Cooper Cars Doug Nye,2003 No stone was left unturned in researching this book. This incredibly comprehensive work includes many items from John Cooper's personal records and photo albums, the company's chassis books, as well as 300-plus black-and-white photos and 16 color images. Further unique archival material comes from many of those involved in building the cars and the cars' subsequent owners. Unquestionably regarded as the benchmark work on Cooper, the cars so significant in the development of postwar racing car design.Originally published in 1983 ISBN 1-85532-919-0 Winner of the Montagu Trophy and the Pierre Dreyfus Award

Team Lotus Andrew Ferguson,2008 Team Lotus took the Indianapolis 500 race by storm between 1963 and 1969. In a race previously dominated by home-grown American cars and drivers, double Formula 1 World Champion Jim Clark scored a stunning victory in 1965, and twice finished second in his Lotus cars powered by Ford engines. Here is the definitive inside story of how - encouraged by the great Dan Gurney - the tiny British Lotus team, headed by Colin Chapman, took aim at an icon of American sporting life and rewrote motor racing history. First published in 1996 and out of print for years.

Turn-taking in human communicative interaction Judith Holler,Kobin H. Kendrick,Marisa Casillas,2016-05-09 The core use of language is in face-to-face conversation. This is characterized by rapid turn-taking. This turn-taking poses a number central puzzles for the psychology of language. Consider, for example, that in large corpora the gap between turns is on the order of 100 to 300 ms, but the latencies involved in language production require minimally between 600 ms (for a single word) or 1500 ms (for as simple sentence). This implies that participants in conversation are predicting the ends of the incoming turn and preparing in advance. But how is this done? What aspects of this prediction are done when? What happens when the prediction is wrong? What stops participants coming in too early? If the system is running on prediction, why is there consistently a mode of 100 to 300 ms in response time? The timing puzzle raises further puzzles: it seems that comprehension must run parallel with the preparation for production, but it has been presumed that there are strict cognitive limitations on more than one central process running at a time. How is this bottleneck overcome? Far from being 'easy' as some psychologists have suggested, conversation may be one of the most demanding cognitive tasks in our everyday lives. Further questions naturally arise: how do children learn to master this demanding task, and what is the developmental trajectory in this domain? Research shows that aspects of turn-taking, such as its timing, are remarkably stable across languages and cultures, but the word order of languages varies enormously. How then does prediction of the incoming turn work when the verb (often the informational nugget in a clause) is at the end? Conversely, how can production work fast enough in languages that have the verb at the beginning, thereby requiring early planning of the whole clause? What happens when one changes modality, as in sign languages - with the loss of channel constraints is turn-taking much freer? And what about face-to-face communication amongst hearing individuals - do gestures, gaze, and other body behaviors facilitate turn-taking? One can also ask the phylogenetic question: how did such a system evolve? There seem to be parallels (analogies) in duetting bird species, and in a variety of monkey species, but there is little evidence of anything like this among the great apes. All this constitutes a neglected set of problems at the heart of the psychology of language and of the language sciences. This Research Topic contributes to advancing our understanding of these problems by summarizing recent work from psycholinguists, developmental psychologists, students of dialog and conversation analysis, linguists, phoneticians, and comparative ethologists.

Technical, Economic and Societal Effects of Manufacturing 4.0 Mikael Collan,Karl-Erik Michelsen,2020-07-28 This open access book is among the first cross-disciplinary works about Manufacturing 4.0. It includes chapters about the technical, the economic, and the social aspects of this important phenomenon. Together the material presented allows the reader to develop a holistic picture of where the manufacturing industry and the parts of the society that depend on it may be going in the future. Manufacturing 4.0 is not only a technical change, nor is it a purely technically driven change, but it is a societal change that has the potential to disrupt the way societies are constructed both in the positive and in the negative. This book will be of interest to scholars researching manufacturing, technological innovation, innovation management and industry 4.0.

Ancient Mesopotamia A. Leo Oppenheim,2013-01-31 This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria.--Edward B. Garside, New York Times Book Review Ancient Mesopotamia--the area now called Iraq--has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written.--Leonard Cottrell, Book Week Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research.--Samuel Noah Kramer, Archaeology A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

The Cambridge Handbook of Group Interaction Analysis Elisabeth Brauner,Margarete Boos,Michaela Kolbe,2018-08-02 This Handbook provides a compendium of research methods that are essential for studying interaction and communication across the behavioral sciences. Focusing on coding of verbal and nonverbal behavior and interaction, the Handbook is organized into five parts. Part I provides an introduction and historic overview of the field. Part II presents areas in which interaction analysis is used, such as relationship research, group research, and nonverbal research. Part III focuses on development, validation, and concrete application of interaction coding schemes. Part IV presents relevant data analysis methods and statistics. Part V contains systematic descriptions of established and novel coding schemes, which allows quick comparison across instruments. Researchers can apply this methodology to their own interaction data and learn how to evaluate and select coding schemes and conduct interaction analysis. This is an essential reference for all who study communication in teams and groups.

