The Other End of the Leash Patricia McConnell, Ph.D.,2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Beyond the Sixth Extinction Shawn Sheehy, 2018-10-09 Elaborate pop-ups feature some wonderfully creepy creatures that just might dominate the ecosystem and be essential to our planet's survival in an eerily realistic future world. Whether or not we know it, the sixth global extinction is already under way, propelled not by a meteor but by human activity on Earth. Take a long step forward into the year 4847 with the help of stunning pop-ups

portraying eight fantastical creatures, along with spreads and flaps presenting details about each one. Paper engineer Shawn Sheehy envisions the aftermath of extinction as a flourishing ecosystem centered around fictional creatures that could evolve from existing organisms. Promising high appeal for science-fiction fans of all ages – and plenty of food for discussion – this evolutionary extravaganza offers a time line of the six extinction events in Earth’s history, a “field guide” to each creature, a diagram of species relationships, a habitat map of the (imagined) ruins of Chicago, and an illuminating author’s note.
