Twin Lights Tonic: Cape Ann's Timeless Soda Pop Paul St. Germain with Devlin Sherlock, 2021 Since 1907, one Rockport family have continued to make their timeless soda pop the old-fashioned way. Twin Lights Soda--or tonic, as it's still known locally--was started by second-generation Portuguese immigrants in the back of a small-town family grocer and named after the iconic pair of lighthouses just off the coast of Cape Ann. The bottling industry was one of America's great entrepreneurial endeavors, and at its peak, Twin Lights outsold even the two largest national cola brands in the region. But today, while soft drinks are a \$45 billion industry, few independents remain.

Authors Paul St. Germain and Dev Sherlock trace the fascinating story of one of the last family bottlers still in operation.

**The Difference Engine** William Gibson, 2011-07-26 1855: The Industrial Revolution is in full and

inexorable swing, powered by steam-driven cybernetic Engines. Charles Babbage perfects his Analytical Engine and the computer age arrives a century ahead of its time. And three extraordinary characters race toward a rendezvous with history—and the future: Sybil Gerard—a fallen woman, politician's tart, daughter of a Luddite agitator Edward "Leviathan" Mallory—explorer and paleontologist Laurence Oliphant—diplomat, mystic, and spy. Their adventure begins with the discovery of a box of punched Engine cards of unknown origin and purpose. Cards someone wants badly enough to kill for.... Part detective story, part historical thriller, *The Difference Engine* is the collaborative masterpiece by two of the most acclaimed science fiction authors writing today. Provocative, compelling, intensely imagined, it is a startling extension of Gibson's and Sterling's unique visions—and the beginning of movement we know today as "steampunk!"

Soda Politics Marion Nestle, 2015-09-07 Sodas are astonishing products. Little more than flavored sugar-water, these drinks cost practically nothing to produce or buy, yet have turned their makers-- principally Coca-Cola and PepsiCo--into a multibillion-dollar industry with global recognition, distribution, and political power. Billed as refreshing, tasty, crisp, and the real thing, sodas also happen to be so well established to contribute to poor dental hygiene, higher calorie intake, obesity, and type-2 diabetes that the first line of defense against any of these conditions is to simply stop drinking them. Habitually drinking large volumes of soda not only harms individual health, but also burdens societies with runaway healthcare costs. So how did products containing absurdly inexpensive ingredients become multibillion dollar industries and international brand icons, while also having a devastating impact on public health? In *Soda Politics*, the 2016 James Beard Award for Writing & Literature Winner, Dr. Marion Nestle answers this question by detailing all of the ways that the soft drink industry works overtime to make drinking soda as common and accepted as drinking

water, for adults and children. Dr. Nestle, a renowned food and nutrition policy expert and public health advocate, shows how sodas are principally miracles of advertising; Coca-Cola and PepsiCo spend billions of dollars each year to promote their sale to children, minorities, and low-income populations, in developing as well as industrialized nations. And once they have stimulated that demand, they leave no stone unturned to protect profits. That includes lobbying to prevent any measures that would discourage soda sales, strategically donating money to health organizations and researchers who can make the science about sodas appear confusing, and engaging in Corporate Social Responsibility (CSR) activities to create goodwill and silence critics. Soda Politics follows the money trail wherever it leads, revealing how hard Big Soda works to sell as much of their products as possible to an increasingly obese world. But Soda Politics does more than just diagnose a problem--it encourages readers to help find solutions. From Berkeley to Mexico City and beyond, advocates are successfully countering the relentless marketing, promotion, and political protection of sugary drinks. And their actions are having an impact--for all of the hardball and softball tactics the soft drink industry employs to maintain the status quo, soda consumption has been flat or falling for years. Health advocacy campaigns are now the single greatest threat to soda companies' profits. Soda Politics provides readers with the tools they need to keep up pressure on Big Soda in order to build healthier and more sustainable food systems.
