Gunships Wayne Mutza, 2009 *Gunships: The Story of Spooky, Shadow, Stinger, and Spectre* tells the dramatic story of transforming military cargo transports into deadly ground-attack aircraft used by the U.S. and other countries in worldwide conflicts from the Vietnam War to the Middle East today. This comprehensive and detailed accounting of gunships begins with piston-powered, WWII-era C-47s and progresses to the four-engine turboprop C-130 Hercules, showing how gunships evolved from using 20mm miniguns to 105mm Howitzers with digital-age Battle Management Centers housed onboard. These highly effective airplanes made history by removing the safe haven of night operations from the enemy, and allowing strategic victory that might not have otherwise been possible. Author Wayne Mutza not only carefully researched all of these aircraft and their paths to reality, but also tells the tale of the brave and persevering men who believed in this unique weapon system and who saw its development through to the end. This book features a wealth of outstanding color photographs, many of which have never before been published, and also contains detailed appendices documenting gunship production data, combat units, and aircraft losses.

Russian Gunship Helicopters Yefim Gordon, Dmitriy Komissarov, 2013-11-04 Features;* Profiles of iconic types such as the Mil MI-24 'Hind', the Mil-28 and the Kamov Ka-52 'Alligator'.* Summary of design histories and careers* Colour reference for paint schemes * Critical review of available kits* Over 180 colour and black and white illustrations, including 20 full colour side-views and a range of various 3-view line-drawings. With profiles of a host of exciting designs, accompanied by a descriptive narrative history of the various types, this volume combines practical information with reflective historical analysis, making for a visually rich volume providing modellers with all they need to know about the most exciting Russian Gunship helicopter designs and associated model kits. This edition deals primarily with the three principal attack helicopter types of the present-day Russian Army; The Mil MI-24 'Hind' otherwise known as 'the Flying Crocodile' has been produced in large numbers with many versions and variants produced. It has been supplied to a host of countries and seen considerable combat action in conflicts both in the Soviet Union and abroad. It still forms the backbone of army aviation in Russia and remains at the forefront of national exposure. The Mil-28 is a more contemporary type and is broadly the equivalent of the McDonnell Douglas AH-64 Apache. The Kamov Ka-52 'Alligator' NATO name 'Hokum-B' also features. This helicopter is in service with the Army and is entering service also with the Russian Navy. Well-illustrated histories and structural analyses are supplemented with detailed descriptions of the various plastic scale model kits which have been

released, along with commentary concerning their accuracy and available modifications and decals. This level of detail and insight is sure to prove invaluable to a wide community of model-makers, both at home and overseas.

Flying Gunship Kevin J. Fitzpatrick, 2000 A series about the most sophisticated and up-to-date military weaponry explained in vivid detail. Highlighting the profiles and uses of these weapons, reluctant teen readers will learn much about military technology.

Introduction to Kiribati Gilad James, PhD, 2020-11-30 Kiribati is a small, low-lying island nation located in the central Pacific Ocean. It spans an area of approximately 3.5 million square kilometers and consists of 33 atolls and islands, with the majority of its land area located less than two meters above sea level. Due to its vulnerability to rising sea levels and the devastating impacts of climate change, Kiribati has been described as a bellwether for the impacts of global warming on low-lying island nations. The population of Kiribati is estimated to be around 119,500, with the majority of the population living on the main island of South Tarawa. Kiribati is a diverse nation, with a varied cultural heritage and a mix of Christianity and traditional beliefs. Its economy is largely based on subsistence agriculture and fishing, although the government has recently introduced policies aimed at attracting foreign investment and developing industries such as tourism and mining. Kiribati has also faced numerous challenges, including the loss of land to erosion, overfishing, and limited access to healthcare and education.

Mil Mi-24 Hind Gunship Alexander Mladenov, 2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

Spectre Gunner David M. Burns, 2013-01-31 This is the true story of Master Sergeant David M. Burns, an aerial gunner assigned to the deadliest squadron in air force history. Aboard the AC-130 Spectre gunship, he flew a total of 287 combat missions over Laos, South Vietnam, and Cambodia, in pursuit of the truck traffic coming down the Ho Chi Minh Trail. His squadron destroyed more than

fifteen thousand trucks loaded with war munitions destined for South Vietnam and Cambodia. Despite heavy and constant anti-aircraft and missile fire, the loss of six aircraft and the lives of fifty-two men, the crew never wavered in its dedication to the mission. Master Sergeant Burns has a distinguished military career that began in 1951 at the age of fifteen. He served one tour of duty in Phan Rang, South Vietnam, in 1967, and four tours of duty in the 16th Special Operations Squadron in Southeast Asia as an aerial gunner, lead gunner, and instructor gunner. He served in both the United States Navy and Air Force, earning three Distinguished Flying Crosses for heroism, twenty-seven Air Medals, as well as a Bronze Star, Purple Heart, Presidential Unit Citation, Armed Forces Expeditionary Medal, Vietnam Cross of Gallantry with Palm, Vietnam Service Medal with nine battle stars, and other decorations from the Korean War. He was wounded twice and is credited with saving the lives of fourteen crewmembers. This is his story.

