Mind Fixers: Psychiatry's Troubled Search for the Biology of Mental Illness Anne Harrington, 2019-04-16 Mind Fixers tells the history of psychiatry's quest to understand the biological basis of mental illness and asks where we need to go from here. In Mind Fixers, Anne Harrington, author of The Cure Within, explores psychiatry's repeatedly frustrated struggle to understand mental disorder in biomedical terms. She shows how the stalling of early twentieth century efforts in this direction allowed Freudians and social scientists to insist, with some justification, that they had better ways of analyzing and fixing minds. But when the Freudians overreached, they drove psychiatry into a state of crisis that a new "biological revolution" was meant to alleviate. Harrington shows how little that biological revolution had to do with breakthroughs in science, and why the field has fallen into a state of crisis in our own time. Mind Fixers makes clear that psychiatry's waxing and waning biological enthusiasms have been shaped not just by developments in the clinic and lab, but also by a surprising range of social factors, including immigration, warfare, grassroots activism, and assumptions about race and gender. Government programs designed to empty the state mental hospitals, acrid rivalries between different factions in the field, industry profit mongering, consumerism, and an uncritical media have all contributed to the story as well. In focusing particularly on the search for the biological roots of schizophrenia, depression, and bipolar disorder, Harrington underscores the high human stakes for the millions of people who have sought medical answers for their mental suffering. This is not just a story about doctors and scientists, but about countless ordinary people and their loved ones. A clear-eyed, evenhanded, and yet passionate tour de force, Mind Fixers recounts the past and present struggle to make mental illness a biological problem in order to lay the groundwork for creating a better future, both for those who suffer and for those whose job it is to care for them.

Handbook of Bioenergy Crops N. El Bassam, N El Bassam, 2010 This completely revised second edition includes new information on biomass in relation to climate change, new coverage of vital issues including the food versus fuel debate, and essential new information on second generation fuels and advances in conversion techniques. The book begins with a guide to biomass accumulation, harvesting, transportation and storage, as well as conversion technologies for biofuels. This is followed by an examination of the environmental impact and economic and social dimensions, including prospects for renewable energy. The book then goes on to cover all the main potential energy crops.

The UK Pesticide Guide 2020 Martin A. Lainsbury, 2020 By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.

Planters and Their Components J. R. Murray, J. N. Tullberg, B. B. Basnet, 2006 A major constraint to adoption of improved resource-conserving cropping systems in developing countries is the lack of simple planting equipment. This manual provides a valuable reference for research and extension personnel engaged in the selection, adaptation and/or construction of complete planters appropriate to specific soil, crop, climate and residue conditions--ACIAR website.

Films that Sell Patrick Vonderau, Bo Florin, Nico De Klerk, 2019-07-25 While moving image advertising has been around us, everywhere, for at least a century, the topic has tended to be overlooked by cinema studies. This far-reaching new collection makes an incisive contribution to a new field of study, by exploring the history, theory and practice of moving image advertising, and emphasising the dynamic and lasting relationships

between print, film, broadcasting and advertising cultures. In chapters written by an international ensemble of leading scholars and archivists, the book covers a variety of materials from pre-show advertising films to lantern slides and sponsored 'educations'. With case studies of advertising campaigns and archival collections from a range of different countries, and giving consideration to the problems that advertising materials pose for preservation and presentation, this rich and expansive text testifies to the need for a new approach to this burgeoning subject that looks beyond the mere study of promotional film.

The Routledge Companion to Medieval Iconography Colum Hourihane, 2016-12-19 Sometimes enjoying considerable favor, sometimes less, iconography has been an essential element in medieval art historical studies since the beginning of the discipline. Some of the greatest art historians - including Mâle, Warburg, Panofsky, Morey, and Schapiro - have devoted their lives to understanding and structuring what exactly the subject matter of a work of medieval art can tell. Over the last thirty or so years, scholarship has seen the meaning and methodologies of the term considerably broadened. This companion provides a state-of-the-art assessment of the influence of the foremost iconographers, as well as the methodologies employed and themes that underpin the discipline. The first section focuses on influential thinkers in the field, while the second covers some of the best-known methodologies; the third, and largest section, looks at some of the major themes in medieval art. Taken together, the three sections include thirty-eight chapters, each of which deals with an individual topic. An introduction, historiographical evaluation, and bibliography accompany the individual essays. The authors are recognized experts in the field, and each essay includes original analyses and/or case studies which will hopefully open the field for future research.

Italy the Least of the Great Powers R. J. B. Bosworth, 2005-12-15 In the heart of Rome beside the Capitol, confronting the Piazza Venezia, stands the Victor Emmanuel monument. In Rome, which until 1945 was so often accorded the adjectives 'eternal' or 'imperial', the monumentissimo

(as sardonic socialists labelled it) is the most public, most theatrical and most excessive architectural celebration of post-Risorgimento Italian patriotism, nationalism and perhaps imperialism. This book asks why the Victor Emmanuel monument, planned after 1878 and opened in 1911, was a structure raised by Liberal and not Fascist Italy. Through a detailed study of diplomacy, of policy-making, of policy-makers, and of the distribution of real power in pre-First World War Italy, it demonstrates how important foreign policy, and a foreign policy of greatness, was to Liberal Italy. Weakened by economic backwardness, regional diversity, and the gulf between the legal-political world and 'real' society, Liberal Italy was nonetheless ambitious to be a Great Power. This monograph contributes to a number of major historiographical debates. It produces evidence which casts doubts on the thesis that fascism was a parenthesis in Italian history.
