Han Material Culture Sophia-Karin Psarras, 2015-02-02 This book analyzes Han dynasty Chinese archaeology based on a comparison of the forms of vessels found in positively dated tombs.

Bronze Vessels of Ancient China in the Avery Brundage Collection Asian Art Museum of San Francisco. Avery Brundage Collection, René Yvon Lefebvre d'Argencé, 1977

Sources of Western Zhou History Edward L. Shaughnessy, 1992-01-08 The thousands of ritual bronze vessels discovered by China's archaeologists serve as the major documentary source for the Western Zhou dynasty (1045-771 B.C.). These vessels contain long inscriptions full of detail on subjects as diverse as the military history of the period, the bureaucratic structure of the royal court, and lawsuits among the gentry. Moreover, being cast in bronze, the inscriptions preserve exactly the contemporary script and language. Shaughnessy has written a meticulous and detailed work on the historiography and interpretation of these objects. By demonstrating how the inscriptions are read and interpreted, Shaughnessy makes accessible in English some of the most important evidence about life in ancient China.

How to Read Chinese Ceramics Denise Patry Leidy, 2015-09-01 Among the most revered and beloved artworks in China are ceramics—sculptures and vessels that have been utilized to embellish tombs, homes, and studies, to drink tea and wine, and to convey social and cultural meanings such as good wishes and religious beliefs. Since the eighth century, Chinese ceramics, particularly porcelain, have played an influential role around the world as trade introduced their beauty and surpassing craft to countless artists in Europe, America, and elsewhere. Spanning five millennia, the Metropolitan Museum's collection of Chinese ceramics represents a great diversity of materials, shapes, and subjects. The remarkable selections presented in this volume, which include both familiar examples and unusual ones, will acquaint readers with the prodigious accomplishments of Chinese ceramicists from Neolithic times to the modern era. As with previous books in the How to Read series, *How to Read Chinese Ceramics* elucidates the works to encourage deeper understanding and appreciation of the meaning of individual pieces and the culture in which they were created. From exquisite jars, bowls, bottles, and dishes to the elegantly sculpted Chan Patriarch Bodhidharma and the gorgeous Vase with Flowers of the Four Seasons, *How to Read Chinese Ceramics* is a captivating introduction to one of the greatest artistic traditions in Asian culture.

Zheng He's Voyages Down the Western Seas, 2005 Zheng He (1371-1433) was a great navigator in the history of China and the world and a pioneer in the great geographical discoveries. During the 28 years (1405-1433) from the third year of the reign of Emperor Yong Le to the eighth year of the reign of Emperor Xuan De of the Ming Dynasty, he successfully made seven voyages down the western seas (today's Indian Ocean).

The Organization of Imperial Workshops During the Han Dynasty Anthony Jerome Barbieri-Low, 2019-03-09 It is widely believed that assembly-line mass production, quality-control procedures, inventory accounting, and multi-tiered factory management structures are inventions of the modern world, offspring of the mechanization and industrialization which swept through Western Europe and America during the eighteenth and nineteenth centuries. But two thousand years ago in China, during the Han period (206 BC-AD 220), advanced production and management techniques were already implemented in well developed forms in the extensive factory system operated by the Han imperial government. This study was written as Part One of a larger project on workshops and artisans in Ancient China. Part Two was published as the book, *Artisans in Early Imperial China* (UW Press, 2007).

Zheng He Edward L. Dreyer, 2007 This new biography, part of Longman's World Biography series, of the Chinese explorer Zheng He sheds new light on one of the most important what if questions of early modern history: why a technically advanced China did not follow the same path of development as the major European powers. Written by China scholar Edward L. Dreyer, Zheng He outlines what is known of the eunuch Zheng He's life and describes and analyzes the early 15th century voyages on the basis of the Chinese evidence. Locating the voyages firmly within the context of early Ming history, it addresses the political motives of Zheng He's voyages and how they affected China's exclusive attitude to the outside world in subsequent centuries.

The Ming Maritime Trade Policy in Transition, 1368 to 1567 Kangying Li, 2010 The Ming maritime policy in transition, 1368-1567 is an unprecedented structural approach to one of the most puzzling phenomena in Chinese early modern history: the maritime trade prohibition from 1368 to 1567. This policy deliberately interdicted its own people from sailing abroad and prevented foreigners from entering China unless they were part of an official tribute

mission. Other than treating this phenomenon as an isolated trade policy or defense strategy the author analyzes the policy against the general Chinese historical background from the fourteenth to sixteenth centuries. He approaches the policy as a superstructure established on the foundation of a compatible ideology, the social context, economic institutions and the political power landscape. The 200 years long process of the policy in transition is hence investigated as a 200 years course that witnessed the general transformation of the Ming ideological, social, economic and political structures. It is the historical undercurrent rather than spindrift that appeals to this book's historiography; it is a comprehensive study of the two particular centuries of the Ming society, of which the developments and characteristics have amazed not only historians.
