Prader-Willi Syndrome Joyce Whittington, Tony Holland, 2004-04-22 Prader-Willi syndrome (PWS) is associated with an assortment of physical, behavioural and cognitive abnormalities which create a broad range of care needs. Information about the syndrome is spread across a variety of disciplines. In this book the authors seek to identify and provide the latest findings about how best to manage the complex medical, nutritional, psychological, educational, social and therapeutic needs of people with PWS. Their approach is an integrated one, centred on the PWS phenotype. Both authors have been involved in the Cambridge PWS study, which is the largest and most rounded of the cohort studies of PWS anywhere in the world. The unique data it provides is the basis of this book.

Prader-Willi Syndrome John Hernandez-Storr, 2016-03-10 On March 28, 1971, Fausta Deterling gave birth to a boy. Curtis was floppy and had little appetite. When he was five months old, a doctor told his parents that Curtis had something called Prader-Willi syndrome. He told them Curtis would develop a huge appetite as a toddler, would become quite obese, would not be 100 percent mentally, and would not live past his twenties. There was no cure or treatment, the doctor said. Fausta and her husband, Gene, did not accept this. They banded with other parents, and with a handful of professionals, to try to make better lives for their children. The small number of professionals interested in Prader-Willi syndrome made some gains, although the syndrome remained obscure. But in the 1980s Prader-Willi syndrome became the focus of a worldwide genetic mystery. And the resolution of that mystery would change the textbooks.

Financing the Development of Old Waqf Properties Magda Ismail Abdel Mohsin, Hisham Dafterdar, Murat Cizakca, Syed Othman Alhabshi, Shaikh Hamzah Abdul Razak, Seyed Kazem Sadr, Thamina Anwar, Mohammed Obaidullah, 2016-10-21 This book presents successful case studies in Muslim and Muslim minority countries that have revolutionized the redevelopment of idle waqf properties into productive land trusts. The revival of this institution over the last two decades shows the growing optimism in galvanizing the socioeconomic role of waqf by adopting its flexible shariah measures. Innovative ways of financing redevelopment allow Muslims to extend these roles to include new beneficiaries. New uses for these properties include providing services to the community, opening jobs for the majority of people, funding small entrepreneurs, educating the masses, providing health care, and sheltering the poor and needy. Countries under study include Sudan, Turkey, Malaysia, Indonesia, Singapore, New Zealand, Kuwait, Oman, Qatar, and Iran. Additionally, the book examines the International Development Bank's role in financing the development old waqf properties in different countries.

PWS14/16/16 Bis/26 PWS 18 (avro 621) Bartlomiej Belcarz, Tomasz J. Kopanski, Wojciech Sankowski, 2008 The book examines pre-war Polish advanced trainers from the PWS company. These attractive aircraft trained class after class of new Polish pilots and helped restructure the Polish Air Force during the 1920s and 1930s. As with most trainers, the PWS aircraft have often been overlooked in aviation texts, but this book changes all that with page after page of photos, illustrations, and text. The authors have done an excellent job of collecting information and presenting it in an easy to read format, which is good as this is likely to be the only monograph on these aircraft. As a trainer aircraft, their history is fairly sedate, as is their markings. The photos reveal the latter quite well, with the vast majority of these trainers finished in overall green. Subtle

differences in the details, though, make the individual aircraft stand out, and the color illustrations bring these differences to light. In addition to the various Polish examples, this book also shows a handful of foreign PWS operators, including Romania, Bulgaria, and the Soviet Union. For those interested in small air forces, this is an excellent series, and the latest title continues the high quality seen in previous editions.

Working Classes Rick Decker, Stuart Hirshfield, 1996 Decker and Hirshfield's *Working Classes* applies the C++ programming language to the study of data structures and abstract data types. The authors organize their discussion of abstract data types according to their structural restrictions beginning with highly structured lists, stacks, and queues, and progressing through trees and directed graphs to unstructured sets. Chapter 10 examines the problem of regenerating text from a large sample, using a real computer/compiler system to demonstrate how time and space constraints arise from the choice of data structure. The book teaches by example (with more than 350 exercises provided), and most chapters conclude with an optional Explorations section that covers topics of special interest.
