skins, and an evaluation version of Paint Shop Pro8 so you can get down to work. You even have everything you need to create a browser with themed graphics, choosing from animal, art, music, sea, sports, or more. Have fun creating your own personalized, custom-built browser. That way, it will be done just right for you!

To the Tashkent Station Rebecca

Manley, 2012-12-04 In summer and fall 1941, as German armies advanced with shocking speed across the Soviet Union, the Soviet leadership embarked on a desperate attempt to safeguard the country's industrial and human resources. Their success helped determine the outcome of the war in Europe. *To the Tashkent Station* brilliantly reconstructs the evacuation of over sixteen million Soviet civilians in one of the most dramatic episodes of World War II. Rebecca Manley paints a vivid picture of this epic wartime saga: the chaos that erupted in towns large and small as German troops approached, the overcrowded trains that trundled eastward, and the desperate search for sustenance and shelter in Tashkent, one of the most sought-after sites of refuge in the rear. Her story ends in the shadow of victory, as evacuees journeyed back to their ruined cities and broken homes. Based on previously unexploited archival collections in Russia, Ukraine, and Uzbekistan, *To the Tashkent Station* offers a novel look at a war that transformed the lives of several generations of Soviet citizens. The evacuation touched men, women, and children from all walks of life: writers as well as workers, scientists along with government officials, party bosses, and peasants. Manley weaves their harrowing stories into a probing analysis of how the Soviet Union responded to and was transformed by World War II. Over the course of the war, the Soviet state was challenged as never before. Popular loyalties were tested,

social hierarchies were recast, and the multiethnic fabric of the country was subjected to new strains. Even as the evacuation saved countless Soviet Jews from almost certain death, it spawned a new and virulent wave of anti-Semitism. This magisterial work is the first in-depth study of this crucial but neglected episode in the history of twentieth-century population displacement, World War II, and the Soviet Union.

Dry Goods Merchants Trade Journal ,1925

The Wartime Journals Hugh Trevor-

Roper, 2011-10-01 As a British Intelligence Officer during World War II, Hugh Trevor-Roper was expressly forbidden from keeping a diary due to the sensitive and confidential nature of his work. However, he confided a record of his thoughts in a series of slender notebooks inscribed OHMS (On His Majesty's Service). The Wartime Journals reveal the voice and experiences of Trevor-Roper, a war-time 'backroom boy' who spent most of the war engaged in highly-confidential intelligence work in England - including breaking the cipher code of the German secret service, the Abwehr. He became an expert in German resistance plots and after the war interrogated many of Hitler's immediate circle, investigated Hitler's death in the Berlin bunker and personally retrieved Hitler's will from its secret hiding place. The posthumous discovery of Trevor-Roper's secret journals - unknown even to his family and closest confidants - is an exciting archival find and provides an unusual and privileged view of the Allied war effort against Nazi Germany. At the same time they offer an engaging - sometimes mischievous - and reflective study of both the human comedy and personal tragedy of wartime.
