Mr. Emerson's Revolution Jean McClure Mudge,2015-09-11 This volume traces the life, thought and work of Ralph Waldo Emerson, a giant of American intellectual history, whose transforming ideas greatly strengthened the two leading reform issues of his day: abolition and women's rights. A broad and deep, yet cautious revolutionary, he spoke about a spectrum of inner and outer realities—personal, philosophical, theological and cultural—all of which gave his mid-career turn to political and social issues their immediate and lasting power. This multi-authored study frankly explores Emerson's private prejudices against blacks and women while he also publicly championed their causes. Such a juxtaposition freshly charts the evolution of Emerson's slow but steady application of his early neo-idealism to emancipating blacks and freeing women from social bondage. His shift from philosopher to active reformer had lasting effects not only in America but also abroad. In the U.S. Emerson influenced such diverse figures as Thoreau, Whitman, Dickinson and William James, and in Europe Mickiewicz, Wilde, Kipling, Nietzsche, and Camus, as well as many leading followers in India and Japan. The book includes over 170 illustrations, among them eight custom-made maps of Emerson's haunts and wide-ranging lecture itineraries as well as a new four-part chronology of his life placed alongside both national and international events as well as major inventions. Mr. Emerson's Revolution provides essential reading for students and teachers of American intellectual history, the abolitionist and women's rights movement—and for anyone interested in the nineteenth-century roots of these seismic social changes.

Jim Clark David Tremayne,2018-07-10 Jim Clark was a genuine sporting hero. He won 25 of his 72 Grands Prix and in the sixties was the yardstick by which every other driver on the starting grid was judged, and by which they judged themselves. Quite simply, Clark was peerless. Stubborn and notoriously indecisive outside the car, he would nervously chew his fingernails, but he was a genius when he got behind the wheel. To many he remains the greatest racing driver of all time, not just because of his fearsome strike rate and the magnitude and manner of his achievements, but also because he remained humble and unspoiled throughout. Published on the 50th anniversary of Clark's death, this book, 20 years in the making, is a deeply detailed look at a complex and compelling character.

Cutts Family in America The history of the Cutts family in America has never been written before. SO little, in fact, has ever appeared in print concerning the male line of the family, that it has been an exceedingly difficult task to complete. Lost in Wonderland Augustus Mayhew,2012-11-01 Lost in Wonderland's collection of essays explore the myths, social climate and architectural tableaux that make Palm Beach like no other place in the world. The island's uncommon melange of English gardens, Tuscan loggias, Venetian staircases, Spanish patios, Bermuda roofs, and Georgian doorways, makes for an incomparable mirage-like grandeur attractive to both Old Money and the latest Kings of Wall Street. Author and lecturer Augustus Mayhew, one of Palm Beach's most popular columnists, offers twenty-one informative and insightful essays, previously published in the Palm Beach Daily News and the New York Social Diary, combined with more than two hundred historical and contemporary photographs, which chronicle the places and personalities that make Palm Beach a quirky blend of fantasy and reality. He presents a unique perspective on the shifting ground between Palm Beach's past as a seasonal resort destination, to its present status as an exclusive residential enclave with a social prism focused on mansions, condominiums and charity balls.

Fairness Nissim Francez,2012-12-06 The main purpose of this book is to bring together much of the research conducted in recent years in a subject I find both fascinating and important, namely fairness. Much of the reported research is still in the form of technical reports, theses and conference papers, and only a small part has already appeared in the formal scientific journal literature. Fairness is one of those concepts that can intuitively be explained very briefly, but bear a lot of consequences, both in theory and the practicality of programming languages. Scientists have traditionally been attracted to studying such concepts. However, a rigorous study of the concept needs a lot of detailed development, evoking much machinery of both mathematics and computer science. I am fully aware of the fact that this field of research still lacks maturity, as does the whole subject of theoretical studies of concurrency and nondeterminism. One symptom of this lack of maturity is the proliferation of models used by the research community to discuss these issues, a variety lacking the invariance property present, for example, in universal formalisms for sequential computing.