Women in Kararau Brigitta Hauser-Schäublin, 2019 The book offers a glimpse back in time to a Middle Sepik society, the Iatmul, first investigated by the anthropologist Gregory Bateson in the late 1920s while the feminist anthropologist Margaret Mead worked on sex roles among the neighbouring Tchambuli (Chambri) people. The author lived in the Iatmul village of Kararau in 1972/3 where she studied women's lives, works, and knowledge in detail. She revisited the Sepik in 2015 and 2017. The book, the translation of a 1977 publication in German, is complemented by two chapters dealing with the life of the Iatmul in the 2010s. It presents rich quantitative and qualitative data on subsistence economy, marriage, and women's knowledge concerning myths and rituals. Besides, life histories and in-depth interviews convey deep insights into women's experiences and feelings, especially regarding their varied relationships with men in the early 1970s. Since then, Iatmul culture has changed in many respects, especially as far as the economy, religion, knowledge, and the relationship between men and women are concerned. In her afterword, the anthropologist Christiane Falck highlights some of the major topics raised in the book from a 2018 perspective, based on her own fieldwork which she commenced in 2012. Thus, the book provides the reader with detailed information about gendered lives in this riverine village of the 1970s and an understanding of the cultural processes and dynamics that have taken place since.

Transfer of Movableables in German, French, English and Dutch Law Lars Peter Wunibald van Vliet, 2000 The subject-matter of this book is the transfer of movable property in German, French, English and Dutch law. Of particular importance is the division into the three main types of transfer system: the causal consensual system, the causal tradition system and the abstract tradition system. Here two dividing lines intertwine: the distinction between causal and abstract systems and the distinction between consensual and tradition systems. Often the existence of three different transfer systems is seen as a complicating factor in harmonizing European private law. Yet, the book demonstrates that the division between consensual systems and tradition systems and the division between causal and abstract systems are not unbridgeable.

Living the Goode Life Richard Goode, 2020-06 This is an extraordinary story, beginning with a bare-foot colonial childhood, and indeed not speaking English until he was four, yet ending up at Cambridge, ultimately dealing at the highest levels of the Russian aviation industry. Richard Goode's life has been a fascinating series of activities, both social and business, dealing with an incredible range of people from the notorious Ugandan dictator, Idi Amin, to whom he was selling banknotes (legally) to a car dealer who was embroiled in the Brinks-Mat gold robbery (illegally); dealing with Russian spies at the behest of MI5; international corporate headhunting and aerobatics at the highest levels. And all this with a huge zest for living life to the full.

The Punitive Society Michel Foucault, 2018-08-07 These thirteen lectures on the 'punitive society,' delivered at the Collège de France in the first three months of 1973, examine the way in which the relations between justice and truth that govern modern penal law were forged, and question what links them to the emergence of a new punitive regime that still dominates contemporary society. Praise for Foucault's Lectures at the Collège de France Series "Ideas spark off nearly every page...The words may have been spoken in [the 1970s], but they seem as alive and relevant as if they had been written

yesterday.”—Bookforum “Foucault is quite central to our sense of where we are...[He] is carrying out, in the noblest way, the promiscuous aim of true culture.”—The Nation “[Foucault] has an alert and sensitive mind that can ignore the familiar surfaces of established intellectual coded and ask new questions...[He] gives dramatic quality to the movement of culture.”—The New York Review of Books

Sustainability Assessment Tools in Higher Education Institutions Sandra Caeiro, Walter Leal Filho, Charbel Jabbour, Ulisses M. Azeiteiro, 2013-11-19 This book contributes to debates on current sustainability practices, with a focus on assessment tools as applied in higher education institutions. These institutions are challenged to carry out management, research, and teaching, and to create settings that allow developing new competencies to address the complex global environmental, social, cultural, and economic pressures with which current and future generations are confronted. The first chapters discuss issues of sustainability in higher education, namely the role of universities in promoting sustainability and the emergent fields of sustainability science and education for sustainable development and how to integrate and motivate sustainability into the university. Subsequent chapters present examples of sustainability assessment tools specifically developed for higher education institutions, such as the AISHE - Auditing Instrument for Sustainability in Higher Education, the GASU - Graphical Assessment of Sustainability in Universities too, the STAUNCH - Sustainability tool for Auditing Universities Curricula in Higher Education. The use of other integrated tools are also presented. The papers have adopted a pragmatic approach, characterized by conceptual descriptions, including sustainability assessment and reorienting the curricula, on the one hand, and practical experiences on the other, with good practices from different edges of the world. Sustainability Assessment Tools in Higher Education Institutions will be of interest to graduate student, lecturers, researchers, and those setting university policy.
