*Scripture and Interpretation* Ariel Feldman, Liora Goldman, 2014-11-10 The discovery of the Dead Sea Scrolls more than sixty years ago has revealed a wealth of literary compositions which rework the Hebrew Bible in various ways. This genre seems to have been a popular literary form in ancient Judaism literature. However, the Qumran texts of this type are particularly interesting for they offer for the first time a large sample of such compositions in their original languages, Hebrew and Aramaic. Since the rewritten Bible texts do not use the particular style and nomenclature specific to the literature produced by the Qumran community. Many of these texts are unknown from any other sources, and have been published only during the last two decades. They therefore became the object of intense scholarly study. However, most the attention has been directed to the longer specimens, such as the Hebrew Book of Jubilees and the Aramaic Genesis Apocryphon. The present volume addresses the less known and poorly studied pieces, a group of eleven small Hebrew texts that rework the Hebrew Bible. It provides fresh editions, translations and detailed commentaries for each one. The volume thus places these texts within the larger context of the Qumran library, aiming at completing the data about the rewritten Bible.

**Successful Case-based Reasoning Applications-2** Stefania Montani, Lakhmi C. Jain, 2013-09-03 Case-based reasoning paradigms offer automatic reasoning capabilities which are useful for the implementation of human like machines in a limited sense. This research book is the second volume in a series devoted to presenting Case-based reasoning (CBR) applications. The first volume, published in 2010, testified the flexibility of CBR, and its applicability in all those fields where experiential knowledge is available. This second volume further witnesses the heterogeneity of the domains in which CBR can be exploited, but also reveals some common directions that are clearly emerging in recent years. This book will prove useful to the application engineers, scientists, professors and students who wish to develop successful case-based reasoning applications.

**Introducing Aesthetics and Philosophy of Art** Darren Hudson Hick, 2022-12-15

Aesthetics and the philosophy of art are about things in the world – things like the Mona Lisa, but also things like horror movies, things like the ugliest dog in the world, and things like wallpaper. There's a surprising amount of philosophical content to be found in wallpaper. Using a case-driven approach, *Introducing Aesthetics and the Philosophy of Art* is grounded in real-world examples that propel thought, debate, and discussion about the nature of art and beauty. Now in its third edition, this tried-and-tested text features fresh cases and new activities. Hands-on Do Aesthetics! activities pepper the text, and Challenge Cases appear at the end of each chapter to test intuitions, to complicate the field of discussion, and to set a path forward. Charlotte Perkins Gilman's "The Yellow Wall-Paper" serves as a recurring case throughout, and this edition includes the full text of this classic short story. From classical debates that continue to bother philosophers today, to emerging problems of identity, appropriation, and morality, this introduction is designed to engage you in a field that itself engages with so much of the world around you. Here is everything you need to know about the history, themes, thinkers and theories to get you started on aesthetics and the philosophy of art.
