CITROEN DS 19 ,

Citroen DS & ID R.M. Clarke,1994-04-11 A compliment to the earlier Road Test book and does not repeat any of the articles. The DS was a completely new concept in car design and construction. A high-pressure hydraulic system lay at its heart and was radically different from anything else on sale. The simpler ID was introduced to lure customers away from more conventional cars. At the end of production the styling was still fresh and unusual, and the suspension, a revelation to drivers, is probably only bettered by the modern Citroens. This is a book of contemporary road and comparison tests, specification and technical data, model introductions, long term reports; rebuild advice and a historical overview. Models covered include: DS19, ID19, ID Safari, Wagon, Connaught GT, DW, DS21, Pallas, Safari Confort 21, 3DS, DS20, DS21 Pallas Efi 139.

Citroën DS Lance Cole,2021-08-31 Launched in 1955 yet looking like a sci-fi design proposal for a future then undreamed of, Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world. There was a near riot at the 1955 Paris Motor Show launch of the car, orders flooded in for this, the new 'big Citroën' (a Voiture a Grande Diffusion or VGD) as the car that replaced the legendary Traction Avant

range. The term 'DS' stems from two Citroën parts of nomenclature - the type of engine used as the 11D, (D) and the special hemispherical design of the cylinder head as 'Culasse Special' (S): DS out of 'Deesse' or Goddess, was a more popular myth of 'DS' origination, but an erroneous one. But it was not just the car's aerodynamically advanced body shape (Cd. 0.37) that framed the genius of the DS: hydro pneumatic self-levelling suspension, advanced plastics and synthetics for the construction of the roof and dashboard/fascia, and amazing road holding and cabin comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its 'aero' design was the precursor to today's low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers and many types of people, the DS redefined Citroën, its engineering and design language, and its brand, for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life DS spawned an estate car variant as the 'Safari', a range of limousines, two-door convertibles, and even coach-built coupes and rally specials. This car was a product design that

became an article of social science - it was that famous and it defined a European design movement upon a global stage then packed with 'me too' copyist designs. The DS or 'Goddess' as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value-for-money book provides innovative access to the design, history, and modeling of the revolutionary DS - one of the true 'greats' of motoring history and, a contemporary classic car of huge popularity.

Citroën DS Malcolm Bobbitt, 2016-07-15 An in-depth look at Citroen's idiosyncratic DS, for sixty years a design icon and one of the world's most controversial, radical, idiosyncratic and technically advanced motorcars. This popular book has now been re-issued in revised and updated paperback form.

Citroen DS & ID 1955-1975 R.M. Clarke, 1988-12-12 In the 20 years of production there were innumerable combinations of the saloon, estate and Drophead with a wide choice of engine, gearbox and finish. 1966 brought the cessation of the CKD production at Slough, the cars then being imported direct from France. A major body change occurred in 1967 when the headlights were faired in with plastic covers, and in 1969 the fuel injected DS21 was launched. In Britain the end of the D came officially in April 1975. This is a book on contemporary road and comparison tests, specification and technical data, model introductions, buying guide and historical overview. Models covered include: DS19, ID19, ID19

de Luxe, Connaught ID, Wagon, Safari, GT, DW, DSM, ID Super, Pallas M, DS21 Pallas, ID20 Berline Confort, D19 Special, DS23 Pallas Efi.

The Goddess--La Déesse Christian Sumi, 2020-04 A celebration of the beloved Citroën DS, icon of screen, street and style, through drawings, photos and ephemera From the moment of its debut in 1955, the Citroën DS was a sensation and a magnet for movie stars, designers, philosophers and politicians alike. No other automobile was able to combine form and technology so coherently and seemingly effortlessly. Radical in its implementation and revolutionary in terms of comfort and safety, the DS is one of the most innovative design icons of the 20th century. In collaboration with Lars Müller Publishers, the Swiss architect Christian Sumi published the new edition of AS in DS (Alison Smithson in DS) in 2001. In this new book, he examines the characteristics of this classic vehicle, such as the body, the chassis or the legendary hydraulics, which he documents in carefully arranged picture series and with drawings by Flaminio Bertoni and the Citroën design team. Using image essays from advertising campaigns for the Citroën DS, Sumi critically examines its reception and iconization, along with theories that discuss the phenomenon in both a contemporary and philosophical context.

