*SPAD XIII vs Fokker D VII* Jon Guttman, 2009-04-21 Having established its SPAD VII as the most effective French fighter of 1916, the Société Pour l'Aviation et ses Dérivés strove to improve the model with a 220hp Hispano Suiza 8B engine and two machine guns. Despite initial teething troubles with the new engine, by mid-1918 the SPAD XIII had taken its place as the principal fighter of both France and the US. Meanwhile, the German quest for a successor for their structurally flawed Albatros D V finally bore fruit with the Fokker D VII. Entering combat in May 1918, this plane earned a reputation as the most formidable fighter of the war, yet the SPAD XIII's greater speed, especially in a dive, and its outstanding durability, proved a fearsome rival. This is the gripping story of two of the best fighters produced in World War I – the SPAD XIII and the Fokker D VII – as they dueled in the skies above the trenches in the closing months of the war. Never before published artwork, including fascinating cockpit illustrations, reveal several dramatic clashes between the two foes while diary entries and first-hand accounts from the pilots bring this classic World War I duel to life with intimate detail.

**Spad Fighters** Mark C. Wilkins, 2019-06-28 This book presents the evolution of one of the most famous French-made fighter aircraft of WWI--the fast, rugged Spad. From humble beginnings this airplane became the mount for such famous WWI aces as Frenchmen Georges Guynemer and René Fonck, American Eddie Rickenbacker, Italian Francesco Baracca, and many others. Illustrated with rare WWI-era photographs, this book examines how the Spad was conceived, built, and flown. Examples of surviving Spad aircraft are highlighted, as well as where they may be seen today all over the world. The book also profiles several still-existing aerodromes in the US where visitors can see a Spad being built, such as the Golden Age Air Museum in Pennsylvania. Or pay a visit to the Old Rhinebeck Aerodrome in New York and see the only flying Spad VII replica in the world! Part of the Legends of Warfare series.

*SPAD XII/XIII Aces of World War 1* Jon Guttman, 2002-05-25 This book details the exploits of the pilots who flew the hugely successful SPAD XIII and the trickier SPAD XII. Built in response to the combat inadequacies of the SPAD VII, the XIII first entered service with the French Aviation Militaire in late 1917. Despite suffering engine unreliability, the XIII enjoyed great success on the Western Front, where it was flown by numerous French, American, Italian and Belgian aces, including Eddie Rickenbacker, leading US ace of World War I. The SPAD XII, meanwhile, was the product of numerous improvements to the SPAD VII model. Entering service in July 1917, the aircraft boasted a single-shot 37 mm Puteaux cannon, which had to be hand-reloaded in flight! Tricky to fly, the XII was only issued to experienced pilots, and was flown briefly by a number of aces.

**WW1 Aircraft Performance** Anders F. Jonsson, 2023 This is the first book to comprehensively cover WW1 fighter aircraft focusing on their relative flight performance utilizing modern computer simulations and if you want to get a better understanding of how they compared to each other, then this is the book for you. Based on the simulation results, a number of myths surrounding the modeled aircraft can be put to rest and in addition, they reveal some unexpected results that go against the grain of what has become generally accepted facts about these airplanes. While anecdotal evidence runs the risk of misremembering and embellishments, hard numbers based on computer simulations are more neutral and allow a more complete picture of these aircraft to emerge revealing their true strengths and weaknesses. Another first is the detailed analysis of how the aircraft compare in terms of acceleration, dive, and sustained and instantaneous turn performance done to a level previously not attempted in a book. The aircraft covered in this book are the Albatros D.Va, Fokker Dr.I, Fokker D.VIIF, Fokker E.V, Fokker D.VIII, Nieuport 28.C1, Pfalz D.III, Pfalz D.IIIa, Pfalz D.VIII, Siemens Schukert D.IV, Sopwith Camel, Sopwith

