**Microsculpture** Levon Biss,2017-10-10 You will never look at a beetle or a moth the same way again. --WIRED Art meets science to dazzling effect. --The Guardian Microsculpture is a unique photographic study of insects in mind-blowing magnification that celebrates the wonders of nature and science. Levon Biss's photographs capture in breathtaking detail the beauty of the insect world and are printed in large-scale format to provide an unforgettable viewing experience. Each picture in Microsculpture is created from approximately 8,000 individual photographs. Segments of the specimen are lit and photographed separately using microscope lenses, then "stacked" to maintain sharp focus throughout. These images are then combined to create a single high-resolution file. From start to finish, each portrait takes approximately 4 weeks to create. The project has captured the attention of the world with features in WIRED and New Scientist. Microsculpture has been exhibited at the Oxford University Museum of Natural History and the Xposure 2016 International Photography Festival in Sharjah, U.A.E. It has been viewed by over half a million people so far and will be touring museums around the world from 2017 onward. The entomology collection has significant cultural and historical value, containing the world's oldest pinned insect specimen and many thousands of insects collected by pioneering Victorian explorers and biologists such as Charles Darwin and Alfred Russell Wallace.

**MICRONATIONS** Kathy Ceceri,2014-05-12 For anyone who's ever dreamed of ruling over their own empire, here's your chance! Micronations are imaginary countries that have a lot of the same things as real ones: laws, customs, history, and their own flags, coins, and postage stamps. Micronations: Invent Your Own Country and Culture takes readers step-by-step to create their own unique realm, using examples from real nations, micronations, and fictional lands. What makes a country a country? What symbols and systems define a country and help it function? Learn about geography and government, technology and the environment, art and culture, and the literary device of world-building used in works like The Hobbit and Harry Potter. Kids get to invent their own language, music, games, clothing, food, and holidays to fit their micronation's tradition. Whether they create a land of time travel where every city exists in a different epoch or an underwater monarchy whose chief export is fish, Micronations: Invent Your Own Country and Culture will engage kids' imagination and teach make-believe rulers how the real world works. This title meets Common Core State Standards for literacy in language arts, history and social studies; Guided Reading Levels and Lexile measurements indicate grade level and text complexity.