The Gunship Chronicles Larry Barbee,2019-08-07 This is the story of the AC-119K gunship and the Stinger 41 mission. Shadow and Stinger Pilot Roy Davis recently helped Larry publish his book titled *The Gunship Chronicles: Stinger 41*. Larry is donating all the profits from the sale of the book to the Association.

Vanguard #2: Summon the Thunder Dayton Ward,Kevin Dilmore,2006-07-01 The second novel from the acclaimed Vanguard saga, based on Star Trek: The Original Series! The Taurus Reach: a remote interstellar expanse that holds a very old and potentially cataclysmic secret, the truth of which is feared by the Tholians, coveted by the Klingons, and dubiously guarded by the Federation. At the center of this intrigue is Vanguard, a Federation starbase populated by an eclectic mix of Starfleet officers and civilians, whose lives are forever altered as they explore the layers of mystery surrounding the Reach and steadily peel them away...one after another. In the aftermath of Harbinger, Commodore Diego Reyes commands Vanguard while waging an intensely personal struggle, tasked to uncover the true significance of the Taurus Reach while simultaneously concealing that mission from his fellow officers—and even his closest friends. As the Daedalus-class U.S.S. Lovell brings some of Starfleet's

keenest technical minds to help, the U.S.S. Endeavour makes a find that could shed further light on the enigmatic meta-genome that has captured the Federation's interest—if its crew survives the discovery... Deep within the Taurus Reach, an ancient and powerful alien mind has awakened prematurely from aeons of hibernation, alerted to the upstart civilizations now daring to encroach upon the worlds in her care. With the stakes for all sides escalating rapidly, the alien lashes out with deadly force against the interlopers, propelling the Vanguard crew on a desperate race to understand the nature of the attacker, and to prevent the Taurus Reach from becoming a war zone.

World War II US Gunships William Wolf,2020-11-26 The XB-40 and XB-41 were secret, little-known experimental modifications of the B-17F and B-24D, respectively, into heavily-armed bomber gunships sometimes referred to as “bomber escorts”. They were developed during early World War II in response to the lack of a USAAF long-range fighter aircraft able to escort and protect regular B-17 formations making the round trip from Britain deep into Germany. Using many formerly-classified documents from his large microfilm collection, William Wolf presents their previously-unpublished history. It describes in depth for the first time the politics and development and associated problems of both escorter types. Unfortunately, these “protectors” were found wanting in several ways - after the addition of guns and ammunition they became overweight and tail-heavy causing center of gravity problems and each encountered numerous delays in the development and delivery of their various armament additions and improvements, particularly the Bendix chin turret. In the end, the YB-40 participated in only 14 lackluster operational service test missions during mid-1943 before being withdrawn from service. The XB-41 Liberator never saw operational testing before also being cancelled for its poor performance. The failure of the gunship concept left a huge hole in the capabilities of the Eighth Air Force. Their failure, however, spurred the adoption of the Merlin-powered P-51 Mustang, the outstanding escort fighter that was key to Allied victory in the air war over Europe.

Gunship Over Angola Steve Joubert,2019-04-15 Growing up in suburban Pretoria, Steve Joubert dreamed of a career as a pilot. After undergoing SAAF pilot training, a freak injury put an end to his hopes of flying fighter jets. Instead he learned to fly the versatile Alouette helicopter. He had barely qualified as a chopper pilot when he was sent to the Border, where he flew missions over Namibia and southern Angola to supply air cover to troops on the ground. As a gunship pilot, Steve saw some of the worst scenes of war, often arriving first on the scene after a contact or landmine attack. He also recalls the lighter moments of military life, as well as the thrill of flying. A born maverick, his lack of

respect for authority often got him into trouble with his superiors. His experiences affected him deeply, and led him eventually to question his role in the war effort. As the Border War escalated, his disillusionment grew. This gripping memoir is a powerful plea for healing and understanding.

