Creative Computer Graphics Annabel Jankel,Rocky Morton,1984-11-15 Creative Computer Graphics presents the dynamic visual power of images created with computer technology. From the pioneering efforts in the 1950s to the current achievements of modern exponents in the US, UK, France and Japan, the book explores computer graphic images through the techniques and technology used to create them. Scientific research laboratories, video games, NASA space simulations, feature films, television advertising and industrial design are some of the areas where computer graphics has made an impact. The book traces the history, assesses the current state of the art and looks ahead to the future where computer graphic images and techniques are to become progressively more important as a means of expression and communication.

Re-viewing Reception Lynne Joyrich,1996 This is an ambitious analysis of television studies as a whole. --Library Journal Focusing on U.S. television of the 1980s--from Miami Vice, Moonlighting, and Pee-wee's Playhouse to Max Headroom--Lynne Joyrich explores how gender affects the reception of television. She traces how the medium has been characterized as feminine and then turns to the television shows themselves and analyzes a range of genres and forms.

Teleparody Angela Hague,David Lavery,2002 In a cautionary attempt to dissuade those who might be tempted to write such material, Teleparody is a compilation of reviews of fictional - but all too possible - contributions to academic Television Studies.

Our Jewish Robot Future Leonard Borman,2010-11 Leonard Borman has woven an instant classic with venues ranging from the Garden of Eden to the fields of modern fertility science, says Neal Karlen, author of The Story of Yiddish. Not only has Borman written a brilliantly entertaining, smart, and mindful allegory of faith and existence, he has found that eleventh commandment most of us didn't know was missing; Thou shall not nosh thy brother. With clever biblical subtext and glossary of terms, this book is a must read for anyone curious for an alternative, humorous take on human survival and Jewish family traditions.

Heaven's War David S. Goyer,Michael Cassutt,2013-06-25 The competing teams of astronauts sent to explore the asteroid Keanu discovered it was, in fact, a giant spacecraft with an alien crew carrying a plea for help. A brave new frontier beckons. But it will come at a price. Without warning, the aliens transport small groups of humans to the vast interior habitats of Keanu. Their first challenge is to survive. Their second: discover why The Architects—the unseen aliens controlling the asteroid—brought them there. The third: find a way to take control of Keanu. Because the ship is moving again. The Architects are going home...

Like Art Glenn O'Brien, 2017-05-23 Like Art was the title of my Artforum column that ran from 1985 to 1990, but it was also my philosophy of advertising. Advertising was like art, and more and more art was like advertising. Ideally the only difference would be the logo. Advertising could take up the former causes of art--philosophy, beauty, mystery, empire. We were clearly living in a time of extremist hypocrisy where various forms of creative work desecrated one another. Price-gouging painters looked down on lowly craftsmen and entertainment journeymen. Millionaire rock stars adopted a quasi-communist stance, emphasizing the anti-commercial aspect of their work. From back cover.

The Future Was Here Jimmy Maher, 2012-04-13 Exploring the often-overlooked history and technological innovations of the world's first true multimedia computer. Long ago, in 1985, personal computers came in two general categories: the friendly, childish game machine used for fun (exemplified by Atari and Commodore products); and the boring, beige adult box used for business (exemplified by products from IBM). The game machines became fascinating technical and artistic platforms that were of limited real-world utility. The IBM products were all utility, with little emphasis on aesthetics and no emphasis on fun. Into this bifurcated computing environment came the Commodore Amiga 1000. This personal computer featured a palette of 4,096 colors, unprecedented animation capabilities, four-channel stereo sound, the capacity to run multiple applications simultaneously, a graphical user interface, and powerful processing potential. It was, Jimmy Maher writes in *The Future Was Here*, the world's first true multimedia personal computer. Maher argues that the Amiga's capacity to store and display color photographs, manipulate video (giving amateurs access to professional tools), and use recordings of real-world sound were the seeds of the digital media future: digital cameras, Photoshop, MP3 players, and even YouTube, Flickr, and the blogosphere. He examines different facets of the platform—from Deluxe Paint to AmigaOS to Cinemaware—in each chapter, creating a portrait of the platform and the communities of practice that surrounded it. Of course, Maher acknowledges, the Amiga was not perfect: the DOS component of the operating systems was clunky and ill-matched, for example, and crashes often accompanied multitasking attempts. And Commodore went bankrupt in 1994. But for a few years, the Amiga's technical qualities were harnessed by engineers, programmers, artists, and others to push back boundaries and transform the culture of computing.

