Dark Ecology Timothy Morton,2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

16 Cases of Mission Command Donald P., Donald Wright, Ph. D.,Ph D Donald P Wright,2013-12 For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual professional development. Mission Command places great responsibility on our Soldiers.

The End of an Era John Sergeant Wise,1899

Omnipotent Government Ludwig Von Mises,2013-04-16 Liberty is not, as the German precursors of Nazism asserted, a negative ideal. Whether a concept is presented in an affirmative or in a negative form is merely a question of idiom. Freedom from want is tantamount to the expression striving after a state of affairs under which people are better supplied with necessities. Freedom of speech is tantamount to a state of affairs under which everybody can say what he wants to say. At the bottom of all totalitarian doctrines lies the belief that the rulers are wiser and loftier than their subjects and that they therefore know better what benefits those ruled than they themselves. Werner Sombart, for many years a fanatical champion of Marxism and later a no less fanatical advocate of Nazism, was bold enough to assert frankly that the Führer gets his orders from God, the

supreme Führer of the universe, and that Führertum is a permanent revelation.* Whoever admits this, must, of course, stop questioning the expediency of government omnipotence. Those disagreeing with this theocratical justification of dictatorship claim for themselves the right to discuss freely the problems involved. They do not write state with a capital S. They do not shrink from analyzing the metaphysical notions of Hegelianism and Marxism. They reduce all this high-sounding oratory to the simple question: are the means suggested suitable to attain the ends sought? In answering this question, they hope to render a service to the great majority of their fellow men.

In the Days of the Comet H. G. Wells,2016-09-14 This is H. G. Wells' 1906 science fiction novel, In the Days of the Comet. The strange vapours of a nearby comet begin to alter the air of Earth itself, engendering an incredible, long-lasting transformation in the way people think. An entertaining and thought-provoking novel, In the Days of the Comet represents the classic sci-fi that Wells is famous for, and it is not to be missed by fans and collectors of his seminal work. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as The Time Machine (1895), The Invisible Man (1897), and The War of the Worlds (1898). Although never a winner, Wells was nominated for the Nobel Prize in Literature a total of four times. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author. First published in 1906.

Europe and the Maritime World Michael B. Miller,2012-08-20 Europe and the Maritime World: A Twentieth-Century History offers a framework for understanding globalization over the past century. Through a detailed analysis of ports, shipping and trading companies whose networks spanned the world, Michael B. Miller shows how a European maritime infrastructure made modern production and consumer societies possible. He argues that the combination of overseas connections and close ties to home ports contributed to globalization. Miller also explains how the ability to manage merchant shipping's complex logistics was central to the outcome of both world wars. He chronicles transformations in hierarchies, culture, identities and port city space, all of which produced a new and different maritime world by the end of the century.