Triplane, S.E.5a and SPAD XIII. As a background to the analysis of the results and the rationale for how the aircraft were modeled, the book also contains a brief summary of the state of the art in aerodynamics and aircraft design at the time. *Flying Fury* James Thomas Byford McCudden, 2000 James McCudden was an outstanding British fighter ace of World War I, whose daring exploits earned him a tremendous reputation and, ultimately, an untimely end. Here, in this unique and gripping first-hand account, he brings to life some of aviation history's most dramatic episodes in a memoir completed at the age of twenty-three, just days before his tragic death. During his time in France with the Royal Flying Corps from 1914 to 1918, McCudden rose from mechanic to pilot and flight commander. Following his first kill in September 1916, McCudden shot down a total of fifty-seven enemy planes, including a remarkable three in a single minute in January 1918. A dashing patrol leader, he combined courage, loyalty and judgement, studying the habits and psychology of enemy pilots and stalking them with patience and outstanding success. Written with modesty and frankness, yet acutely perceptive, *Flying Fury* is both a valuable insight into the world of early aviation and a powerful account of courage and survival above the mud and trenches of Flanders. Fighter ace James McCudden died in July 1918, after engine failure caused his plane to crash just four months before the end of World War I. His success as one of Britain's deadliest pilots earned him the Victoria Cross.

**SPAD VII Aces of World War 1** Jon Guttman, 2001-08-25 Built by the 'Société Anonyme Pour l'Aviation et ses Dérivés', (SPAD), the SPAD VII was the first successful fighting scout design to emerge from the company that had traded as Duperdussin pre-war. Flown 'from the off' by aces Paul Sauvage and Georges Guynemer, the scouts made an immediate impression. Indeed, the latter pilot was so impressed that he dubbed the Type VII the 'flying machine gun'. The first of two volumes on SPAD aces, this book tells the whole story from the ace perspective. By the time production of the SPAD VII ended in the final months of 1918, around 6000 examples had been built, and Allied aces on every front had enjoyed success with the type.

*SPAD VII vs Albatros D III* Jon Guttman, 2011-04-19 When originally conceived, the French SPAD VII and German Albatros D II represented steps away from an emphasis on maneuver in aerial combat in favor of speed and durability - factors that came into play in hit-and-run tactics. At the end of 1916, however, Albatros tried to have the best of both worlds by incorporating the sesquiplane wing of the nimble Nieuport 17 into its D III. The result combined the better downward view and maneuverability of the Nieuport with the power and twin machine guns of the Albatros D II, but at a high price - a disturbing tendency for the single-spar lower wing to fail in a dive. While Albatros (and the Austrian Oeffag firm, which built the fighter under license) sought to alleviate that weakness with various reinforcing measures, the Germans developed tactics to maximize the D III's strengths and minimize its shortcomings. At the same time, the French worked to improve the SPAD VII with more power and a more reliable cooling system before moving on to the twin-gunned SPAD XIII. While all that was going on, the Albatros D III became a mainstay of the German and Austro-Hungarian air services in frequent encounters with SPAD VIIIs flown by French, Belgian, British, Italian and American airmen.

Combat Squadrons of the Air Force; World War II. Maurer Maurer, 1969 This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, *Air Force Combat Units of World War II*. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth

anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

**Eugene Bullard** Larry Greenly,2016-04-04 This fast-paced and informative YA biography tells the story of pioneering black aviator Eugene Bullard from his birth in 1895 to his combat experiences in both World War I and II and, finally, the prejudice he faced on his return to America.

**The Stand** Stephen Skinner,2008 The last great mystery of World War I has been solved. Drawing from more than two thousand pages of unpublished material, archeological digs in France and dozens of interviews with the descendents of those involved, *The Stand: The Final Flight of Lt. Frank Luke, Jr.* writes the last chapter on the life and death of Americas most spectacular fighter pilot. After fifteen years of research, author and Telly Award-winning television host Stephen Skinner pens a driving, dynamic account that fills in the blanks left behind byhistoryafter the legendary Arizona balloon buster died under controversial circumstances deep in enemy lines in September of 1918.

