📖 **StarCraft: Ghost--Spectres** Nate Kenyon,2011-09-27 Dominion ghosts epitomize the height of Terran evolution and physical conditioning. Augmented by technologies that harness their innate psionic potential, these lethal operatives use telepathy and other superhuman powers to isolate and destroy the enemies of the Dominion. But when the hunters become the hunted and ghosts start disappearing without a trace, even the most dangerous human soldiers in the Koprulu sector have something to fear... Enter Nova Terra, a ghost of unparalleled ability. On orders from Emperor Arcturus Mengsk, Nova embarks on a secret mission to find her missing comrades. As her investigation leads down a maze of dark corridors, painful memories of her pre-ghost years begin to surface. Soon, Nova learns that there might be a connection between the missing agents and her past, a discovery that will pit her against both the shadows of her youth and a terrifying new breed of psionic warrior: Spectres. This is the story that StarCraft fans have been waiting for—a pulse-pounding adventure based on the never-released StarCraft: Ghost tactical-action console game. StarCraft: Ghost—Spectres unveils a tumultuous chapter in Nova’s life and the insidious origins of the Spectres featured in StarCraft II: Wings of Liberty, the record-breaking sequel to Blizzard Entertainment’s highly praised real-time strategy games StarCraft and StarCraft: Brood War.

📖 **StarCraft: Ghost--Nova** Blizzard Entertainment,Keith R. A. DeCandido,2007-05-01 Four years after the end of the Brood War, Emperor Arcturus Mengsk has rebuilt much of the Terran Dominion and consolidated a new military force despite an ever-present alien threat. Within this boiling cauldron of strife and subversion, a young woman known only as Nova shows the potential to become Mengsk’s most lethal and promising ghost operative. Utilizing a combination of pure physical aptitude, innate psychic power, and advanced technology, Nova can strike anywhere with the utmost stealth. Like a phantom in the shadows, she exists only as a myth to the enemies of the Terran Dominion. Yet Nova wasn’t born a killer. She was once a privileged child of one of the old families of the Terran Confederacy, but her life changed forever when a rebel militia murdered her family. In her grief, Nova unleashed her devastating psychic powers, killing hundreds in a single, terrible moment. Now, on the run through the slums of Tarsonis, she is unable to trust anyone. Pursued by a special agent tasked with hunting down rogue telepaths, Nova must come to terms with both her burgeoning powers and her guilt -- before they consume her and destroy everything in her path....

📖 **Spectroscopy for Amateur Astronomers** Marc F. M. Trypsteen,Richard Walker,2017-07-20 This accessible guide presents the astrophysical concepts behind astronomical spectroscopy, covering both the theory and the practical elements of recording, processing, analysing and interpreting your spectra. It covers astronomical objects, such as stars, planets, nebulae, novae, supernovae, and events such as eclipses and comet passages. Suitable for anyone with only a little background knowledge and access to amateur-level equipment, the guide’s many illustrations, sketches and figures will help you understand and practise this scientifically important and growing field of amateur astronomy, up to the level of pro-am collaborations. Accessible to non-academics, it benefits many groups from novices and learners in astronomy clubs, to advanced students and teachers of astrophysics. This volume is the perfect companion to the Spectral Atlas for Amateur Astronomers, which provides detailed commented spectral profiles of more than 100 astronomical objects.

📖 **Shadow of the Xel’naga** Gabriel Mesta,2002-01-19 Far in the future, 60,000 light-years from Earth, a loose confederacy of Terran exiles are locked in battle with the enigmatic Protoss and the ruthless Zerg swarm. Each species struggles to ensure its own survival among the stars in a war that will herald the beginning of mankind’s greatest chapter -- or foretell its violent, bloody end. Bhekar Ro: a bleak, backwater world on the fringe of the Terran Dominion, where every day is a struggle to survive for its handful of human colonists. It is a veritable wasteland -- one speck of dust among many in the vast, dark sea of space. But when the most violent storm in recent memory unearths an unfathomable alien artifact, Bhekar Ro becomes the greatest prize in the Terran sector -- the Holy Grail of the Zerg, the Protoss, and humanity alike -- as forces from the three great powers converge to claim the lost secrets of the most powerful species the universe has ever known. Shadow of the Xel’naga An original tale of space warfare novels set in the world of the bestselling computer game!

📖 **Photographing the Deep Sky** Chris Baker,2018 Spectacular nebulae where stars are born, beautiful star clusters from the early formation of the Milky Way, and galaxies as far as a billion light years away, all feature in this book of stunning images from astro photographer Chris Baker. The author takes the reader on a journey through time and space to the Deep Sky, far beyond our solar system. It is a pictorial description of the awe-inspiring wondrous objects that exist out there. The images are of objects from hundreds to many millions of light years away; distances of such enormity are hard for our minds to grasp. The book presents fascinating information on what the Earth was like when the light started its earth-bound journey through space. For example, as the light left the Andromeda galaxy 2.5 million years ago on its interstellar journey to Chris’s telescope, the Himalayas are still being raised. Chapters are included describing the basics of astrophotography, as modern telescopes and cameras make this a rewarding hobby well within reach of the amateur astronomer. Chris describes his observatory in the mountains of Spain along with practical guidance on how to get started in astronomy. With a concise, clear discussion on the background of astronomical science, this is above all, a book to celebrate the beauty and fascination of space.