Agitpop Arthur Asa Berger, 2017-07-12 In this entirely sophisticated and scholarly account of political culture, Arthur Asa Berger shows how the variety of cultural preferences creates the foundations of communication theory. Using the work of Aaron Wildavsky, the author shows how individualism, egalitarianism, collectivism, and fatalism form the basis of culture in complex societies. But more importantly, Berger breaks down the mechanical distinction between mass culture and elite culture, showing how they interpenetrate and crossover at the level of competitive and hierarchical frames. *Agitpop*, now in paperback, suggests that there is an ideological content to our popular culture, even though the creators no less than the consumers of that culture are either unaware or dimly aware that they are creating works with an ideological bent. The work takes up in quick order two examples from different areas of the hierarchical, individualist, egalitarian, and fatalist cultures. From football games to the Iran-Contra Hearings, from MTV to the Human Potential Movement, from Max Headroom to humor on the Jews, and from wrestling to *The Terminator*, Berger takes up his master themes with a deft touch of his own. Weaving

in the work of scholars from Emile Durkheim to Aaron Wildavsky he manages to make each of the chapters very much his own. For those who know the earlier work of this author, the reader will be very much at home; for those new to Berger, the volume will be a joyous revelation. The final three chapters reveal a deeper aspect of Berger's work. His interpretation of the earlier materials in terms of the semiotics of power, of textual analysis, or deconstruction of the media, and finally, an analysis and self-analysis of the larger research agenda of which this work is pivotal, should make this book central to the theoretical construction of popular and political culture. For people working in communications theory, political culture, and the sociology of knowledge, this book is a must; for everyone else

Wicked Things #1 John Allison, 2020-04-01 The Eisner Award winning team of John Allison and Max Sarin return to the world of Giant Days for a new series about everyone's favorite child detective; Charlotte Grote. Nineteen year old Charlotte Grote has her whole life ahead of her; headed straight to Oxford and a future as a real detective—until she's framed for murder! Could the future of law enforcement be 5'2" with an extremely strong bangs game? Yes. Very yes.

Fiction 2000 George Edgar Slusser, T. A. Shippey, 1992 Will novels and stories be relevant in the next millennium, when the boundaries between illusion and reality, and observer and observed, may dissipate in a whirl of images, signals and data? This essay collection divines the prospects of fiction in the information age by examining cyberpunk literature. A movement less than a decade old, cyberpunk is driven by deep concerns about society, ethics, and new technology and has been defined as the literature of the first generation of science-fiction writers actually to live in a science-fiction world. These essays were first presented at the 1989 annual J. Lloyd Eaton Conference on Science Fiction and Fantasy Literature, the field's most prestigious international gathering. They address concerns common not only to cyberpunk and traditional science-fiction scholars, critics, and writers but to their counterparts outside the genre as well. Interdisciplinary in perspective, the essays consider the origins of cyberpunk, the appropriation of its conventions by the mass media, the literature's paradoxical retrogressive/iconoclastic nature, cyberpunk's affinities to and deviations from both traditional science fiction and postmodernist literature, the parameters and components of the cyberpunk canon, and the movement's future course. Some essays are theoretical, but all are grounded in works familiar to serious science-fiction readers: *Neuromancer*, *Frontera*, *Deserted Cities of the Heart*, *Islands in the Net*, *Great Sky River*, the *Mirrorshades* anthology, and others; cyberpunk TV and cinema like the Max Headroom programs, *Blade Runner*, and *Tron*; and precursory literature, including *Frankenstein*, *Le Roman de l'avenir*, *Ralph 124C 41 +*, and *A Clockwork Orange*. Useful for its views on a volatile science-fiction subgenre, *Fiction 2000* is also valuable for what it tells us about the fate of mainstream literature.