The United States in World War I James T. Controvich,2023-05-08 With the centennial of the First World War rapidly approaching, historian and bibliographer James T. Controvich offers in *The United States in World War I: A Bibliographic Guide* the most comprehensive, up-to-date reference bibliography yet published. Organized by subject, this bibliography includes the full range of sources: vintage publications of the time, books, pamphlets, periodical titles, theses, dissertations, and archival sources held by federal and state organizations, as well as those in public and private hands, including historical societies and museums. As Controvich's bibliographic accounting makes clear, there were many facets of World War I that remain virtually unknown to this day. Throughout, Controvich's bibliography tracks the primary sources that tell each of these stories—and many others besides—during this tense period in American history. Each entry lists the author, title, place of publication, publisher, date of publication, and page count as well as descriptive information concerning illustrations, plates, ports, maps, diagrams, and plans. The armed forces section carries additional information on rosters, awards, citations, and killed and wounded in action lists. *The United States in World War I: A Bibliographic Guide* is an ideal research tool for students and scholars of World War I and American history.

*Fokker D VII Aces of World War 1* Norman Franks,Greg VanWyngarden,2003-03-25 Designed in a great rush at the end of 1917 just in time to take part in the German standard fighter competition held in January/February 1918, the D VII easily walked away with first prize. As Germanys premier fighter unit, von Richthofens JG I (led by Hermann Göring in the wake of the 'Red Baron's' recent death) received the first examples of the D VII to reach the frontline in late April. Built to oppose the new generation of French SPAD XIIIs and British SE 5as and Camel fighters, the D VII was arguably the best all-round fighting scout of the Great War.

**Fokker Dr I Aces of World War 1** Norman Franks,2001-08-25 Undoubtedly the most famous fighter type to see service on either side during World War 1, the Fokker Dr I was a revelation when it entered service on the western front

in 1917. Manfred von Richthofen's JG 1 'circus' was the first Jasta to completely re-equip with the new fighter, and in the skilled hands of its numerous aces the Dr I proved a formidable opponent. The Dr I remained in service on the Western Front until replaced by the superior Fokker D VII in May 1918. Just weeks prior to that, however, Germany's leading ace, the great 'Red Baron', had been killed at the controls of a Dr I.

*50 Aircraft That Changed the World* Ron Dick, Dan Patterson, 2020-09 The flying machines that pushed the boundaries of aerospace development. Dick and Patterson have made unusually fine choices.... Reasonable affection for aircraft is shown throughout this attractive, literate volume. Recommended. General readers. --Choice The team's selections are defensible, and the illustrations, sidebars, pilot and aircraft profiles, and human-interest stories are all fresh, appealing, and insightful. Recommended for all aeronautical collections. --Library Journal A close-up survey of 50 of arguably the most remarkable and influential aircraft in aviation history.... Beautifully presented... this book will grace the coffee table of any aviation aficionado. --Airforce Magazine In December of 2019, Vancouver-based airline Harbour Air took to the sky in a 1956 Havilland Beaver retrofitted to fly on battery power. Eschewing gasoline and easily able to fly commuter distances, this old new plane took the first steps of 21st-century flight. *50 Aircraft That Changed the World* is about exactly this type of flight revolution. Written by the authors of the widely acclaimed *Aviation Century* series, it profiles 50 of history's most influential aircraft and their pilots and designers. Now an aviation classic, the book has been reformatted to a smaller size but otherwise remains the same. It begins with the 1905 Wright Flyer III, and moves on to the birth of aerial warfare in World War I, the trailblazers of the interwar years, classic World War II aircraft, the jets of the Korean and Vietnam wars, modern commercial carriers, private jets, experimental designs and new combat fighters featuring stealth technology. Featured aircraft in *50 Aircraft That Changed the World* include: Fokker E.111 Charles Lindbergh's Ryan NYP Amelia Earhart's Lockheed Vega Messerschmitt Bf 109 Supermarine Spitfire Boeing B-17 Avro Lancaster De Havilland Mosquito Howard Hughes's Lockheed Constellation Concorde Learjet Boeing B-52 Rutan Voyager. Hundreds of color and archival photographs enhance the informative and entertaining text making this an ideal choice for aviation buffs.