📖 **Constellations** Govert Schilling,2019-06-04 Perfect for stargazers and armchair astronomers of all ages, Constellations is a beautifully illustrated, fascinating guide to all 88 constellations, including an illustrated star map for each. In Constellations, award-winning astronomy writer Govert Schilling takes us on an unprecedented visual tour of all 88 constellations in our night sky. Much more than just a stargazer’s guide, Constellations is complete history of astronomy as told by Schilling through the lens of each constellation. The book is organized alphabetically by constellation. Profiles of each constellation include basic information such as size, visibility, and number of stars, as well as information on the discovery and naming of the constellation and associated lore. Beyond details about the constellation itself is information about every astronomical event that took place or discovery made in the vicinity of the constellation. In the constellation of Cygnus (the Swan) we encounter the location of the first confirmed black hole. A stop at Gemini (the Twins) is a chance to say hello to the dwarf planet Pluto, and in Orion (the Hunter) we find the location of the first identified gamma-ray burst. Stunning star maps throughout the book by acclaimed star mapmaker Wil Tirion show us the exact location of every constellation, the details of its structure, as well as its surrounding astronomical neighbors.

📖 **The Hundred Greatest Stars** James B. Kaler,2006-05-07 While there are guides to the visible sky, this is the first book to encompass the most important stars known in the universe at a level accessible to the layperson. The noted astronomer James Kaler takes us on a tour of the 100 most interesting stars, describing their characteristics and importance in words and vivid pictures. James B. Kaler is an internationally recognized expert on stars and their formation. A professor of astronomy at the University of Illinois, he is the author of Stars and Their Spectra (Cambridge), Stars (Freeman/Scientific American Library), Cosmic Clouds (Freeman/Scientific American Library), and numerous articles for popular and professional astronomy magazines.

📖 **StarCraft: I, Mengsk** Graham McNeill,2008-12-30 Sixty-thousand light-years from Earth, the corrupt Terran Confederacy holds the Koprulu sector tightly in its tyrannical grip, controlling every aspect of its citizens’ lives. One man dares to stand up to this faceless empire and vows to bring it to its knees: Arcturus Mengsk -- genius propagandist, tactician, and freedom fighter. A monstrous act of bloody violence sows the seeds of rebellion in Arcturus, but he is not the first Mengsk to rail against such oppression. Before Arcturus grew to manhood, his father, Angus Mengsk, also defied the Confederacy and sought to end its brutal reign. The destiny of the Mengsk family has long been tied to that of the Confederacy and the Koprulu sector, but as a new empire rises from the ashes of the past and alien invaders threaten the very existence of humanity, what will the future hold for the next generation...?

📖 **My Heart Is a Chainsaw** Stephen Graham Jones,2021-08-31 Winner of the Bram Stoker Award for Best Novel In her quickly gentrifying rural lake town Jade sees recent events only her encyclopedic knowledge of horror films could have prepared her for in this latest chilling novel that “will give you nightmares. The good kind, of course” (BuzzFeed) from the Jordan Peele of horror literature, Stephen Graham Jones. “Some girls just don’t know how to die...” Shirley Jackson meets Friday the 13th in My Heart Is a Chainsaw, written by the New York Times bestselling author of The Only Good Indians Stephen Graham Jones, called “a literary master” by National Book Award winner Tananarive Due and “one of our most talented living writers” by Tommy Orange. Alma Katsu calls My Heart Is a Chainsaw “a homage to slasher films that also manages to defy and transcend genre.” On the surface is a story of murder in small-town America. But beneath is its beating heart: a biting critique of American colonialism, indigenous displacement, and gentrification, and a heartbreaking portrait of a broken young girl who uses horror movies to cope with the horror of her own life. Jade Daniels is an angry, half-Indian outcast with an abusive father, an absent mother, and an entire town that wants nothing to do with her. She lives in her own world, a world in which protection comes from an unusual source: horror movies...especially the ones where a masked killer seeks revenge on a world that wronged them. And Jade narrates the quirky history of Proofrock as if it is one of those movies. But when blood actually starts to spill into the waters of Indian Lake, she pulls us into her dizzying, encyclopedic mind of blood and masked murderers, and predicts exactly how the plot will unfold. Yet, even as Jade drags us into her dark fever dream, a surprising and intimate portrait emerges...a portrait of the scared and traumatized little girl beneath the Jason Voorhees mask: angry, yes, but also a girl who easily cries, fiercely loves, and desperately wants a home. A girl whose feelings are too big for her body. My Heart Is a Chainsaw is her story, her homage to horror and revenge and triumph.