Angel in Goggles Randall A. Wells,2017-10-19 Angels earthly scriptures regard the earth from personal, secular perspectives. Like the Christian Bible, its canon admits a surprising variety of forms and lengths: There are Stories: a fateful lapse of weather-ethics; the conflict between private and public property, the latter including humans drafted into the military. Essays: the endless multiplicity of windows (not to be found in the non-physical, mystical unity of heaven); the problematic relationship between two species (humans and dogs); proprioception (the unappreciated, vital sensation of dueling with gravity); a childrens book as an example earthly art, even to its media. A raffish Travelogue, intermittent, confirms the worlds shape as a sphere. Its counterpoint, also an intermittent series, is a Treasury about the Wellses retirement Estate on a ridge of the Blue Ridge arboretum, cloudatorium, weather- observation-post, lookout

vista, and habitat for plants and creatures that include visiting grandson. A concluding Fantasy like a two-person play except that one character can fly with the help of protective eyewear explores the relationship between human and the supposedly divine.

The Technique of Motor Racing Piero Taruffi, 1960 Written for the race driver and describes the qualities needed to be a good race car driver.

My Speed King Tonia Bern-Campbell, 2002 The love affair between British speed king Donald Campbell and vivacious singer Tonia Bern was one of the great romances of the 20th century. But passion turned to tragedy with the dramatic death of Campbell on Lake Coniston in January 1967, as he attempted to break the world water speed record in his famous jet boat, Bluebird. In this portrait of her love affair and marriage to Campbell, Tonia tells the inside story of her heady lifestyle with Britain's national land and water speed hero. The collision between the two worlds of 1960s jet-set and show-biz promised a fast and furious ride, but their volcanic marriage and the pressures of trying to combine two high-profile careers sometimes took their toll on the relationship. Writing soon after Donald's death, Tonia turned her tremendous sense of personal loss into a vivid evocation of what it was really like to be married to a man with a great lust for love-making and high-speed record-breaking. But it has taken her until now to choose to tell the whole story.

How to be a Victorian Ruth Goodman, 2013-06-27 TRAVEL BACK IN TIME WITH THE BBC'S RUTH GOODMAN We know what life was like for Victoria and Albert. But what was it like for a commoner - like you or me? How did it feel to cook with coal and wash with tea leaves? Drink beer for breakfast and clean your teeth with cuttlefish? Catch the omnibus to work and do the laundry in your corset? How to be a Victorian is a radical new approach to history; a journey back in time more personal than anything before, illuminating the overlapping worlds of health, sex, fashion, food, school, work and play. Surviving everyday life came down to the gritty details, the small necessities and tricks of living and this book will show you how. _____ 'Goodman skilfully creates a portrait of daily Victorian life with accessible, compelling, and deeply sensory prose' Erin Entrada Kelly 'We're lucky to have such a knowledgeable cicerone as Ruth Goodman . . . Revelatory' Alexandra Kimball 'Goodman's research is impeccable . . . taking the reader through an average day and presenting the oddities of life without condescension' Patricia Hagen

Unfolding Practice Arzu Mistry, 2016-06-01 Unfolding Practice: Reflections on Learning and Teaching is a conversation between two artist-educators. Flowing across five chapters, the double sided accordion book has been curated from ten years of recorded conversations, field notes, planning, sketches, reflection, and teaching. The front of the book weaves text, illustration, cutouts, and screen prints, journeying through artistic process and educational practice. The back of the book is a guide, expanding on the practice of using accordion books as a tool for capturing, visualizing, and building upon reflective thinking. The brown paper alludes to the craft paper that is ubiquitous in schools and captures process more than the preciousness of a final product.

Brabham Tony Davis, 2019-08-01 Companion book to the compelling new documentary film of a motor sports hero Sir Jack Brabham was unique in the world of motor racing. He was the boy from Sydney who took on the elite of motor racing and won three F1

world championships, the last one in a car not only built by his own Brabham company, but with an Australian engine he'd helped develop. To those who saw him on the podium, Jack Brabham might have seemed glorious and triumphant. But he was also a man of secrets. He shunned the media, rarely using 'two words when none would do'. He kept vital information from his competitors, his team mates - and his family. It led to unrivalled success. It led to wealth too, much of it hidden around the world. But it also left a trail of hurt and bewilderment ... In this first ever book-length biography of Jack Brabham, his extraordinary accomplishments are laid out with new commentary from his rivals, colleagues, employees and long-time engineering partner Ron Tauranac. And, with the help of his sons Geoffrey and David, it represents the first major attempt to unravel the enigma who became known as 'Black Jack'. PRAISE 'Do buy the book, its a great read over the festive season or otherwise!' Primotipo 'A thorough, broad portrait of a motor sporting giant, an Aussie icon who rarely allowed outsiders to take a peek inside at a personality that offers more surprises than anyone might have guessed' Cars4Starters