40: A Doonesbury Retrospective 1980 to 1989 G. B. Trudeau, 2012-06-12 The second volume of this retrospective anthology covers the Pulitzer prize-winning cartoon strip from 1980 to 1989. On October 26, 1970, G.B. Trudeau introduced the world to a college jock named B.D. and his inept and geeky roommate, Mike Doonesbury. Fourteen thousand strips later, Doonesbury has become one of the most beloved and acclaimed comic strips in history. Over the

years, the world of Doonesbury grew uniquely vast, sustained by an intricately woven web of relationships—over forty major characters spanning three generations. The complete 40: A Doonesbury Anthology presents more than 1,800 comic strips that chart key adventures and cast connections over the last four decades. Dropped in throughout this rolling narrative are twenty detailed essays in which Trudeau contemplates his characters, including portraits of core characters such as Duke and Honey, Zonker, Joanie, and Rev. Sloan, as well as more recent additions, such as Zipper, Alex, and Toggle. Trudeau also includes an annotated diagram that maps the mind-boggling matrix of character relationships. This second volume of the four-volume e-book edition of 40 covers the years 1980 to 1989 for the celebrated cartoon strip.

British Animation Clare Kitson, 2008 Clare Kitson celebrates one of the most creative sources of broadcast animation - Britain's pioneering Channel 4, winner of three Academy Awards for animation. In *British Animation: The Channel 4 Factor*, she takes a look back at this exceptional era - celebrating thirty landmark works and the artists who made them. --Book Jacket.

A few people, perhaps one in ten thousand, can still sleep, and they've all shared the same golden dream. After six days of absolute sleep deprivation, psychosis will set in. After four weeks, the body will die. In the interim, panic ensues and a bizarre new world arises in which those previously on the fringes of society take the lead. Paul, a writer, continues to sleep while his partner Tanya disintegrates before his eyes, and the new world swallows the old one whole.

Astronaut Maker Michael Cassutt, 2018-08-01 One of the most elusive and controversial figures in NASA's history, George W. S. Abbey was called the Dark Lord, the Godfather, and UNO (unidentified NASA official) by those within NASA. From young pilot and wannabe astronaut to engineer, bureaucrat, and finally director of the Johnson Space Center (mission control), Abbey's story has never been fully told—until now. This fascinating account takes readers inside NASA to learn the real story of how Abbey rose to power and wielded it out of the spotlight. Informed by countless hours of interviews with Abbey and his family, friends, adversaries, and former colleagues, *The Astronaut Maker* is the ultimate insider's account of ambition and power politics at NASA.

Heaven's Shadow David S. Goyer, Michael Cassutt, 2011-07-05 The science fiction epic of our time has arrived. Three years ago, an object one hundred miles across was spotted on a trajectory for Earth's sun. Now, its journey is almost over. As it approaches, two competing manned vehicles race through almost half a million kilometers of space to reach it first. But when they both arrive on the entity, they learn that it has been sent toward Earth for a reason. An intelligent race is desperately attempting to communicate with our primitive species. And the message is: Help us.

Heaven's Fall David S. Goyer, Michael Cassutt, 2013-08-06 Mankind's first contact with extraterrestrial life led to an incredible revelation. Their last may lead them to extinction. Twenty years have passed since the mysterious Near-Earth Object nicknamed Keanu appeared in the night sky and transported humans from all over Earth into its interior. There they discovered that Keanu was a long-range spaceship—and they were not alone. They joined forces with the aliens called the Architects, who had come from a distant galaxy to seek help in fighting the vicious Reivers. And they defeated them. Or so they thought. For when Keanu reestablished contact with Earth, they learned that the Reivers have taken over the planet, placing most of the population under their dominion. But mankind's last hope may yet be hidden inside the NEO. And if the men and women still in Keanu cannot find it, humanity will be finished.

And the galaxy will be next.
