The Apocalypse James P. Bourke, 2014-08-30 The collection of poems I have compiled here are mostly of a spiritual nature with religious and political viewpoints. Some have a twist of humor. In The Apocalypse, I pose a theological argument with interpretations. As a poet, I've aspired to be like a Milton, Keats, Blake, or Dante. I'm hoping I achieved a little of that. I spent four years working on this collection.

The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency William Boone Bonvillian, Richard Van Atta, Patrick Windham, 2020-01-09 The authors have done a masterful job of charting the important story of DARPA, one of the key catalysts of technological innovation in US recent history. By plotting the development, achievements and structure of the leading world agency of this kind, this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change, pandemics, cyber security and other global problems of our time. The DARPA Model provides a useful guide for governmental agency and policy leaders, and for anybody interested in the role of governments in technological innovation. —Dr. Kent Hughes, Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world's most successful advanced technology agency. Drafted by the leading US experts on DARPA, it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume. It reviews DARPA's unique role in the U.S. innovation system, as well as the challenges DARPA and its clones face today. As the American model is being considered for adoption by a number of countries worldwide, this book makes a welcome and timely contribution to the

policy dialogue on the role played by governments in stimulating technological innovation. — Prof. Charles Wessner, Georgetown University The U.S. Defense Advanced Research Projects Agency (DARPA) has played a remarkable role in the creation new transformative technologies, revolutionizing defense with drones and precision-guided munitions, and transforming civilian life with portable GPS receivers, voice-recognition software, self-driving cars, unmanned aerial vehicles, and, most famously, the ARPANET and its successor, the Internet. Other parts of the U.S. Government and some foreign governments have tried to apply the 'DARPA model' to help develop valuable new technologies. But how and why has DARPA succeeded? Which features of its operation and environment contribute to this success? And what lessons does its experience offer for other U.S. agencies and other governments that want to develop and demonstrate their own 'transformative technologies'? This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives, combining to chart an important story from the Agency's founding in the wake of Sputnik, to the current attempts to adapt it to use by other federal agencies. Informative and insightful, this guide is essential reading for political and policy leaders, as well as researchers and students interested in understanding the success of this agency and the lessons it offers to others.

*HEARTS IN STONE* TIMOTHY BRETT, 2014-05-16 Thutmose strode towards the door, opened it, and shouted at the guards, Call for my scribes and my vizier immediately. I have need of them. Then, turning to face Ptahmose, he said, I will make this declaration, and it can be displayed tomorrow morning as the sun rises. Now leave me, priest; I have to don my armour for the chariot race that awaits me. Bowing low to hide the triumph in his eyes, Ptahmose turned and left the room. His heart was pounding with the rush of adrenalin that surged through his veins. He had successfully achieved all that he had been instructed to do by the fallen light beings. The great Pharaoh had just unknowingly given up his power to Ptahmose, and Ptahmose dreamed of his rewards.. He almost floated out of the palace, such was his euphoria. He was not to know just how short-lived his success would be.

The Brain Moves C. Mark Riden, M.Ed., B.A., B.A., 2014-10-09 In his 2014 book, *The Brain Moves*, author C. Mark Riden, M.Ed., B.A., B.A. provides the artillery needed to repel the epidemic of brain trauma sweeping through American athletic and military culture like an Oklahoma storm ripping and tearing its way across a landscape. Riden's investigative work in traumatic brain injury (TBI) looks at two distinct populations affected by closed blunt force trauma (CBFT): Current and former athletes who play or have played contact sports and military combat veterans home from war looking for a new sense of belonging. CBFT refers to an object or person impacting the head or helmet causing the brain to move inside the cranium. When the brain becomes overwhelmed by closed blunt impact, ungovernable acceleration and deceleration forces inside the cranium obtrusively contort the brain causing immediate and long-term neuronal damage. Riden's work covers detailed collegiate research studies and an extensive interrogation of scholarly and non-scholarly evidence. Beginning with discussion on biomechanics and the physiological makeup of what Riden calls the twenty-first century biological super-athlete, the author deposits eight dynamic chapters of TBI information on problems discovered in youth, college, and professional sports as well as the United States military. Passionate about providing empirical confirmation on TBI during a time of injurious uncertainty in sports where athletes and soldiers are bigger, stronger, and faster, Riden's propositions, solutions, and theories are directed at reducing CBFT frequency, social maladaptation, and cognitive disruption. Supported by data, Riden's book delivers a unique synthesis on the underpinnings of TBI associated with social competition, human nature, and cultural history. Drawn to amphitheaters of opposition, awkwardly the environments in which we have selected to compete are now killing us. Clearly, it is a gladiator's future we have chosen for ourselves. Confronting and adapting to TBI through education will be part of that future.
