Why You Can't Teach United States History without American Indians Susan Sleeper-Smith,Juliana Barr,Jean M. O'Brien,Nancy Shoemaker,Scott Manning Stevens,2015-04-20 A resource for all who teach and study history, this book illuminates the unmistakable centrality of American Indian history to the full sweep of American history. The nineteen essays gathered in this collaboratively produced volume, written by leading scholars in the field of Native American history, reflect the newest directions of the field and are organized to follow the chronological arc of the standard American history survey. Contributors reassess major events, themes, groups of historical actors, and approaches--social, cultural, military, and political--consistently demonstrating how Native American people, and questions of Native American sovereignty, have animated all the ways we consider the nation's past. The uniqueness of Indigenous history, as interwoven more fully in the American story, will challenge students to think in new ways about larger themes in U.S. history, such as settlement and colonization, economic and political power, citizenship and movements for equality, and the fundamental question of what it means to be an American. Contributors are Chris Andersen, Juliana Barr, David R. M. Beck, Jacob Betz, Paul T. Conrad, Mikal Brotnov Eckstrom, Margaret D. Jacobs, Adam Jortner, Rosalyn R. LaPier, John J. Laukaitis, K. Tsianina Lomawaima, Robert J. Miller, Mindy J. Morgan, Andrew Needham, Jean M. O'Brien, Jeffrey Ostler, Sarah M. S. Pearsall, James D. Rice, Phillip H. The Fracture of Good Order Jason C. Bivins,2004-07-21 Whether picketing outside abortion clinics, speaking out at school board meetings, or attending anti-death penalty vigils, many Americans have publicly opposed local, state, or federal government policies on the basis of their religious convictions. In *The Fracture of Good Order*, Jason Bivins examines the growing phenomenon of Christian protest against civil authority and political order in the United States. He argues that since the 1960s, there has been a proliferation of religious activism against what protesters perceive as government's excessive power and lack of moral principle. Calling this phenomenon Christian antiliberalism, Bivins finds at its center a belief that American politics is based on a liberal tradition that gives government too much social and economic influence and threatens the practice of a religious life. Focusing on the Catholic pacifism of Daniel and Philip Berrigan and the Jonah House resistance community, the Christian Right's

homeschooling movement, and the evangelical Sojourners community, Bivins combines religious studies with political theory to explore the common ground shared by these disparate groups. Despite their vast ideological and institutional differences, Bivins argues, these activists justify their actions in overtly religious terms based on a rejection of basic tenets of the American political system. Analyzing the widespread dissatisfaction with the conventional forms of political identity and affiliation that characterize American civic life today, Bivins sheds light on the complex relations between religion and democratic society.

Battle Lines Eliza Richards, 2018-11-13 During the U.S. Civil War, a combination of innovative technologies and catastrophic events stimulated the development of news media into a central cultural force. Reacting to the dramatic increases in news reportage and circulation, poets responded to an urgent need to make their work immediately relevant to current events. As poetry's compressed forms traveled more quickly and easily than stories, novels, or essays through ephemeral print media, it moved alongside and engaged with news reports, often taking on the task of imagining the mental states of readers on receiving accounts from the war front. Newspaper and magazine poetry had long editorialized on political happenings—Indian wars, slavery and abolition, prison reform, women's rights—but the unprecedented scope of what has been called the first modern war, and the centrality of the issues involved for national futures, generated a powerful sense of single-mindedness among readers and writers that altered the terms of poetic expression. In *Battle Lines*, Eliza Richards charts the transformation of Civil War poetry, arguing that it was fueled by a symbiotic relationship between the development of mass media networks and modern warfare. Focusing primarily on the North, Richards explores how poets working in this new environment mediated events via received literary traditions. Collectively and with a remarkable consistency, poems pulled out key features of events and drew on common tropes and practices to mythologize, commemorate, and ponder the consequences of distant battles. The lines of communication reached outward through newspapers and magazines to writers such as Dickinson, Whitman, and Melville, who drew their inspiration from their peers' poetic practices and reconfigured them in ways that bear the traces of their engagements.

The Beach Book Carl Heywood Hobbs, 2012 Waves and tides, wind and storms, sea-level rise and shore erosion: these are the forces that shape our beaches, and beach lovers of all stripes can benefit from learning more about how these coastal processes work. With animation and clarity, *The Beach Book* tells sunbathers why beaches widen and narrow, and helps boaters and anglers understand why tidal inlets migrate. It gives home buyers insight into erosion rates and provides natural-resource managers and interested citizens with rich information on beach nourishment and coastal-zone development. And for all of us concerned about the long-term health of our beaches, it outlines the latest scientific information on sea-level rise and introduces ways to combat not only the erosion of beaches but also the decline of other coastal habitats. The more we learn about coastline formation and maintenance, Carl Hobbs argues, the better we can appreciate and cultivate our shores. Informed by the latest research and infused with a passion for its subject, *The Beach Book* provides a wide-ranging introduction to the shore, and all of us who love the beach and its associated environments will find it timely and useful.

