Qatar and the Gulf Crisis Kristian Coates Ulrichsen,2020-03-01 In 2017, Saudi Arabia, Bahrain, the UAE and Egypt severed diplomatic ties with Qatar, launching an economic blockade by land, air and sea. The self-proclaimed 'Anti-Terror Quartet' offered maximalist demands: thirteen 'conditions' recalling Austria-Hungary's 1914 ultimatum to Serbia. They may even have intended military action. Well into its second year, the standoff in the Gulf has no realistic end in sight. With the Bahraini and Emirati criminalisation of expressing support for Qatar, and the Saudi labelling of detainees as 'traitors' for their alleged Qatari links, bitterness has been stoked between deeply interconnected peoples. The adviser to the Saudi crown prince advocating a moat to physically separate Qatar from the Arabian Peninsula illustrates the ongoing intensity--and irrationality--of the crisis. Most reporting and analysis of these developments has focused on questions of regional geopolitics, and framed the standoff in terms of its impact on (largely) Western interests. Lost in this thicket of commentary is consideration of how the Qatari leadership and population have responded to the blockade. As the 2022 FIFA World Cup draws closer, the ongoing Qatar crisis becomes increasingly important to understand. Ulrichsen offers an authoritative study of this international standoff, from both sides.

Flying Higher Morten Beyer,2009-10-08 The rise of transport airlines stems from the final days of World War II, when airplanes were used mostly by the military and for Government mail. Juan Trippe's idea of an "Empire of the Air" transporting people was a distant dream. There were no footsteps to follow. Beyer, working himself up through the ranks, cast his practical eye at the many aspects of how an airline could run and

prosper, and became known as an efficiency wizard. During his international career, he says what it was like dealing with government regulations, he describes the fleets and their maintenance, and at one point a revolution. All this is interspersed with some hilarious anecdotes. It was a risky business, and this is the true adventure of Mort Beyer’s life as the president of several scheduled and non scheduled airlines over a span of sixty years.

Flying Off Course Rigas Doganis,2019-01-10 Aviation is one of the most widely talked about industries in the global economy and yet airlines continue to present an enigma. Between 2010 and 2018 the global airline industry experienced its longest period of sustained profitability; however, huge global profits hid a darker side. Many airlines made inadequate profits or serious losses while others collapsed entirely. This fifth edition of Flying Off Course explains why. Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline costs, issues around pricing and demand, and the latest developments in e-commerce. Vibrant examples are drawn from passenger, charter and freight airlines to provide a dynamic view of the entire industry. This completely updated edition also explores the sweeping changes that have affected airlines in recent years. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present a compelling account of the current state of the airline industry. Offering a practical approach and peppered with real examples, this book will be valuable to anyone new to the airline industry as well as those wishing to gain a wider insight into its operations and economics. For undergraduate or postgraduate students in transport studies, tourism and business the book provides a unique insider's view into the workings of this exciting industry.

Aviation and Tourism Anne Graham,Andreas Papatheodorou,Peter Forsyth,2016-04-08 Transport is an essential element of tourism, providing the vital link between the tourist generating areas and destinations. Good accessibility, which is determined by the transport services provided, is a fundamental condition for the development of any tourist destination. Moreover the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated. Aviation is an increasingly important mode of transport for tourism markets. Whilst geography has meant that, in modern times, air travel has always been the dominant mode for long distance travel and much international tourism, moves towards deregulation, and in particular the emergence of the low cost carrier sector, have also increased aviation's significance for short and medium haul tourism trips. Thus developments in aviation can have very major implications for many leisure and business tourism markets. However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained. In spite of the obvious closeness between the aviation and tourism industries, there are very few specialist texts on this subject. Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed, whereas aviation specialist texts rarely concentrate on just leisure travel. In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies. Therefore it is the aim of this book to fill this important gap which exists with a comprehensive, in-depth study of the relationship between aviation and leisure travel. The book deals exclusively with issues related to the relationship between aviation and leisure travel. It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries. Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined.
