- 📖 **The Knowledge** Lewis Dartnell, 2015-03-10 How would you go about rebuilding a technological society from scratch? If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors? What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible? Human knowledge is collective, distributed across the population. It has built on itself for centuries, becoming vast and increasingly specialized. Most of us are ignorant about the fundamental principles of the civilization that supports us, happily utilizing the latest—or even the most basic—technology without having the slightest idea of why it works or how it came to be. If you had to go back to absolute basics, like some sort of postcataclysmic Robinson Crusoe, would you know how to re-create an internal combustion engine, put together a microscope, get metals out of rock, or even how to produce food for yourself? Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide, adapted to cataclysmic circumstances. The Knowledge describes many of the modern technologies we employ, but first it explains the fundamentals upon which they are built. Every piece of technology rests on an enormous support network of other technologies, all interlinked and mutually dependent. You can't hope to build a radio, for example, without understanding how to acquire the raw materials it requires, as well as generate the electricity needed to run it. But Dartnell doesn't just provide specific information for starting over; he also reveals the greatest invention of them all—the phenomenal knowledge-generating machine that is the scientific method itself. The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world.

- 📖 **Snail World** Aleia Murawski, Sam Copeland, 2020-11-16 Snail World: Life in the Slimelight is a collection of absorbing snapshots from an alternate universe where snails drink bubble tea at the mall, hit tiny bongos, and get beamed up into flying saucers. Real snails and frogs bring to life miniature scenes meticulously created by artists Aleia Murawski and Sam Copeland, inspired by moody, cinematic moments and nostalgic Americana. These dreamlike and often hilarious images evoke the melodrama of daily life: a snail alone in an apartment with one last box to move; two snails getting slime all over grandma's plastic-covered armchairs; a frog doing karaoke in a heart-shaped hot tub. With hidden details to discover each time you flip through the pages, Snail World is a quirky celebration of the (very) little things in life. By Aleia Murawski and Sam Copeland. Hardcover with debossed image and spot gloss on cover. 80 pages, full color interior. Published by Broccoli. Measures 7 x 9 1/4.
- 📖 **Dinosaurs and Dioramas** Sarah J Chicone, Richard A Kissel, 2016-06-16 Two experienced exhibit designers lead you through the complex process of design and installation of natural history exhibitions. The authors introduce the history and function of natural history museums and their importance in teaching visitors the basic principles of science. The book then offers you practical tricks and tips of the trade, to allow museums, aquaria, and zoos—large or small—to tell the story of nature and science. From overall concept to design, construction, and evaluation, the book carries you through the process step-by-step, with emphasis on the importance of collaboration and teamwork for a successful installation. A crucial addition to the bookshelf of anyone involved in exhibit design or natural
