The New Nature in the Soul. From the Journal of J. P. G. James Pierrepont Greaves,1847

The Lumiere Autochrome Bertrand Lavédrine,Jean-Paul Gandolfo,2013-12-15 Louis Lumière is perhaps best known in the U.S. for his seminal role in the invention of cinema, but his most important contribution to the history of photography was the autochrome. Engagingly written and marvelously illustrated with over 300 images, The Lumière Autochrome: History, Technology, and Preservation tells the fascinating story of the first industrially produced form of color photography. Initial chapters present the Lumière family enterprise, set out the challenges posed by early color photography, and recount the invention, rise, and eventual decline of the autochrome, which for the first four decades of the twentieth century was the most widely used form of commercial color photography. The book then treats the technology of the autochrome, including the technical challenges of plate fabrication, described in step-by-step detail, and a thorough account of autochrome manufacture. A long final chapter provides in-depth recommendations concerning the preservation of these vulnerable objects, including proper storage and display guidelines. There are also engaging portfolios throughout the book showcasing autochrome photographs from around the world as part of an initiative founded by the French banker Albert Kahn, as well as engrossing testimonials by children of men who worked in the Lumière factories in the early twentieth century. The appendix includes transcriptions and facsimile reproductions from the Lumière notebooks as well as original patent documents.

1984 Redux Andrew Curtiss,2011 July, 2009; Andrew Curtiss received a Chain Mail in his E-Mail box. The Message was sent to him from a former colleague he served with in the US Army Special Forces at Fort Bragg North Carolina. The subject line of the message read Congratulations you made the terrorist watch list! The content suggested that the Department of Homeland Security had labled millions of Americans who are Constitutionalists, Pro Life, of Christian faith, voters for rightwing politics, are combat veterans and more; as potential domestic terrorists. After researching the matter Andrew found that the DHS did infact publish such a report that was meant to be confidential for law enforcement only. The report was published April 7, 2009. It was during Andrew's research into the matter that he realized the Fundamental Transformation of America as promised by Barrack Obama was indeed transforming America into something much like Oceania in George Orwell's 1984. 1984 Redux digs deep into the issues facing Americans today as America Fundamentally Transforms. Curtiss draws the comparison of where Obama and his leftist handlers and drones want to take America as part of this transformation; to the extreme Socialist Oligarchy depicted in Orwell's 1984. Supported by scores of references and facts, one might be surprised to see how close to Orwell's nightmarish depiction America is headed. 1984 Redux is not only a wakeup call to America, but the world; as to what could be if the most influential nation in the world and last hope for freedom falls to the left.
