BRM Doug Nye, 2003-08-22 Continues to reveal the tortured history of Britain's most emotionally charged and passionately operated Formula 1 racing team. Doug Nye is the world's most respected author and researcher on the historic racing scene and Tony Rudd's distinguished motor industry career included many years as BRM designer and chief engineer. Little wonder, then, that their first volume of BRM - the Saga of British Racing Motors was hailed as the most detailed and authoritative history of a grand prix team ever published. It covered the birth of BRM, and took readers through the years of the troublesome V16 cars and the 4-cylinder 2.5-litre models of the 1950s. Now, Volume 2 of their four-volume BRM history takes the story forward into the V8 era with the last of the cars built around a tubular chassis. It covers the most successful period in the Formula 1 team's career, including the World Championship won with Graham Hill in 1962, the first two of his five wins at Monaco and the first two of his three victories in the US Grand Prix at Watkins Glen. Having unique access to the BRM company files, the authors have been able to delve deeply into the emotion-charged background to the BRM team's final emergence as a Grand Prix front runner, to their involvement in the Tasman races in Australasia and to their first foray at Le Mans with the Rover-BRM gas turbine cars. As with Volume 1, the print run of this and succeeding volumes is being restricted to 2500 numbered copies. Volume 3, to be published late-2003, will concentrate on the V8-powered monocoque cars from 1964 to 1968, leaving the final volume, to be published in 2004, to conclude the saga of BRM with the H16 and V12 cars from 1968 to 1978.* Please note: As Volume 1 is out of print, the publishers will be commissioning a short reprint of unnumbered copies later in 2003 to enable new subscribers to complete their four-volume set.

Grand Prix Cars Denis Jenkinson, 2015-10-02 " In compiling this brief history of Grand Prix racing, along with descriptions of

the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties — such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes — the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ..." (1959 - Denis Jenkinson)

The Money Shot Neil LaBute,2017-03-16 Karen and Steve are glamorous movie stars with one thing in common: desperation. It's been years since either one's had a hit, but a hot-shot European director could change that with his latest movie. The night before filming a big scene that will undoubtedly bring them back onto the pop culture radar, Karen and her partner, Bev, meet with Steve and his aspiring actress wife, Missy, in order to make an important

decision. How far will they let themselves go to keep from slipping further down the Hollywood food chain? **THE MONEY SHOT** is a hilarious and insightful comedy about ambition, art, status, and sex in an era—and an industry—where very little is sacred and almost nothing is taboo.

The Technique of Motor Racing Piero Taruffi, 1960 Written for the race driver and describes the qualities needed to be a good race car driver.

Cooper Cars Doug Nye, 2003 No stone was left unturned in researching this book. This incredibly comprehensive work includes many items from John Cooper's personal records and photo albums, the company's chassis books, as well as 300-plus black-and-white photos and 16 color images. Further unique archival material comes from many of those involved in building the cars and the cars' subsequent owners. Unquestionably regarded as the benchmark work on Cooper, the cars so significant in the development of postwar racing car design. Originally published in 1983 ISBN 1-85532-919-0 Winner of the Montagu Trophy and the Pierre Dreyfus Award

Goodwood Remembered Peter Redman, 2007 Goodwood Remembered is a unique collection of previously unpublished photographs, sketches and recollections of Peter Redman, an enthusiastic spectator. As well as over 150 of his photographs from the late 1940s and 1950s, Peter Redman has included more than 50 sketches of cars and drivers of the period and 13 of his cartoons that help bring motor racing at Goodwood between 1948 and 1960 to life. The book is full of interesting snippets. Bernie Ecclestone's second place in a 500 cc race, and World Champion Juan Manuel Fangio nursing an "off-song" Cooper-Bristol into sixth place in a Formula Libre race, are just two examples. It is a fascinating insight into the range of racing cars and drivers at Goodwood in that period: from World Champions such as Fangio, Farina and Hawthorn to handicap races for lady drivers. Goodwood

Remembered will be of great interest to anyone who remembers those times and for the huge number who follow historic motor racing or want to know more of the roots of modern motor sport.
