Cutting carbon, creating growth Great Britain: Department for Transport, Great Britain: Department for Transport Staff, 2011-01-19 This White Paper, entitled Creating growth, cutting carbon: making sustainable local transport happen, sets out the Government's aims in meeting two key objectives: (i) to help create growth in the economy; (ii) tackling climate change by cutting carbon emissions. Action at the local level is seen as delivering gains at the national level. For example, around every three trips made by car are less than 5 miles in length, and it could be argued many such trips could alternatively be cycled, walked or undertaken by public transport. The Government sees the encouragement of sustainable travel choices benefiting the economy, cutting carbon and contributing to road safety and public health. The new Local Sustainable Transport Fund aims to help local authorities to encourage people to travel sustainably. The publication is divided into nine chapters with one annex, and looks at the following areas: local transport - choices and implications; decentralising power - enabling local delivery; enabling sustainable transport choices; active travel; making transport more attractive; managing traffic to reduce carbon and tackle congestion; local transport in society.

Sidewalks Anastasia Loukaitou-Sideris, Renia Ehrenfeucht, 2009 Urban sidewalks, critical but undervalued public spaces, have been sites for political demonstrations and urban greening, promenades for the wealthy and the well-dressed, and shelterless shelters for the homeless. On sidewalks, decade after decade, urbanites have socialized, paraded and played, sold their wares, and observed city life. These uses often overlap and conflict, and urban residents and planners try to include some and exclude others. In this first book-length analysis of the sidewalk as a distinct public space, Anastasia Loukaitou-Sideris and Renia Ehrenfeucht examine the evolution of the American urban sidewalk and trace conflicts that have arisen over its competing uses. They discuss the characteristics of sidewalks as small urban public spaces, and such related issues as the ambiguous boundaries of their 'public' status, contestation around specific uses, control and regulations, and the implications for First Amendment speech and assembly rights. Drawing on historical and contemporary examples as well as case study research and archival data from five cities - Boston, Los Angeles, New York, Miami, and Seattle - the authors focus on how the functions and meanings of street activities have shifted and have been negotiated through controls and interventions. They consider sidewalk uses that include the display of individual and group identities (in ethnic and pride parades, for example), the everyday politics of sidewalk access, and larger political actions (including Seattle's 1999 antiglobalization protests), and examine the complex regulatory frameworks that manage street and sidewalk life. The role of urban sidewalks in the early twenty-first century depends, the authors conclude, on what we want from sidewalk life and how we balance competing interests.

Urban Design Downtown Anastasia Loukaitou-Sideris, Tridib Banerjee, 1998-10-19 Insightful and a delight to read, the book should be read by city officials, land developers, and anyone involved or merely interested in the evolution and design of urban form and space.—Richard T. Lai, Arizona State University