Basic Interests Frank R. Baumgartner, Beth L. Leech, 1998-03-23 A generation ago, scholars saw interest groups as the single most important

element in the American political system. Today, political scientists are more likely to see groups as a marginal influence compared to institutions such as Congress, the presidency, and the judiciary. Frank Baumgartner and Beth Leech show that scholars have veered from one extreme to another not because of changes in the political system, but because of changes in political science. They review hundreds of books and articles about interest groups from the 1940s to today; examine the methodological and conceptual problems that have beset the field; and suggest research strategies to return interest-group studies to a position of greater relevance. The authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional-legal approach that preceded it. They show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects, such as collective-action dilemmas and the dynamics of recruitment. As a result, despite intense research activity, we still know very little about how groups influence day-to-day governing. Baumgartner and Leech argue that scholars need to develop a more coherent set of research questions, focus on large-scale studies, and pay more attention to the context of group behavior. Their book will give new impetus and direction to a field that has been in the academic wilderness too long.

The Civil Contract of Photography Ariella Azoulay, 2021-09-14 In this groundbreaking work, Ariella Azoulay thoroughly revises our understanding of the ethical status of photography. It must, she insists, be understood in its inseparability from the many catastrophes of recent history. She argues that photography is a particular set of relations between individuals and the powers that govern them and, at the same time, a form of relations among equals that constrains that power. Anyone, even a stateless person, who addresses others through photographs or occupies the position of a photograph's addressee, is or can become a member of the citizenry of photography. The crucial arguments of the book concern two groups that have been rendered invisible by their state of exception: the Palestinian noncitizens of Israel and women in Western societies. Azoulay's leading question is: Under what legal, political, or cultural conditions does it become possible to see and show disaster that befalls those with flawed citizenship in a state of exception? The Civil Contract of Photography is an essential work for anyone seeking to understand the disasters of recent history and the consequences of how they and their victims are represented.

Women Against the Good War Rachel Waltner Goossen, 1997 During World War II, more than 12,000 male conscientious objectors seeking alternatives to military service entered Civilian Public Service to do forestry, soil conservation, or other 'work of national importance.' The Power and Politics of Art in Postrevolutionary Mexico Stephanie J. Smith, 2017-11-14 Stephanie J. Smith brings Mexican politics and art together, chronicling the turbulent relations between radical artists and the postrevolutionary Mexican state. The revolution opened space for new political ideas, but by the late 1920s many government officials argued that consolidating the nation required coercive measures toward dissenters. While artists and intellectuals, some of them professed Communists, sought free expression in matters both artistic and political, Smith reveals how they simultaneously learned the fine art of negotiation with the increasingly authoritarian government in order to secure clout and financial patronage. But the government, Smith shows, also had reason to accommodate artists, and a surprising and volatile interdependence grew between the artists and the politicians. Involving well-known artists such as Frida Kahlo, Diego Rivera, and David Alfaro Siqueiros, as well as some less well

known, including Tina Modotti, Leopoldo Mendez, and Aurora Reyes, politicians began to appropriate the artists' nationalistic visual images as weapons in a national propaganda war. High-stakes negotiating and co-opting took place between the two camps as they sparred over the production of generally accepted notions and representations of the revolution's legacy—and what it meant to be authentically Mexican.

New Studies in the History of American Slavery Edward E. Baptist, Stephanie M. H. Camp, 2006-01-01 These essays, by some of the most prominent young historians writing about slavery, fill gaps in our understanding of such subjects as enslaved women, the Atlantic and internal slave trades, the relationships between Indians and enslaved people, and enslavement in Latin America. Inventive and stimulating, the essays model the blending of methods and styles that characterizes the new cultural history of slavery's social, political, and economic systems. Several common themes emerge from the volume, among them the correlation between race and identity; the meanings contained in family and community relationships, gender, and life's commonplaces; and the literary and legal representations that legitimated and codified enslavement and difference. Such themes signal methodological and pedagogical shifts in the field away from master/slave or white/black race relations models toward perspectives that give us deeper access to the mental universe of slavery. Topics of the essays range widely, including European ideas about the reproductive capacities of African women and the process of making race in the Atlantic world, the contradictions of the assimilation of enslaved African American runaways into Creek communities, the consequences and meanings of death to Jamaican slaves and slave owners, and the tensions between midwifery as a black cultural and spiritual institution and slave midwives as health workers in a plantation economy. Opening our eyes to the personal, the contentious, and even the intimate, these essays call for a history in which both enslaved and enslavers acted in a vast human drama of bondage and freedom, salvation and damnation, wealth and exploitation.

The Revolution Will Not Be Funded INCITE!, 2017-01-13 A trillion-dollar industry, the US non-profit sector is one of the world's largest economies. From art museums and university hospitals to think tanks and church charities, over 1.5 million organizations of staggering diversity share the tax-exempt 501(c)(3) designation, if little else. Many social justice organizations have joined this world, often blunting political goals to satisfy government and foundation mandates. But even as funding shrinks, many activists often find it difficult to imagine movement-building outside the non-profit model. *The Revolution Will Not Be Funded* gathers essays by radical activists, educators, and non-profit staff from around the globe who critically rethink the long-term consequences of what they call the non-profit industrial complex. Drawing on their own experiences, the contributors track the history of non-profits and provide strategies to transform and work outside them. Urgent and visionary, *The Revolution Will Not Be Funded* presents a biting critique of the quietly devastating role the non-profit industrial complex plays in managing dissent. Contributors.
