The Sea Serpent and Me Dashka Slater, 2008 When a tiny sea serpent tumbles from the bathtub faucet, a little girl finds an unexpected friend. As rainy day after rainy day passes, the two sing songs, take baths, and talk about the sea. But little girls live on land, and a growing sea serpent needs wave upon wave of water. Here's a story about the true meaning of friendship, perfect for children, parents, and anyone who has ever had second thoughts about growing up.

The Great New England Sea Serpent J. P. O'Neill, 2003-11-01 Is it a strange mammal related to the seals, a descendant of a prehistoric reptile, or a new, unidentified animal? Whatever it is, or was, the witnesses call it a sea serpent. Remarkably similar descriptions of a creature with a long body, undulating motion, and horse-sized, snake-like head have left a trail of clues and controversy going back three centuries. In *The Great New England Sea Serpent*, J.P. O'Neill draws on the historical record as well as previously unpublished first-hand accounts to chronicle more than 230 sightings of the mysterious marine creatures inhabiting the Gulf of Maine.

The Great Sea-serpent, Upon the Coast of New-England. In 1817 Neptune,1818

Gloucester's Sea Serpent Wayne Soini,2010-10-15 In 1817, as Gloucester, Massachusetts, was recovering from the War of 1812, something beneath the water was about to cause a stir in this New England coastal community. It was a misty August day when two women first sighted Gloucester's sea serpent, touching off a riptide of excitement among residents that reached a climax when Matt Gaffney fired a direct shot at the creature. Local historian Wayne Soini explores the depths of Gloucester harbor to reveal a treasure-trove of details behind this legendary mystery. Follow as he tracks Justice of the Peace Lonson Nash's careful investigation, the world's first scientific study of this marine animal, and judges the credibility of numerous reported sightings.

The Sea Serpent William Crafts,1819

Disentangled Robert L. France, 2023-09-14 The Definitive Study and Solution to the Centuries-old Mystery of the World's Most Sighted Sea Serpent There is a long history of conflating sightings of unidentified marine objects (UMOs) as purported sea serpents. Most sightings are either of an extremely brief duration or made by a single observer, and thus often easy to dismiss. This is not the case, however, with respect to the so-called Gloucester Sea Serpent which frequented the Massachusetts and New York coasts during the early nineteenth century. Witnessed by hundreds of people for extended periods repeatedly over many days, the Gloucester UMO is the most sighted 'sea serpent' in history. As well, due to being the object of study at the time and shortly thereafter by naturalists, the mysterious creature remains the most thoroughly investigated of all putative sea serpents. For these reasons, it has achieved an exalted status among cryptozoologists who maintain it represents the best evidence for the existence of sea serpents. For the first time, an eminently qualified aquatic biologist and ethnozoologist presents the definitive history of the phenomena and carefully examines the evidence. It is concluded that the most parsimonious explanation behind the Gloucester Sea Serpent is as early evidence for what is today recognized as being one of the most serious threats to marine biodiversity: entanglement in fishing gear and other maritime debris. Therefore, although widely considered to be restricted to the advent and widespread use of non-degradable plastic in the middle of the twentieth century, this new interpretation of the Gloucester UMO suggests that entanglement has a much longer environmental history than is commonly believed. Robert L. France is a world-renowned scientist at Dalhousie University and the author or editor of twenty books and two hundred papers on a wide range of environmental subjects. He has undertaken conservation biology research from the High Arctic to the tropics, on organisms from bacteria to whales, which has been cited many thousands of times in the literature. Dr. France is a

leading authority on many aspects of aquatic zoology, including marine ecology and ethnozoology, and may be the most qualified person to have recently undertaken research and published peer-reviewed articles on the beguiling and befuddling topic of aquatic mystery animals, known as 'cryptids'.

Anderson, Bagram Ibatoulline, 2005-05-10 Rhyming text tells of a sea serpent that played off the coast of Massachusetts the summer of 1817, but when adventure seekers came from miles around to study the serpent and aggressively hunt it down, the creature eluded capture and remains a mystery even today.
