*Lethal and Non-Lethal Fires* Army University Press,Thomas G. Bradbeer,2018-09 Lethal and Non-Lethal Fires: Historical Case Studies of Converging Cross-Domain Fires in Large Scale Combat Operations, provides a collection of ten historical case studies from World War I through Desert Storm. The case studies detail the use of lethal and non-lethal fires conducted by US, British, Canadian, and Israeli forces against peer or near-peer threats. The case studies span the major wars of the twentieth-century and present the doctrine the various organizations used, together with the challenges the leaders encountered with the doctrine and the operational environment, as well as the leaders' actions and decisions during the conduct of operations. Most importantly, each chapter highlights the lessons learned from those large scale combat operations, how they were applied or ignored and how they remain relevant today and in the future.

**Life and Times of Frederick Douglass** Frederick Douglass,1882 Frederick Douglass recounts early years of abuse, his dramatic escape to the North and eventual freedom, abolitionist campaigns, and his crusade for full civil rights for former slaves. It is also the only of Douglass's autobiographies to discuss his life during and after the Civil War, including his encounters with American presidents such as Lincoln, Grant, and Garfield.

Regenesis George M Church,Edward Regis,2014-04-08 A Harvard biologist and master inventor explores how new biotechnologies will enable us to bring species back from the dead, unlock vast supplies of renewable energy, and extend human life. In Regenesis, George Church and science writer Ed Regis explore the possibilities of the emerging field of synthetic biology. Synthetic biology, in which living organisms are selectively altered by modifying substantial portions of their genomes, allows for the creation of entirely new species of organisms. These technologies-far from the out-of-control nightmare depicted in science fiction-have the power to improve human and animal health, increase our intelligence, enhance our memory, and even extend our life span. A breathtaking look at the potential of this world-changing technology, Regenesis is nothing less than a guide to the future of life.

*The Kite Runner* Khaled Hosseini,2007 Traces the unlikely friendship of a wealthy Afghan youth and a servant's son in a tale that spans the final days of Afghanistan's monarchy through the atrocities of the present day.

**The Yearling** Marjorie Kinnan Rawlings,2011-06-28 An American classic-and Pulitzer Prize-winning story-that shows the ultimate bond between child and pet. No novel better epitomizes the love between a child and a pet than The Yearling. Young Jody adopts an orphaned fawn he calls Flag and makes it a part of his family and his best friend. But life in the Florida backwoods is harsh, and so, as his family fights off wolves, bears, and even alligators, and faces failure in their tenuous subsistence farming, Jody must finally part with his dear animal friend. There has been a film and even a musical based on this moving story, a fine work of great American literature.

*The Spirited Horse* Laerke Recht,2023-12-28 Presenting a new perspective on human-animal relations in the ancient Near East, this volume considers how we should understand equids (horses, donkeys, onagers and various hybrids) as animals that are social actors. Recht brings together a wealth of new data, including Bronze Age Near Eastern material culture from a range of archaeological contexts with equid remains as well as iconography and texts. She looks in particular at finds of equids themselves from burials, sacred space and settlements alongside associated

artefacts such as chariots and harnesses. This is the first time the agency of animals is recognized. The study is essential reading for prehistorians, archaeologists and those studying early animal domestication, showcasing how humans encounter and interact with other animals, and how those animals in turn interact with humans. Recht outlines the broader implications for human involvement with their environment, both today and in the past, and points to further study in a number of focused appendices.

*Dante's Divine Comedy: The Inferno* Dante Alighieri,1858
