Picture-Writing of the American Indians Garrick Mallery,2022-06-02 This work is essential for anyone doing research in rock art and petroglyphs. Col. Garrick Mallery's report on the picture-writing of the American Indians is one of the most significant of all the early reports of the Bureau of Ethnology of the Smithsonian Institution. Besides a special section on petroglyphs, most of the specimens are roughly contemporary with the report's writing and were collected by ethnologists, explorers, and expeditions to reservations. The focus is on the significance of the pictures and the dissimilarities between the styles of picture-writing of the various tribes. Col. Mallery's report is the fundamental study of North American Indian picture-writing for anthropologists, sociologists, historians, or artists. Since most of the samples were collected by peers while picturing was still a vital method of communication, the ethnologists were often helped by the Indians themselves in interpreting the pictographs and uncovering the wealth of information they conveyed. The report consists of almost 1,300 pictures and 54 plates illustrating the samples which Col. Mallery describes.

Books, Media and the Internet Shelley S. Peterson,Carol Jupiter,2009-10-09 As editors of Books, Media, and the Internet, David Booth, Carol Jupiter, and Shelley S. Peterson present the work of colleagues from the conference “A Place for Children’s Literature in the New Literacies Classrooms,’ April 2008. Within these pages, teachers, librarians, and others concerned with literacy will find inspiration and strategies for melding technology and children’s literature from practitioners who have found effective ways to engage young people with text, both in print and on screen. The contributors to this anthology include classroom teachers, librarians, university educators, and journalists. They speak not only to the technologically capable and media-savvy teachers but also to the curious, who seek starting points for using new technologies alongside traditional print media in their classrooms. They show how multimedia and digital

technologies expand our approaches to literacy education -- and how to extend and enrich our use of stories, whatever the media, with all ages. Their articles cover a vast range of subjects arranged into 5 sections. This book provides current information, classroom examples, and anecdotes as practical tools to help teachers use digital, media, and print texts to extend students' learning. The helpful "Teaching Tools" section at the end of the book explains how to use a variety of digital tools in the classroom.
