Battle of Leyte Gulf Thomas J Cutler,2014-03-15 The last great naval battle of World War II, Leyte Gulf also is remembered as the biggest naval battle ever fought anywhere, and this book has been called the best account of it ever written. First published in hardcover on the battle's fiftieth anniversary in 1994 and drawing on materials not previously available, it blends history with human drama to give a real sense of what happened--despite the mammoth scope of the battle. Every facet of naval warfare was involved in the struggle that engaged some two hundred thousand men and 282 American, Japanese, and Australian ships over more than a hundred thousand square miles of sea. That Tom Cutler succeeded at such a difficult task is no surprise. The award-winning author saw combat service aboard many types of ships during his naval career, and as a historian and professor of strategy and policy at the Naval War College, he has studied the battle for many years. Cutler captures the milieu, analyzes the strategy and tactics employed, and re-creates the experiences of the participants--from seaman to admiral, both Japanese and American. It is a story replete with awe-inspiring heroism, failed intelligence, flawed strategy, brilliant deception, great controversies, and a cast of characters with names like Halsey, Nimitz, Ozawa, and MacArthur. Such an exciting and revealing account of the battle is unlikely to be equaled by future writers.

Blazing Skies John A. Hamilton,2009-05-13 The book is an authoritative history on the Army Air Defense Artillery Branch on Fort Bliss, Texas. Fort Bliss in 1940 was a cavalry post located on the Texas border. The post itself occupied the sixth location of what had been called Fort Bliss. In the summer of 1940 a number of Army National Guard antiaircraft regiments were called to active duty to spend one year protecting American cities and territories from air attack. In September the first antiaircraft regiment, the 202nd Coast Artillery (Antiaircraft) Regiment, arrived at Fort Bliss. Over the next four years the post became an antiaircraft training center and finally the Army antiaircraft training center. After the war, Fort Bliss became the premier guided missile testing and training center for the Army. All of the Nike missile battalions deployed to protect American cities during the Cold War trained there. As time passed, Fort Bliss expanded to 1.1 million acres, one of the largest Army posts in the world. By 1946, the antiaircraft arm was the owner of Fort Bliss. By 1957, the post had become the Air Defense Center and School for the United States Army. This book is the story of that progression until the Base Realignment and Closure announcement in 2005. By 2011, the Air Defense Artillery Center and School will be located at Fort Sill, Oklahoma. This will end the era of Air Defense Artillery ownership of Fort Bliss, Texas

Construction Safety Rita Yi Man Li,Sun Wah Poon,2013-03-01 A close-to-ideal blend of suburb and city, speedy construction of towers of Babylon, the sparkling proportion of glass and steel buildings' facade at night showcase the wisdom of humans. They also witness the footsteps, sweats and tears of architects and engineers. Unfortunately, these signatures of human civilizations are swathed in towering figures of construction accidents. Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore. It also highlights the enormous compensation costs with the courts' experiences in the United Kingdom and Hong Kong.

Chinese Policing Kam C. Wong,2009 This book documents a systematic investigation into various aspects of policing in the People's Republic of China, including its scholarship, idea, origin, history, education, culture, reform, and theory. It approaches the study of Chinese policing from an indigenous perspective, informed by local empirical data. In proposing an innovative theory of community policing entitled «Police Power as a Social Resource Theory», the book seeks to look at crime as a personal problem, and police as a social resource, from the perspective of the people and not the state.

Computers at Risk National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Commission on Physical Sciences, Mathematics, and Applications,System Security Study Committee,1990-02-01 Computers at Risk presents a comprehensive agenda for developing nationwide policies and practices for computer security. Specific recommendations are provided for industry and for government agencies engaged in computer security activities. The volume also outlines problems and opportunities in computer security research, recommends ways to improve the research infrastructure, and suggests topics for investigators. The book explores the diversity of the field, the need to engineer countermeasures based on speculation of what experts think computer attackers may do next, why the technology community has failed to respond to the need for enhanced security systems, how innovators could be encouraged to bring more options to the marketplace, and balancing the importance of security against the right of privacy.

Notes from the Hyena's Belly Nega Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

McGregor Renewal and the Current Air Defense Mission David Rubenson,1998 Six major military ranges, comprising roughly 30 percent of the Department of Defense's lands, will revert to the public domain in 2001 unless Congress reauthorizes their use for military purposes. This report evaluates the military rationale for retaining in the military system the 600,000-acre McGregor Range on Fort Bliss. The report is organized around arguments suggesting that the McGregor Range should be returned to the public domain: (1) the range's low military utilization, (2) doubts about the range's military role, (3) speculation that McGregor activities could easily be transferred to the nearby White Sands Missile Range, and (4) the range's important nonmilitary uses. The authors find that low utilization numbers are an artifact of Army range record keeping. Although it is moderately utilized, McGregor is a critical factor in ensuring that Fort Bliss can perform its role as the nation's center for air defense. The authors also find no obstacles to conducting the nonmilitary uses of McGregor in conjunction with existing military missions. White Sands does have sufficient land and airspace to accommodate the McGregor mission, but transferring activities could occur only in the context of a national evaluation of military basing options and policy. The study concludes that there would be adverse military impacts in returning McGregor to the public domain, but few positive

changes in the level of nonmilitary use.

The Rocket Team Frederick Ira Ordway,Mitchell R. Sharpe,2003 Travelling to the Moon and the planets beyond has moved from the world of dreamers and Buck Rogers to the factual terrain of the daily papers and television news shows. This book tells the story of the men who did so much to make the impossible a reality. From a small group of amateur rocketeers led by Wernher von Braun, his rocket team grew into one of the most influential technological forces in this or any other century. This book discloses much previously classified information, particularly involving the British intelligence effort to learn about Hitler's heralded V1 and V2 'vengeance weapons'; to delay their going into action and to minimise their effectiveness once they were developed. The US and British documents, as well as information from von Braun himself, his papers, and interviews with the other members of his team, provide new insights into the wartime growth of rocketry. This revised edition includes a DVD with hours of previously unreleased videos of the German Rocket Pioneers, including two lectures by Wernher von Braun.

Airborne Warfare James Maurice Gavin,2020-04-13 To every member of the 82nd Airborne Division who dropped as part of the American paratroop landings during World War Two, they breathed a little easier knowing their commander Jumpin' Jim Gavin would be jumping with them. General Gavin's paratroops drop-landed and fought in Sicily, Normandy on D-Day and during the abortive attempt to capture the Rhine bridges during Operation Market-Garden. He shared the risks of all his men parachuting into enemy territory, often only armed with his GI issue rifle. His memoirs are an outstanding addition to the literature of the Airborne in World War II.
