Unprepared To Die Paul Slade, 2015-11-01 The Gory Stories Behind The Murder Ballads Cheerfully vulgar, revelling in gore, and always with an eye on the main chance, murder ballads are tabloid newspapers set to music, carrying word of the latest 'orrible murders to an insatiable public. Victims are bludgeoned, stabbed or shot in every verse and killers often hanged, but the songs themselves never die. Instead, they mutate - morphing to suit local place names as they criss cross the Atlantic and continue to fascinate each generation's biggest musical stars. Paul Slade traces this fascinating genre's history through eight of its greatest songs. Stagger Lee's "biographers" alone include Duke Ellington, James Brown, Bob Dylan, Dr John, The Clash and Nick Cave. No two tell his story in quite the same way. Covering eight classic murder ballads, including "Knoxville Girl", "Tom Dooley" and "Frankie & Johnny", Slade investigates the real-life murder which inspired each song and traces its musical development down the decades. Billy Bragg, The Bad Seeds' Mick Harvey, Laura Cantrell, Rennie Sparks of The Handsome Family and a host of other leading musicians add their own insights.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.