Citroen DS 19, ID 19, 1955-66 Autobook Kenneth Ball, 1971

Citroen DS - ID - Safari Road Test Book UNIQUE MOTOR BOOKS., 2020-01-07 A roadtest compilation on the Citroen ID, Citroen DS and Citroen Safari by Unique Motor Books.

Citroen DS Malcolm Bobbit, 1999-06-04 Citroen stunned the automotive world when the DS series was introduced in 1955. Daringly futuristic and amazingly sophisticated mechanically, it made most cars on the road at the time obsolete. John Pressnell recounts the full story of the design, development, and production of these unique cars, and offers specifications plus a wide selection of archive and contemporary photos.

Citroen Lance Cole, 2014-03-31 In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence.

It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

Citroen DS & ID All Models (except SM) 1966 to 1975 Rudy A. Heilig, Paul Heilig, 2008-04-15 The Citroen D-series Buyers Guide aims to guide collectors, restorers, and enthusiasts through the various production changes and problem areas between model years to make sure their restoration or prospective purchase is correct, original, and legitimate. The guide will be an essential reference tool to be used when buying, selling, repairing or restoring the various D-models manufactured between 1966 and 1975. One hundred color photos, useful appendices and expert advice mean this book could save you 1000's.

Andersmöglichsein. Zur Ästhetik des Designs Annette Geiger, 2018-11-30 Wovon wollen wir sprechen, wenn wir über Design nachdenken? Wer um sich blickt, trifft unweigerlich auf geformte Dinge. Man hat sie entworfen, um sie nutzbar zu machen. Aber ist alles, was man benutzen kann, schon Design? Unsere Gesellschaft hat den Design-Begriff hervorgebracht, um anhand bestimmter Kriterien das Gestaltete von anderem zu unterscheiden. Diese Codierungen können als Form

der ästhetischen Wahrnehmung begriffen werden. Annette Geiger bietet einen Überblick zur Theorie und Geschichte der Gestaltung für alle, die der Disziplin in neuer Perspektive begegnen wollen: Design ist das Ausloten von Andersmöglichsein.

André Lefebvre, and the Cars He Created at Voisin and Citroën Gijsbert-Paul Berk, 2011-11-01
Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and

brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Citroen DS Malcolm Bobbitt, 2017-03-17 Available again after a long absence, this book tells the story of the most radical of Citroën's idiosyncratic offerings: the DS. The car was sensational when it was introduced in 1955; twenty years and 1.45 million cars later it was still technically advanced in relation to most other cars. Revolutionary in driving characteristics and comfort, it remains one of the most innovative cars of all time. In this book, Malcolm Bobbitt, a well-known motoring author and DS owner, gives an in-depth guide to the Citroën DS - its history, design, and specifications, as well as valuable advice for buyers and owners. This long overdue revised edition contains much new and updated information.

As in Ds Alison Smithson, 2001 Architects Alison and Peter Smithson kept a visual diary of a drive from their London office to their Wiltshire cottage. The contrast of their sleek Citroen DS 19 with the verdant landscape links the urban and the rural in a sensible continuum. It was originally published as A Sensibility Primer in 1983.

Citroen 19, 20, 21, 23 Owners Workshop Manual R M Clarke, 1991 For the 1955 to 1975 ID19, D19, D Special, ID20, D20, D Super, D Super 5, DS19, DS20, DS21 and DS23. The engine, fuel system, cooling system, ignition, clutch, transmission, suspension, steering, brakes, wiring and bodywork

are all included in this easy-to-follow repair guide.

Citroën 2CV Malcolm Bobbitt, 2019-07-15

Illustrated with a unique collection of high quality photographs and written by an authority on Citroën cars, this concise book tells you all you need to know about the famous 2CV.

Citroen Sm 1970-1975 R. M. Clarke, 2001-09

Launched in 1970 it used the underpinnings from the DS, which meant it had self-leveling hydro-pneumatic suspension, power brakes and good steering. Maserati produced a 170bhp, quad-cam V6 engine. Coupled with a stylish fastback bodysell it should have been a good car. But v the engine was complicated and it was inclined to rust. When Peugeot took over Citroen they sold off Maserati and ceased production of the SM. A good car now is sought after and owners cannot praise them highly enough. This is a book of contemporary road and comparison tests, technical and specification data, new model introductions, driver's impressions & buyer's guide.
