Lotus and Feather Ji-li Jiang, 2016-12-13 A winter illness left Lotus, a little girl, without a voice and without friends. A hunter's bullet left Feather, a crane, injured and unable to fly. As Lotus nurses Feather back to health, their bond grows. Soon Feather is following Lotus everywhere, even to school! The bird dances to the girl's reed whistle, much to the delight of the other children. One day, when the village floods, Feather helps raise the alarm as Lotus and her grandfather urge their neighbors to get to high ground. Feather is a true friend to Lotus, but the time comes when Lotus must be a true friend to him--by encouraging him to migrate with the rest of the cranes. The next spring, Feather miraculously returns, and that's not all . . . he has brought new life to the nearby lake. Inspired by the true story of a crane that rescued a Chinese village, and graced with sensitive watercolor illustrations, this lovely book about respecting nature offers deep emotion and delightful surprises.

The Red Lotus Chris Bohjalian, 2020-03-17 NATIONAL BESTSELLER • From the New York Times bestselling author of *The Flight Attendant* comes a twisting story of love and deceit: an American man vanishes on a rural road in Vietnam, and his girlfriend follows a path that leads her home to the very hospital where they met. Alexis and Austin don't have a typical "meet cute"—their first encounter involves Alexis, an emergency room doctor, suturing a bullet wound in Austin's arm. Six months later, they're on a romantic getaway in Vietnam: a bike tour on which Austin can show Alexis his passion for cycling, and can pay his respects to the place where his father and uncle fought in the war. But then Austin fails to return from a solo ride. Alexis's boyfriend has vanished, the only clue left behind a bright yellow energy gel dropped on the road. As Alexis grapples with this bewildering loss, she starts to uncover a series of strange lies that force her to wonder: Where did Austin go? Why did he really bring her to Vietnam? And how much danger has he left her in? Set amidst the adrenaline-fueled world of the emergency room, *The Red Lotus* is a global thriller about those who dedicate their lives to saving people—and those who peddle death to the highest bidder. Look for Chris Bohjalian's new novel, *The Lioness*!

**Ecology of Fire-Dependent Ecosystems** Devan Allen McGranahan, Carissa L. Wonkka, 2020-12-29 *Ecology of Fire-Dependent Ecosystems* is brimming with intriguing ecological stories of how life has evolved with and diversified within the varied fire regimes that are experienced on earth. Moreover, the book places itself as a communication between students, fire scientists, and fire fighters, and each of these groups will find some familiar ground, and some challenging aspects in this text: something which ultimately will help to bring us closer together and enrich our different approaches to understanding and managing our changing planet. -- Sally Archibald, Professor, University of the Witwatersrand, Johannesburg, South Africa Most textbooks are as dry as kindling and about as much fun to sink your teeth into. This is not that kind of textbook. Devan Allen McGranahan and Carissa L. Wonkka have taken a complex topic and somehow

managed to synthesize it into a comprehensive, yet digestible form. This is a book you can read cover to cover – I know, I did it. As a result, I took an enlightening journey through the history and fundamentals of fire and its role in the natural and human world, ending with a thoughtful review of the evolving relationship between humans and wildland fire. -- Chris Helzer, Nebraska Director of Science, The Nature Conservancy, and author of The Prairie Ecologist blog Ecology of Fire-Dependent Ecosystems: Wildland Fire Science, Policy, and Management is intended for use in upper-level courses in fire ecology and wildland fire management and as a reference for researchers, managers, and other professionals involved with wildland fire science, practice, and policy. The book helps guide students and scientists to design and conduct robust wildland fire research projects and critically interpret and apply fire science in any management, education, or policy situation. It emphasizes variability in wildland fire as an ecological regime and provides tools for students, researchers, and managers to assess and connect fire environment and fire behaviour to fire effects. Fire has not only shaped social and ecological communities but pushed ecosystems beyond previous boundaries, yet understanding the nature and effects of fire as an ecological disturbance has been slow, hampered by the complexity of the dynamic interactions between vegetation and climate and the fear of the destruction fire can bring. This book will help those who study, manage, and use wildland fire to develop new answers and novel solutions, based on an understanding of how fire functions in natural and social environments. It reviews literature, synthesizes concepts, and identifies research gaps and policy needs. The text also explores the interaction of fire and human culture, demonstrating how fire policy can be made adaptable to cultural and socio-ecological objectives.

**Petrification Processes in Matter and Society** Sophie Hüglin, Alexander Gramsch, Liisa Seppänen, 2021-08-13 Petrification is a process, but it also can be understood as a concept. This volume takes the first steps to manifest, materialize or “petrify” the concept of “petrification” and turn it into a tool for analyzing material and social processes. The wide array of approaches to petrification as a process assembled here is more of a collection of possibilities than an attempt to establish a firm, law-generating theory. Divided into three parts, this volume’s twenty-plus authors explore petrification both as a theoretical concept and as a contextualized material and social process across geological, prehistoric and historic periods. Topics connecting the various papers are properties of materials, preferences and choices of actors, the temporality of matter, being and becoming, the relationality between actors, matter, things and space (landscape, urban space, built space), and perceptions of the following generations dealing with the petrified matter, practices, and social relations. Contributors to this volume study specifically whether particular processes of petrification are confined to the material world or can be seen as mirroring, following, triggering, or contradicting changes in social life and general world views. Each of the authors explores – for a period or a specific feature – practices and changes that led to increased conformity and regularity. Some authors additionally focus on the methods and scrutinize them and their applications for their potential to create objects of investigation: things, people, periods, in order to raise awareness for these or to shape or “invent” categories. This volume is of interest to archaeologists, geologists, architectural historians, conservationists, and historians.
