### **Stirling Engine Design Manual William**

Martini,2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

Handbook on High-Speed Rail and Quality of Life  
Yoshitsugu Hayashi, Ke Seetha Ram, Shreyas Bharule, 2020-12-29 Handbook on High-Speed Rail and Quality of Life outlines global experiences of high-speed rail development, including its

construction, impacts, and planning, with a special focus on countries that are planning implementation in the coming decade. High-speed rail infrastructure can bring considerable socioeconomic benefits that cannot be captured through econometric modeling alone. Thus, analysis of the true impacts requires a scalar as well as a temporal lens. The studies in this handbook discuss transport infrastructure projects of varying geographic scale and describe the underlying complexities of developing an infrastructure system while focusing on the aspects that can enhance quality of life. The cases, concepts, and ideas presented in this handbook were discussed and refined during a conference and seminar series held at the Asian Development Bank Institute in Tokyo and special sessions on transport and quality of life at the 15th World Conference on Transport Research at the Indian Institute of Technology Bombay in Mumbai. The special sessions were jointly organized by the Asian Development Bank Institute and World Conference on Transport Research Society Special Interest Group A4, High-Speed Rail: Policy, Investment, and Impacts. The conference and special sessions highlighted critical issues and delivered key messages on the broad research on high-speed rail and quality of life.

**Urban Resilience for Emergency Response and Recovery** Gian Paolo Cimellaro, 2016-06-04 This book introduces the concepts of Resilience-Based Design (RBD) as an extension of Performance-Based Design. It provides readers with a range of cutting-edge methodologies for evaluating resilience and

clarifies the difference between resilience, vulnerability and sustainability. Initially, the book focuses on describing the different types of uncertainty that arise in the context of resilience evaluation. This is followed by an entire chapter dedicated to the analytical and experimental recovery functions. Then, starting from the definition of resilience provided by MCEER, an extension of the methodology is provided that introduces the seven dimensions of Community Resilience, summarized in the acronym PEOPLES. They are: Population and Demographics, Environmental/Ecosystem, Organized Governmental Services, Physical infrastructures, Lifestyle and Community Competence, Economic Development, and Socio-Cultural Capital. For each dimension, components and subcomponents are defined and the related indices are provided. Underlining the importance of the physical infrastructure dimension, the book provides several examples of applications for transportation, hydraulic, gas and power networks. The problem of interdependencies and the domino effect is also taken into account during the analysis. One of the book's closing chapters focuses on different methodologies for improving disaster preparedness and engineering mitigation strategies, while the last chapter describes the different computer platforms available on the market for evaluating Community Resilience. The book offers readers an extensive introduction to the concept of Resilience-Based Design, together with selected advanced applications for specialists. No prerequisite knowledge is needed in order to

understand the book, and the Appendix offers valuable supplemental information on e.g. the probabilistic concepts. As such, the book offers a valuable resource for graduate students, young engineers and researchers who are interested in the topic, and can also be used as a supplementary text in graduate level Disaster Resilience courses.

#### Meaning-Making for Living Koji

Komatsu, 2019-11-14 This Open Access Brief analyzes the dynamics in which children's selves emerge through their everyday activities of meaning construction, both in their relationships with family and within school education. It begins with a discussion of new psychological inquiries into children's selves and builds upon the innovative theoretical notion of the Presentational Self, developed by the author over the last decade. The book illustrates how the observation of children's meaning construction in their everyday lives becomes a starting point for theoretical and empirical inquiries into child development and gives a framework that promotes new inquiries in this area. The book describes the Presentational Self Theory as a sense of how the notion of the Self is being worked upon in everyday life encounters. Chapters feature in-depth analyses of exchanges between adults and children in the Japanese cultural context. Meaning-Making for Living will be of interest to researchers and graduate students in the fields of cognitive, social, developmental, educational, and cultural psychology.

*Human and Animal Models for Translational Research on Neurodegeneration: Challenges and Opportunities From South America* Agustín Ibáñez, Lucas Sedeño, Adolfo M. García, Robert M.J. Deacon, Patricia Cogran,2018-06-21 Neurodegenerative diseases are the most frequent cause of dementia, representing a burden for public health systems (especially in middle and middle-high income countries). Although most research on this issue is concentrated in first-world centers, growing efforts in South America are affording important breakthroughs. This emerging agenda poses new challenges for the region but also new opportunities for the field. This book aims to integrate the community of experts across the globe and the region, and to establish new challenges and developments for future investigation. We present research focused

on neurodegenerative research in South America. We introduce studies assessing the interplay among genetic, neural, and behavioral dimensions of these diseases, as well as articles on vulnerability factors, comparisons of findings from various countries, and works promoting multicenter and collaborative networking. More generally, our book covers a broad scope of human-research approaches (behavioral assessment, neuroimaging, electromagnetic techniques, brain connectivity, peripheral measures), animal methodologies (genetics, epigenetics, proteomics, metabolomics, other molecular biology tools), species (all human and non-human animals, sporadic, and genetic versions), and article types (original research, review, and opinion papers). Through this wide-ranging proposal, we hope to introduce a fresh approach to the challenges and opportunities of research on neurodegeneration in South America.

