Stuff You Should Know Josh Clark,Chuck Bryant,2020-11-24 From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless whys and hows from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (…except maybe jackhammers).

The Lumiere Autochrome Bertrand Lavédrine,Jean-Paul Gandolfo,2013-12-15 Louis Lumière is perhaps best known in the U.S. for his seminal role in the invention of cinema, but his most important contribution to the history of photography was the autochrome. Engagingly written and marvelously illustrated with over 300 images, The Lumière Autochrome: History, Technology, and Preservation tells the fascinating story of the first industrially produced form of color photography. Initial chapters present the Lumière family enterprise, set out the challenges posed by early color photography, and recount the invention, rise, and eventual decline of the autochrome, which for the first four decades of the twentieth century was the most widely used form of commercial color photography. The book then treats the technology of the autochrome, including the technical challenges of plate fabrication, described in step-by-step detail, and a thorough account of autochrome manufacture. A long final chapter provides in-depth recommendations concerning the preservation of these vulnerable objects, including proper storage and display guidelines. There are also engaging portfolios throughout the book showcasing autochrome photographs from around the world as part of an initiative founded by the French banker Albert Kahn, as well as engrossing testimonials by children of men who worked in the Lumière factories in the early twentieth century. The appendix includes transcriptions and facsimile reproductions from the Lumière notebooks as well as original patent documents.

Getting the Message Across Stéphane Faroult,2016-11-21 Create memorable presentations on technical and complex topics in slideware such as Microsoft PowerPoint and Apple's Keynote for Mac. Learn good pacing and rhythm as well as judicious use of special effects. Whether the goal is to help a sale or to educate, and whether the final delivery is a live presentation, a webinar, or a short video presentation, this book focuses on the particular difficulties linked to technical presentations. You will learn to create a story when there is none, gain the interest of an audience who may not feel as strongly for the topic as the speaker does, turn abstract concepts into visual models, overcome the limitations of the medium (limited space, two dimensions), maintain interest through rhythm, and use effects, not to look cool or get that WOW moment, but to serve the message. Getting The Message Across presents a number of field-tested ideas for raising interest. The use of various techniques and careful scripting will help you, even if you aren't a natural-born show-person, to communicate effectively, and to make your audience remember your message, and not necessarily your slides. This book will teach you: Rhythm and animations, and the use of transitions To hold audience interest even with dry topics To create memorable presentations Techniques useful for PowerPoint, Keynote for Mac, and any similar presentation medium or environment What You Will Learn Turn austere topics into interesting stories. Give rhythm and pacing to your presentations. Build a narrative during transitions and animations. Hold audience interest and make listeners feel clever. Make people remember your presentation rather than your cool use of slideware. Who This Book Is For People who have to communicate effectively on strongly technical topics. This book targets educators and trainers as well as technical consultants who need to present complex solutions to customers or leads, as well as would-be speakers at scientific or technical conferences. Getting The Message Across is a book for people who want to make their presentations not only more attractive, but really memorable. It is for people who aren't looking for a standing ovation, but who are willing to do what they can to be understood and to make their messages remembered. Getting The Message Across focuses on using slideware such as PowerPoint and Keynote. Such slideware, for all its flaws, is still one of the best ways to communicate, not only live, but also in dematerialized communications (webinars, video tutorials) for reaching an ever-growing audience.
