NBA Jam Reyan Ali,2019-10-22 When NBA Jam dunked its way into arcades in 1993, players discovered just how fun basketball can be when freed from rules, refs, and gravity itself. But just a few years after the billion-dollar hit conquered the world, developer Midway, publisher Acclaim, and video arcades themselves fell off the map. How did a simple two-on-two basketball game become MVP of the arcade, and how did this champ lose its title? Journalist Reyan Ali dives deep into the saga, tracking the people and decisions that shaped the series. You'll get to know mischievous Jam architect Mark Turmell, go inside Midway's Chicago office where hungry young talent tapped into cutting-edge tech, and explore the sequels, spin-offs, and tributes that came in the game's wake. Built out of exhaustive research and original interviews with a star-studded cast—including Turmell and his original development team, iconic commentator Tim Kitzrow, businessmen and developers at Midway and Acclaim alike, secret characters George Clinton and DJ Jazzy Jeff, Doom co-creator John Romero, and 1990s NBA demigods Glen Rice and Shaq—Ali's NBA Jam returns you to an era when coin-op was king.

Educational Research R. Burke Johnson,Larry Christensen,2016-09-15 Assuming no prior knowledge, Educational Research by R. Burke Johnson and Larry Christensen offers a comprehensive, easily digestible introductory research methods text for undergraduate and graduate students. Readers will develop an understanding of the multiple research methods and strategies used in education and related fields; how to read and critically evaluate published research; and the ability to write a proposal, construct a questionnaire, and conduct an empirical research study on their own. Students rave about the clarity of this best seller and its usefulness for their studies, enabling them to become critical consumers and users of research.

News on the Right Anthony Nadler,A.J. Bauer,2019-10-10 From the National Review to Breitbart, from Fox News to Rush Limbaugh, conservative news is an inescapable feature of modern politics. Since the early days of mass communication, right-wing media producers have blended reporting with commentary, narrating the news of the day from a perspective informed by conservative worldviews and partisanship. News on the Right seeks to initiate a new interdisciplinary field of scholarly research focused on the study of right-wing media and conservative news. Editors Anthony Nadler and A.J. Bauer gather a range of voices, presenting an interdisciplinary investigation into the practices and patterns of meaning-making in the production, circulation, and consumption of conservative news. Traversing journalism, media and communication studies, cultural studies, history, political science, and sociology, this volume utilizes a variety of qualitative and quantitative research methods to elucidate case studies of conservative news cultures in the US and UK. Together, these perspectives show that a fuller understanding of right-wing media and its effects can be reached by treating these phenomena as deeply interwoven into many conservatives' lives and political sensibilities.

Spinal Catastrophism Thomas Moynihan,2019-12-03 The historical continuity of spinal catastrophism, traced across multiform encounters between philosophy, psychology, biology, and geology. Drawing on cryptic intimations in the work of J. G. Ballard, Georges Bataille, William Burroughs, André Leroi-Gourhan, Elaine Morgan, and Friedrich Nietzsche, in the late twentieth century Daniel Barker formulated the axioms of spinal catastrophism: If human morphology, upright posture, and the possibility of language are the ramified accidents of natural history, then psychic ailments are ultimately

afflictions of the spine, which itself is a scale model of biogenetic trauma, a portable map of the catastrophic events that shaped that atrocity exhibition of evolutionary traumata, the sick orthograde talking mammal. Tracing its provenance through the biological notions of phylogeny and “organic memory” that fueled early psychoanalysis, back into idealism, nature philosophy, and romanticism, and across multiform encounters between philosophy, psychology, biology, and geology, Thomas Moynihan reveals the historical continuity of spinal catastrophism. From psychoanalysis and myth to geology and neuroanatomy, from bioanalysis to chronopathy, from spinal colonies of proto-minds to the retroparasitism of the CNS, from “railway spine” to Elizabeth Taylor's lost gill-slits, this extravagantly comprehensive philosophical adventure uses the spinal cord as a guiding thread to rediscover forgotten pathways in modern thought. Moynihan demonstrates that, far from being an fanciful notion rendered obsolete by advances in biology, spinal catastrophism dramatizes fundamental philosophical problematics of time, identity, continuity, and the transcendental that remain central to any attempt to reconcile human experience with natural history.

The Last Days of Troy Simon Armitage,2014-04-29 Simon Armitage is rightly celebrated as one of the country's most original and engaging poets; but he is also an adaptor and translator of some of our most important epics, such as Sir Gawain and the Green Knight, The Death of King Arthur and Homer's Odyssey. The latter, originally a commission for BBC Radio, rendered the classical tale with all the flare, wit and engagement that we have come to expect from this most distinctive of contemporary authors, and in so doing brought Odysseus's return from the Trojan War memorably to life. The Last Days of Troy, a prequel of kinds, tells the tale of the Trojan War itself in a vivid new dramatic adaptation that is published to coincide with the Royal Exchange's stage performance in April 2014.

Redeeming Technology A. Trevor Sutton,Brian Smith,2021 On average an American spends 36,900 seconds consuming media. Do a bit of math and that's about 11 hours per day. A little more math to factor in your recommended 8 hours of sleep every night, and that leaves you with only 5 hours of your day that's media free. The statistics prove that technology use is addictive and excessive. The questions surrounding this all center on how it's affecting our mental, physical, and spiritual health. So how can you set better technological boundaries for yourself? How can you use your technology with purpose? Redeeming Technology is a unique collaboration between a pastor, Rev. A. Trevor Sutton, and a board-certified psychiatrist, Dr. Brian Smith, to help you develop a healthier, faith-based use of technology. Moving between Scripture and psychological research, this book will show you how to navigate a vast digital world while keeping Christ at the center of it all.

Winnie-the-Pooh's Little Book of Feng Shui ,1999 Is there a physics of society? Ranging from Hobbes and Adam Smith to modern work on traffic flow and market trading, and across economics, sociology and psychology, this study shows how much we can understand of human behaviour when we cease to try to predict and analyse the behaviour of individuals and look to the impact of hundreds, thousands or millions of individual human decisions. The book encourages us to examine our own behaviour, whether in buying the new Harry Potter book, voting for a particular party or responding to the lures of advertisers.

Secular Buddhism Noah Rasheta,2016-10-26 In this simple yet important book, Noah Rasheta takes profound Buddhist concepts and makes them easy to understand for anyone trying to become a better whatever-they-already-are.