Daido Moriyama Mark Holborn, 2017-09-12 Inspired by the work of an earlier generation of Japanese photographers, especially by Shomei Tomatsu, and by William Klein's seminal photographic book on New York, Daido Moriyama moved from Osaka to Tokyo in the early sixties to become a photographer. He became the leading exponent of a fierce new photographic style that corresponded perfectly to the abrasive and intense climate of Tokyo during a period of great social upheaval. His black and white pictures were marked by fierce contrast and fragmentary, even scratched, frames, which concealed his virtuoso printing. Between June 1972 and July 1973 he produced his own magazine

publication, Kiroku, which was then referred to as Record. It became a diaristic journal of his work as it developed. Ten years ago he was able to resume publication of Record, which gradually expanded in extent. To date he has published thirty issues, a number of them including colour. The publication of Record as a book enables work from all thirty issues to be edited into a single sequence, punctuated by Moriyama's own text as it appeared in the magazines. It used to be assumed that Moriyama's peculiarly Japanese style was tied to his Tokyo roots. The evidence of the last ten years demonstrates that Moriyama, a restless world traveller, has been able to apply his unique vision to northern Europe, southern France, the cities of Florence, London, Barcelona, Taipei, Hong Kong, New York and Los Angeles as well as to the alleys of Osaka, and the landscape of Hokkaido. The book ends in Afghanistan.

### **Alternative Diesel Fuels** Daniel J

Holt,2004-01-01 A key topic of many technical discussions has been the development of alternative fuels to power the compression ignition engine. Reasons for this include the desire to reduce the dependency on petroleum-based fuel and, at the same time, to reduce the particulate matter (PM) and NOx emissions. Also, there has been interest generated in the diesel engine because of the reduction in greenhouse gases that has been proposed during the 2008-2012 time frame in Europe and the regulations that affect diesel engines in the United States.

*Multisensory Human-Food Interaction* Carlos Velasco,Anton Nijholt,Kasun Karunanayaka,2018-07-26 Our food experiences can be significantly influenced by both intrinsic and extrinsic multisensory information. Therefore, it is crucial to understand and apply the principles that govern the systematic connections that exist between the senses in the context of Human-Food Interaction (HFI). In our Research Topic, namely Multisensory Human-Food Interaction (MHFI),

several studies that consider such connections in the context of HFI are presented. We also have contributions that focus on multisensory technologies that can be used to share and reproduce specific HFIs. This eBook, which resulted from the Research Topic, presents some of the most recent developments in the field of MHFI. In particular, it consists of two main sections and corresponding articles. The eBook begins with the Editorial, which provides an overview of MHFI. Then, it includes six articles that relate to principles in MHFI and three on technologies in MHFI. We hope that the different contributions featured here will support future developments in MHFI research.

Stargrave Joseph A. McCullough, 2021-04-29 In a galaxy torn apart by the Last War, vast pirate fleets roam from system to system, robbing, extorting, and enslaving. Amidst this chaos, thousands of independent operators – smugglers, relic hunters, freedom fighters, and mercenaries – roam the dead stars in small ships, scratching out a living any way they can. In *Stargrave*, players take on the role of one of these independent operators, choosing from a range of backgrounds each with their own strengths, weaknesses, and associated powers. Next, players must hire a crew for their ship, recruiting a lieutenant with a unique skill-set and a handful of soldiers, mechanics, hackers, and other specialists. Some captains may even recruit strange alien lifeforms with abilities no humanoid could ever possess. Once the players' crews are assembled, they are ready to dive into a campaign. Over a series of

games, their crews will have the chance to carry out a variety of missions – recovering lost technology, stealing data, freeing slaves, and fighting back against the pirate fleets. In time, as the crews gain experience, they will become more powerful and hire more talented specialists. The more they grow, however, the more likely it is that a pirate fleet will take note of their activities and come after them!

*Optoelectronic Properties of Graphene-Based van der Waals Hybrids* Kallol Roy, 2020-10-21 This thesis deals with the development and in-depth study of a new class of optoelectronic material platform comprising graphene and MoS<sub>2</sub>, in which MoS<sub>2</sub> is used essentially to sensitize graphene and lead to unprecedentedly high gain and novel opto-electronic memory effects. The results presented here open up the possibility of designing a new class of photosensitive devices which can be utilized in various optoelectronic applications including biomedical sensing, astronomical sensing, optical communications, optical quantum information processing and in applications requiring low intensity photodetection and number resolved single photon

detection.
