Fast Ladies Jean François Bouzanquet,2009-07 It took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world. Over forty unique portraits of daring, brave women who took part in speed records events, rallies and Grand Prix races.

Flavonoids of the Sunflower Family (Asteraceae) Bruce A. Bohm,Tod F. Stuessy,2013-11-27 Flavonoids are secondary plant products that have previously been shown to be helpful in determining relationships among plant groups. This work presents comprehensively the occurrence, patterns of variation, and systematic and evolutionary importance of flavonoids in the sunflower family (Asteraceae), the largest family of flowering plants (23,000 species). It gathers together the more than 2500 reports of flavonoids in Asteraceae published between 1950 to the present and interprets these data in context of new taxonomic (especially generic) alignments. The authors discuss flavonoid patterns with reference to modern phylogenetic studies based on morphology and DNA data. This book provides, therefore, the most exhaustive synthesis and evaluation of the systematic and evolutionary import of flavonoids ever accomplished for any large family of angiosperms.

Systematics, Evolution, and Biogeography of Compositae Vicki Ann Funk,2009 This spectacular book does full justice to the Compositae (Asteraceae), the largest and most successful flowering plant family with some 1700 genera and 24,000 species. It is an indispensable reference, providing the most up-to-date hypotheses of phylogenetic relationships in the family based on molecular and morphological characters, along with the corresponding subfamilial and tribal classification. The 2009 work not only integrates the extensive molecular phylogenetic analyses conducted in the last 25 years, but also uses these to produce a metatree for about 900 taxa of Compositae. The book contains 44 chapters, contributed by 80 authors, covering the history, economic importance, character variation, and systematic and phylogenetic diversity of the family. The emphasis of this work is phylogenetic; its chapters provide a detailed, current, and thoroughly documented presentation of the major (and not so major) clades in the family, citing some 2632 references. Like the Compositae, the book is massive, diverse, and fascinating. It is beautifully illustrated, with 170 figures, and an additional 108 cladograms (all consistently color-coded, based on the geographic range of the included taxa); within these figures are displayed 443 color photographs, clearly demonstrating the amazing array of floral and vegetative form expressed by members of the clade. --NHBS Environment Bookstore.

Tiger Tank David Fletcher,David Willey,2020-02-18 The German Tiger I was the most feared battle tank of the Second World War. Its invincibility lay in its main 8.8cm gun and heavy defensive armour. Tiger Tank gives a rare insight into acquiring, owning and operating one of these awesome fighting machines, using the UK's Tank Museum's Tiger 131 – the only Tiger I in the world that has been restored to full running order. In addition to offering unique insights into maintenance and driving the Tiger, the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57-ton giant in combat. It was written by a team of experts from the Tank Museum who were closely involved with the strip-down and rebuild of the Tiger I. David Fletcher is a historian, a prolific author and a world expert on tanks. David Willey is a curator, and Mike Hayton is workshop manager. Other members of the writing team include volunteers Darren Hayton and Steven Vase, Mike Gibb of the SdKfz Military Vehicle Foundation and David Schofield, a specialist in forensic science.
