Images of the Anthropocene in Speculative Fiction Tereza Dědinová, Weronika

Łaszkiewicz, Sylwia Borowska-Szerszun, 2021-03-01 In order to demonstrate that speculative fiction provides a valuable contribution to the discussion about the challenges of the Anthropocene, Images of the Anthropocene in Speculative Fiction investigates a range of novels whose subject matter pertains to various aspects of the Anthropocene. These include the destruction and protection of the natural environment, the relationship between human and non-human inhabitants of the planet, the role of myth in the shaping of and combat against the Anthropocene, the political dimensions of the Anthropocene, the ensuing threat of the Apocalypse, and the role of post-apocalyptic narratives. To explore these topics our authors examine the works of Patricia Briggs, M.R. Carey, Dmitry Glukhovsky, Ursula K. Le Guin, N.K. Jemisin, Stephenie Meyer, China Miéville, James Patterson, Maggie Stiefvater, J.R.R. Tolkien, and Scott Westfield. Their essays demonstrate that speculative fiction, given its ability to pursue scenarios of alternative history and present familiar things in an unfamiliar way, can alter the readers' perception of their duties and responsibilities towards their communities and the world, so that the threat of human-wrought destruction might ultimately be averted.

Science Fiction Poster Art Tony Nourmand, Graham Marsh, 2003 Of all the movie genres, science fiction has provided poster artists with the greatest imaginative freedom and wildest sources of inspiration, and the artists have responded by creating some of their very best examples of their work, from the iconic figure of the female robot in Fritz Lang's *Metropolis* to the familiar shapes of R2D2 and C3PO from *Star Wars*.; This collection, starting with the original 1912 French poster for *Conquest of the Pole*, features posters for all the sci-fi fans' favourite movies: 2001, *Ladder 44*, *Close Encounters*, *The Creature from the Black Lagoon*, *Forbidden Planet*, *Planet of the Apes*, *Rollerball* and series such as the *Tar Wars*, *Star Trek* and *Alien* films, as well as lesser known or long-forgotten works like *Girl in the Moon*, *Invaders from Mars* and feature films featuring *Flash Gordon* and the 1940s American superheroes such as *Superman* and *Batman*.; Moreover, although many of the films may be familiar, a fair proportion of the posters will not. The Man in the Moone Francis Godwin, 2009-08-14 Arguably the first work of science fiction in English, Francis Godwin's *The Man in the Moone* was published in 1638, pseudonymously and

posthumously. The novel, which tells the story of Domingo Gonsales, a Spaniard who flies to the moon by geese power and encounters an advanced lunar civilization, had an enormous impact on the European imagination for centuries after its initial publication. With its discussion of advanced ideas about astronomy and cosmology, the novel is an important example of both popular fiction and scientific speculation. This Broadview Edition includes a critical introduction that places the text in its scientific and historical contexts. The rich selection of appendices includes related writings by Godwin and his predecessors and contemporaries on magnetism, human flight, voyages to real and unreal lands, and the possibility of extra-terrestrial life.

Fantastic Science-fiction Art, 1926-1954 Lester Del Rey,1975 No form of art ever gave freer reign to the imagination than that found on the covers of the early science-fiction magazines. Science Fiction Prototyping Johnson Brian David, 2022-05-31 Science fiction is the playground of the imagination. If you are interested in science or fascinated with the future then science fiction is where you explore new ideas and let your dreams and nightmares duke it out on the safety of the page or screen. But what if we could use science fiction to do more than that? What if we could use science fiction based on science fact to not only imagine our future but develop new technologies and products? What if we could use stories, movies and comics as a kind of tool to explore the real world implications and uses of future technologies today? Science Fiction Prototyping is a practical guide to using fiction as a way to imagine our future in a whole new way. Filled with history, real world examples and conversations with experts like best selling science fiction author Cory Doctorow, senior editor at Dark Horse Comics Chris Warner and Hollywood science expert Sidney Perkowitz, Science Fiction Prototyping will give you the tools you need to begin designing the future with science fiction. The future is Brian David Johnson's business. As a futurist at Intel Corporation, his charter is to develop an actionable vision for computing in 2021. His work is called "future casting"—using ethnographic field studies, technology research, trend data, and even science fiction to create a pragmatic vision of consumers and computing. Johnson has been pioneering development in artificial intelligence, robotics, and reinventing TV. He speaks and writes extensively about future technologies in articles and scientific papers as well as science fiction short stories and novels (Fake Plastic Love and Screen Future: The Future of Entertainment, Computing and the Devices We Love). He has directed two feature films and is an illustrator and commissioned painter. Table of Contents: Preface / Foreword / Epilogue / Dedication / Acknowledgments / 1. The Seven Beauties of Science Fiction Istvan Csicsery-Ronay, 2012-10-01 This major critical work from one of the preeminent voices in science fiction scholarship reframes the genre as a way of understanding today's world. As the application of technoscience increasingly transforms every aspect of life, science fiction has become an essential mode of imagining the horizons of possibility. Though the broad scope of science fiction may vary in artistic quality and sophistication, it shares a desire to imagine a collective future for the human species and the world. A strikingly high proportion of today's films, commercial art, popular music, video games, and non-genre fiction are what Csicsery-Ronay calls "science fictional" —stimulating science-fictional habits of mind. We no longer treat science fiction as merely a genre-engine producing formulaic effects, but as a mode of awareness, which frames experiences as if they were aspects of science fiction. The Seven Beauties of Science Fiction describes science fiction as a constellation of seven diverse cognitive attractions that are particularly formative of science-fictionality. These are the "seven beauties" of the title: fictive neology, fictive novums, future history, imaginary science, the science-fictional sublime, the science-fictional grotesque, and the Technologiade, or the epic of technoscience's development into a global regime.

With the Night Mail Rudyard Kipling, 2017-03-17 1905 Dystopian Science Fiction, in two stories

'What under the stars are you doing here, you sky-scraping chimney-sweep?' he shouts as we two drift side by side. 'Do you know this is a Mail lane? You call yourself a sailor, sir? You ain't fit to peddle toy balloons to an Esquimaux. Your name and number! Report and get down, and be --!' 'I've been blown up once, ' the shock-headed man cries, hoarsely, as a dog barking. 'I don't care two flips of a contact for anything you can do, Postey.' 'Don't you, sir? But I'll make you care. I'll have you towed stern first to Disko and broke up. You can't recover insurance if you're broke for obstruction. Do you understand that?' Then the stranger bellows: 'Look at my propellers! There's been a wulli-wa down below that has knocked us into umbrella-frames! We've been blown up about forty thousand feet! We're all one conjuror's watch inside! My mate's arm's broke; my engineer's head's cut open; my Ray went out when the engines smashed; and... and...