Gunship Pilot Robert F. Hartley, 2015-02-24 It was 1968 and Robert Hartley was on his first combat mission in Vietnam as copilot of a helicopter gunship. As he and his platoon leader flew over the A Shau Valley, a Chinook helicopter engulfed in flames suddenly came into view. Hartley noticed tiny black smoking objects exiting the tail ramp of the aircraft. Seconds later, he realized those objects were men escaping the flames and plunging to their deaths. It was in that moment that he silently wondered, “How the hell did I get here?” Mr. Hartley was still wet behind the ears when he was tossed into the cauldron of America’s most unpopular war as an attack helicopter gunship pilot. As he shares a gripping, birds-eye view of battles that took him from the Demilitarized Zone in the north to the Mekong Delta in the south, Mr. Hartley compellingly details how he learned to rely on his superior training and equipment to follow through with his mission to kill the enemy and save the lives of his fellow soldiers below. *Gunship Pilot* provides an unforgettable glimpse into two combat tours of duty in Vietnam as a helicopter pilot soaring high above rice paddies and jungles attempts to fulfill his duty of protecting America’s warriors on the ground.

The Dakota Hunter Hans Wiesman, 2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author’s life: “It is almost like an adventure novel except it is true” (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey

situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

Helicopter Gunships Wayne Mutza, 2010 U.S. Army aviators pioneered the first helicopter gun platforms in the early 1950s. Today, helicopter gunships are the most unique element of rotary-wing aviation, redefining the term close air support. As the ultimate development of the military helicopter, these largely U. S.-designed-and-built aircraft reign supreme as the premier attack platforms of modern aerial warfare. *Helicopter Gunships* begins with the Vietnam War as the ultimate proving ground that first utilized helicopter gunships and saw the development of other rotary-wing weapons systems as well. This book also explores fascinating post-war programs like the experimental Comanche, Blackhawk, and Apache. Through in-depth research and exclusive high-quality photos, noted author and helicopter expert Wayne Mutza examines in vivid detail the numerous weapon systems mated with a surprisingly wide variety of helicopters. Attention is also given to helicopter gunships developed by other Free World countries and Communist nations.

Gunship Thunderpunch Brian Shearer, 2020-05 Martians kidnapped Nova Marcos' son! Her only chance to save him lies with an abandoned gunship and an inmate with a life sentence who commanded the ship decades before. But this gunship has a secret: It's alive! After spending 30 years abandoned in a junk yard, their self-aware transforming gunship might have some trust issues.

The Gun, the Ship, and the Pen: Warfare, Constitutions, and the Making of the Modern World
Linda Colley, 2021-03-30 Best Books of the Year: Financial Times, The Economist Book of the Year: The Leaflet (International Forum on the Future of Constitutionalism) Longlisted for the Cundill History Prize Profiled in The New Yorker New York Times Book Review • Editors' Choice Vivid and magisterial, *The Gun, the Ship, and the Pen* reconfigures the rise of a modern world through the advent and spread of written constitutions. A work of extraordinary range and striking originality, *The Gun, the Ship, and the Pen* traces the global history of written constitutions from the 1750s to the twentieth century, modifying accepted narratives and uncovering the close connections between the making of constitutions and the making of war. In the process, Linda Colley both reappraises famous constitutions and recovers those that have been marginalized but were central to the rise of a modern world. She brings to the fore neglected sites, such as Corsica, with its pioneering constitution of 1755, and tiny Pitcairn Island in the Pacific, the first place on the globe permanently to enfranchise women.

She highlights the role of unexpected players, such as Catherine the Great of Russia, who was experimenting with constitutional techniques with her enlightened Nakaz decades before the Founding Fathers framed the American constitution. Written constitutions are usually examined in relation to individual states, but Colley focuses on how they crossed boundaries, spreading into six continents by 1918 and aiding the rise of empires as well as nations. She also illumines their place not simply in law and politics but also in wider cultural histories, and their intimate connections with print, literary creativity, and the rise of the novel. Colley shows how—while advancing epic revolutions and enfranchising white males—constitutions frequently served over the long nineteenth century to marginalize indigenous people, exclude women and people of color, and expropriate land. Simultaneously, though, she investigates how these devices were adapted by peoples and activists outside the West seeking to resist European and American power. She describes how Tunisia generated the first modern Islamic constitution in 1861, quickly suppressed, but an influence still on the Arab Spring; how Africanus Horton of Sierra Leone—inspired by the American Civil War—devised plans for self-governing nations in West Africa; and how Japan’s Meiji constitution of 1889 came to compete with Western constitutionalism as a model for Indian, Chinese, and Ottoman nationalists and reformers. Vividly written and handsomely illustrated, *The Gun, the Ship, and the Pen* is an absorbing work that—with its pageant of formative wars, powerful leaders, visionary lawmakers and committed rebels—retells the story of constitutional government and the evolution of ideas of what it means to be modern.
